REPORT

Of S. A. Armstrong, Inspector of Prisons and Public Charities for the Year 1908.

Change in Report.

A change has been made in the Form of the Annual Report of this Department, and it now appears in two sections, one dealing exclusively with the Hospitals for the Insane, and the other with the Hospital for Idiots at Orillia and the Hospital for Epileptics at Woodstock. As a result of this change some confusion may possibly arise in reading the comparative statements submitted herewith, but an effort has been made to make all Tables as clear as possible.

Statistical Tables.

During the year, a complete revision of the Statistical Tables was made, and the revised Tables now appear for the first time in this Report.

Classification of Insanity.

As no uniformity in the classification of insanity existed in the different Hospitals for the Insane, it was considered expedient that a standard classification should be adopted. With this end in view a committee of Medical Superintendents was requested to prepare such a classification, one which could be adopted as a working basis, and as a framework on which further classifications could be worked out. This has been accomplished, and the new classification (a copy of which I have appended to this Report, together with the Regulations which were passed respecting the same) went into effect at the close of the year.

General Operations.

On December 31st, 1908, exclusive of insane patients in the Homewood Sanitarium, at Guelph, there were in the Hospitals for the Insane of Ontario, 5,491 insane persons, divided as follows:

Males	2,614
Females	2,877

The net increase in the population for the year was 177.

Great difficulty has been experienced in meeting the demands for accommodation, and if applications for admission continue to be greatly in excess of the vacancies from time to time created, the question of additional accommodation will soon have to be considered.

A careful census was taken during the year of all the patients in the Hospitals who were considered by the Superintendents as fit inmates for County Houses of Refuge. This census disclosed the fact that there were over 400 such patients who could be removed from the Hospitals, but, as they had no homes to which they could be sent, there was no alternative but to continue them in residence. Letters were addressed to the Clerks of the different Counties with a view to having these patients transferred to the County Houses of Refuge, but with few exceptions we were unable to effect the proposed transfer.

It became necessary in some instances, however, in order to provide accommodation, to urge the Counties to accept in their respective Houses of Refuge suitable chronic cases, and the vacancies thus created were assigned to the acute cases from such Counties.

Revenue.

There has been a slight decrease in the Revenue from paying patients in the various Hospitals, but an increase of $8,571.30 collected from the Municipalities under the provisions of 6 Edward VII, Chapter 9, made a net increase in Revenue over 1907 of $3,663.32. The total Revenue for the year for patients collected from all Hospitals, including the Hospital for Idiots and Epileptics, and from Municipalities was $260,121.75, derived as follows:

Collected from Hospitals for Insane.

1907	$148,927 28
1908	146,148 77
Decrease	$2,778 51

Hospitals for Idiots and Epileptics.

1907	$17,492 35
1908	15,362 88
Decrease	$2,129 47

Railway Taxation.

1907	$90,038 80
1908	98,610 10
Increase	$8,571 30

Total Revenue for the Year 1908	$260,121 75
Total Revenue for the Year 1907	256,458 43
Increase	$3,663 32

Movement of Patients.

The daily average number of patients in the Provincial Hospitals for the Insane during the year was 5,400.

The total number of admissions was 1,124, of which number 258 were admitted to the Toronto Hospital.

The total number of deaths was 351.

The condition of patients discharged during the year was:

Discharged recovered	224
" improved	151
" unimproved	28
" not insane	3
	406

Training School for Nurses.

In the Rules and Regulations for the guidance of officers and employees of the Hospitals, which were put into effect last year, it was provided that a Training School for Nurses should be established. With this end in view a Committee of the Medical Superintendents met from time to time and compiled Regulations and a Course of Instruction which will tend to make the training uniform throughout all the Hospitals. The examination papers will be prepared by a Board of Examiners, consisting of three members selected by the Provincial Secretary. This Training School will offer to young women desirous of becoming professional nurses a thorough course of training in all subjects pertaining to their profession. It is anticipated that the schools will have the effect of attracting to the Hospitals the best material available for nurses, and the treatment which will be afforded the patients by properly trained nurses must be superior to that administered by unskilled hands. As it was impossible to have the curriculum prepared in time for the 1908 classes, the new schools will be inaugurated the First of October, 1909.

DEPORTATION.

The work of deporting the undesirable has been effectively carried on throughout the year, and with the result that 263 persons were deported. The following comparative table shows the number of persons deported in the years 1906, 1907 and 1908:

Year.	Insane.	Criminal.	Likely to be a public charge.	Total.
1906	19			19
1907	54	4	29	87
1908	65	81	117	263
	138	85	146	369

In November of 1908 eighteen insane persons who did not come within the provisions of the Immigration Act were deported by the Department, arrangements having been made by the Ontario Government Agent at Liverpool for their reception at their respective homes upon their arrival. Of these eighteen, nine were acknowledged as being mentally defective before coming to Canada, and two others were acknowledged epileptics, the relatives having no hesitancy in stating that they were sent to this country for the purpose of getting rid of them.

The length of residence in Canada of these eighteen deports prior to their admission to the Hospitals was as follows:

1 patient resided less than one year prior to admission.
6 " " " " two " " "
2 " " " " three " " "
2 " " " " four " " "
2 " " " " five " " "
5 " " more than five " " "

Of the sixty-five insane deported, their average residence in the Hospitals for the Insane was one year and two and a half months.

Of the 81 criminals deported, 15 were committed to the Central Prison and 66 to the gaols of the Province.

Of the 117 deported "as likely to become a public charge," 26 had been living on public charity since their arrival in Canada, 44 were young children of undesirables who were deported, and the remainder were deported owing to disease, physical infirmities and immorality. The pecuniary advantage to the Province by the deportation of the insane persons alone amounts to over $325,000.00.

In addition to the deportations which were mentioned above, the Chief of Frontier Police at Niagara Falls, acting on instructions received from the Attorney-General's Department, deported to the United States, during the three months ending December 31st, 1908, 303 undesirables.

Returns have been received at the end of each month from the Hospitals for the Insane, County Gaols and Central Prison, from which accurate statistics have been compiled. With this data at hand, every effort was made to deport those immigrants whose history was such as to warrant a recommendation for their deportation being made to the Department of Immigration at Ottawa.

In my Report for last year I submitted a number of tables, which showed the effects of immigration and the resultant burden imposed upon the Province. I have omitted from this Report the publication of similar tables, but submit herewith a series of charts, which are intended to show in graphic form the information secured from the statistics collected during the year. Throughout the charts I have used the words "foreign-born" and "native-born," in order to distinguish persons born outside of Canada from the native-born.

The information furnished by these charts must surely afford food for thought for those people who are advocating an indiscriminate immigration.

S. A. Armstrong.

REPORT

Of E. R. Rogers, Inspector of Prisons and Public Charities.

The returns for the various Hospitals for the Insane show that there was in residence on the 31st of December, 1908, 5,491 patients, being a net increase of 177 during the year.

Improved Methods Adopted.

A committee, deputed to investigate the business and administrative methods in use in some of the prominent Hospitals for the Insane in the United States, visited certain Hospitals for that purpose. As a result, much useful information was gathered, which will lead to improvements being made in some departments of our Hospitals during the year 1909.

Dietary of Patients.

By the installation of modern cooking apparatus, the dietary at the different Institutions has been much improved. During the coming year male cooks will be placed in charge of the kitchens in some of the Hospitals, and it is expected that these changes in the service will effect a considerable saving.

Improvement to Buildings.

During the year many additions and improvements have been made in the different Institutions, including the erection

At Brockville of a handsome Assembly Hall, 51 x 100 feet, constructed of concrete and steel.

At the same Institution a Solar Room was erected of stone and concrete, the cut-stone work being largely done by the patients.

At Kingston the Industrial Building was completed. This building, which is almost entirely constructed of concrete, is well lighted, heated and ventilated, and is a great benefit to those patients employed in industrial work.

At London the patients, under the supervision of the Hospital Engineering Staff, completed a very necessary extension of the Water Service, at a saving to the Province of at least $2,000.00.

Farm Revenue.

The farming operations at the several Institutions have resulted in a revenue of $13,484.05, to which must be added the sum of $75,696.64, being the value of the produce taken off the farms and consumed by the Hospitals, making the total value $89,181.69.

Statements of Expenditure.

Statements showing the expenditure on maintenance, and the per capita cost per day for consumption under the different headings of the estimates for the year, will be found in the tables submitted with this Report.

E. R. Rogers,
Inspector of Prisons and Public Charities.

REGULATION RESPECTING THE CLASSIFICATION OF INSANITY TO BE ADOPTED IN ALL HOSPITALS FOR THE INSANE OF THE PROVINCE OF ONTARIO.

With a view of making the classification of insanity uniform throughout the Hospitals for the Insane in the Province of Ontario, the following classification will be adopted by all such Hospitals on and after the First day of January, 1909.

1.—Psychoses Associated with Toxaemia.

(*a*) Infectious Psychoses.
(*b*) Intoxication Psychoses.
  (1) Alcoholism.
  (2) Delirium Tremens.
  (3) Korssakow's Psychoses.
  (4) Acute Alcoholic Hallucinosis.
  (5) Alcoholic Hallucinatory Dementia.
  (6) " Paranoia.
  (7) " Pseudo Paresis.
  (8) Morphinism.
  (9) Cocainism.
(*c*) Auto-Intoxication Psychoses.
  (1) Myxoedematous Psychoses.
  (2) Cretinism.
(*d*) Exhaustion Psychoses.

2.—Insanity from Organic Cerebral Affections.

(*a*) Arterio Sclerosis.
(*b*) Cerebral Tumors.
(*c*) " Syphilis.
(*d*) " Sclerosis.
(*e*) Huntingdon's Chorea.
(*f*) Multiple Sclerosis.
(*g*) Tabetic Psychosis.
(*h*) Cerebral Abscess.
(*i*) " Haemorrhage (Paralytic Dementia).
(*j*) Traumatic Injury to the Brain.

3.—Insanity Directly Associated with Evolution or Development.

(*a*) Dementia Praecox.
  (1) Hebephrenic.
  (2) Catatonic.
  (3) Paranoic.
(*b*) Paranoia.
(*c*) Psychopathic Sexualis.
(*d*) Instability.
(*e*) Epileptic Psychoses.
(*f*) Hysterical "
(*g*) Catatonia (other than that of D.P.).

4.—Manic Depressive Psychoses.

(*a*) Manic.
(*b*) Depressive.
(*c*) Circular.
(*d*) Other Types.

5.—Insanity Directly Associated with Period of Involution.

(*a*) Melancholia.
(*b*) Pre-Senile Delusional Psychoses.
(*c*) Senile Dementia.

6.—Amentia.

(*a*) Imbecility.
(*b*) Idiocy.

7.—General Paresis.

The above classification is to be adopted by the Medical Superintendents as a working basis, and as a framework on which further classifications may be worked out, so that every opportunity will be given to individuality, without any serious sacrifice to uniformity.

S. A. Armstrong,
Inspector.

Approved,

W. J. Hanna,
Provincial Secretary.

Dated at Toronto this 29th day of December, 1908.

APPENDIX

TO FORTY-FIRST ANNUAL REPORT UPON THE HOSPITALS FOR THE INSANE, AND CONTAINING THE ANNUAL REPORTS OF THE MEDICAL SUPERINTENDENTS OF THE HOSPITALS IN TORONTO, LONDON, KINGSTON, HAMILTON, MIMICO, BROCKVILLE, COBOURG, PENETANGUISHENE AND HOMEWOOD SANITARIUM, GUELPH.

HOSPITAL FOR INSANE, TORONTO.

Annual Report of the Medical Superintendent for the Year ending December 31st, 1908.

To S. A. Armstrong, Esq., and E. R. Rogers, Esq.,
Inspectors of Hospitals for the Insane, etc., Toronto.

Gentlemen,—In accordance with the statutory requirements, I have the honor to submit the sixty-eighth annual report of this hospital for the year ending December 31st, 1908.

The admissions were two hundred and fifty-eight, and to provide for this number we had to increase the accommodation by placing twenty-five beds in a large dormitory, made available by moving the industries department to rooms beneath the carpenters' shop. This means overcrowding some of the wards during the daytime, but owing to the urgent demands for more room, the demands had to be met. In view of the rapid increase of population in Toronto, and the flocking of mental weaklings to the city, something must be done to meet the requirements of the situation. Of course, the establishment of a Psychiatric Clinic would relieve the situation materially, and this should be done at once, otherwise we cannot cope with the difficulties which face us. We have been able to keep the Toronto Gaol relieved, and the abuses that formerly existed under the Warrant system have practically disappeared, but it is doubtful if we can much longer meet the requests for accommodation, especially as a large immigration is prophesied this year.

The total number discharged was one hundred and twenty-six, a smaller total than last year, but when the quality of the admissions is considered the results are not discouraging.

There were seventy-four deaths, and, as has been the history of this institution for many years, general paresis was a prominent cause of death.

The Future of the Toronto Hospital for Insane.

A great deal of "marking time" has been done in this hospital in view of the fact that its future seemed to be uncertain. There has been a reluctance to advise changes which must be made if it is determined to retain the institution on its present site. Of course if it is decided to erect a Psychiatric Clinic in the city at an early date, and remove this hospital to a more suitable site in the country, it will still be good policy to make the best of what we have; if a different decision is made, a large sum of money will be required to place Toronto Hospital for Insane on a modern basis.

First of all, the whole of the heating apparatus must be replaced, an enormous undertaking. The plumbing must be renewed and a hospital provided. A home for nurses must be established, a ward for convalescents supplied, and isolated cottages for the tuberculous. I am still of the opinion that the "game is scarcely worth the candle," and feel that the interests of the chronic insane would best be served by removing our patients to the country, where suitable outlets for their energies could be found in farming and gardening, or in following other pursuits in a way profitable to themselves and the Province. A large city is not the proper home for the chronic insane.

The Demand for More Accommodation.

This Hospital has to provide for the insane of a population of probably more than 500,000, among whom the ratio of insanity is greatly increased by recent arrivals from the Old World. It has been a difficult matter to accommodate all those for whom room was asked. Then again far too many seniles had to be admitted, simply because there was no other place to which they could be sent. Truly the lot of a senile dement is an unhappy one: he is regarded as a nuisance by the majority of mankind; the House of Industry does not want him, the doors of the Homes for Aged are closed to him, and at last the Hospital for Insane proves the only asylum where he can find refuge. Even here he is out of place, as in wards constantly filled to overflowing he can rarely find the conditions best suited for his care. The Houses of Industry should be forced to care for the quiet and harmless indigent seniles, who are now occupying valuable room, and costing the Province an amount quite unnecessary for their support. Then, as said before, the wards of a Hospital for the Insane are not the proper place for such people, who could be cheaply and comfortably provided for elsewhere. Muncipalities should face their responsibilities in this matter.

Recoveries.

The question, "What is a recovery from insanity?" naturally arises before a discussion of the subject may be undertaken. Of course men will differ in regard to the definition of the word "recovery," and the Superintendent who is anxious to shew results will sometimes be tempted to classify as "recoveries" many cases which should fairly be styled "improved." Many of the so-called recoveries in Dementia Præcox are of this character.

Then again, when the public is clamoring for something to prove that advanced medical treatment is producing results, a demand that is reasonable and fair, what can we shew to demonstrate the truth of the assertion that more recoveries are occurring than in former days when much less was done for the patients? To the Psychiatrist the difficulties of making the truth evident are at once apparent, and such will be the case until a Psychiatric Clinic, properly equipped, is built, then it will be clearly demonstrated that modern ideas of treatment are not only sound, but absolutely essential, if we are to do our duty to those who are developing, or who are in the early stages of disease. Then again it is a well-known fact that the majority of patients sent to Hospitals for the Insane are hopelessly chronic, and far past help when we receive them. The asylum bugaboo has been too much for their friends. To shew this let us make a brief analysis of this year's results. Two hundred and fifty-eight patients were admitted to Toronto Hospital. Of these one hundred and eighty-six could at once be classified as hopelessly insane, before they reached us. To be sure, many were restored to their friends in a greatly improved condition (64), but any psychiatrist of experience would agree with the expression of opinion that the persons classified as incurable by us, were properly so regarded.

We had no less than one hundred and three cases of Dementia Præcox, only six belonging to the Catatonic class, the one hopeful variety of this disease. In other words 55 per cent. of our admissions were suffering from Dementia Præcox, a proportion nearly three times too large under ordinary circumstances. The explanation is very simple, an explanation that has almost become a nightmare in this institution, viz., the old word "weakling."

Of the forty-six "recently arrived" admissions, nearly all were cases of

Dementia Præcox; the exceptions were so few that they are scarcely worth recording. Add sixteen paretics to the 103 Dementia Præcox cases and we have at once a hopeless band of 119 accounted for. Thirty are cases of Senile Dementia, who came to us in spite of a determined effort to cut down the number. Of course these were incurables; six imbeciles and six epileptics swell the numbers to one hundred and sixty-two. To make up the total of one hundred and eighty-six it is merely necessary to refer to the headings of pre-senility, arterio-sclerosis, etc.

For fear that the prognosis of Dementia Præcox has been made too unfavorable, we may transfer the catatonics to the "curable column," thus getting a total of seventy-eight favorable cases admitted during the year. The recoveries carefully classified amounted to forty-six, in other words the recovery rate based on our admissions, which could properly be styled as suitable ones for treatment was fifty-nine per cent., a shewing that proves how amenable to treatment certain varieties of insanity are.

I am quite satisfied that under conditions which would exist in the psychiatric hospital that proportion even in these cases would have been larger, so much does the psychological element enter into treatment. That element can only be supplied when the nursing-staff is large enough to allow individual treatment. Of course large hospitals for the insane will always be demanded. Our great hope is that when through the establishment of Psychiatric Clinics, where the problems underlying the cause of many forms of insanity have been worked out, preventive medicine will enable us to head off many of the disasters which at present overwhelm those predisposed to a mental break-down. This position is not chimerical, nor is it one without hope.

As a matter of fact the treatment of favorable cases is far more successful to-day than it was twenty years ago, but it is impossible to look for the best results to be attained until the conditions are made ideal. Why should not an insane person in the early stages of disease be given at least the same chance that the general hospital patient receives? Nothing more, nothing less is asked for in the equipment of a Psychiatric Clinic. An expenditure of seventy cents per diem is not regarded as an extravagant item for the hospital patient; it would be looked on as outrageous in a hospital for the insane, and yet the demands for both care and nursing in the acutely insane are more urgent than in the other cases.

Until we separate the acute from the chronic and provide treatment for the class the hospital physician rarely sees except in consultation, our results will not be the best that might be attainable. In other words hosts of incipient cases of insanity receive no suitable treatment at the most critical period of their disease. This is not a reflection on the physician who attends them. He is powerless, first through want of proper facilities for the treatment of such a case in a private home; second, is the rooted aversion of friends to the very name Asylum, because even Acts of Parliament cannot change the habit of the general public in styling Hospitals for the Insane "Asylums." The name, innocent in itself, has become detestable, and try to gloss it over as we may the idea of having to live in close association with those suffering from chronic mental disease is repulsive to any who have the hope that their friend will recover. Even those of us who have lived the greater part of our lives among the insane never get over the tragedy that faces us on every side—as time goes on this feeling deepens. We, too, are keenly alive to the sensitiveness of the friends regarding what they believe to be the degradation of such association. Of course this feeling should not exist, but it is present, and one would be callous indeed if he did not sympathize deeply with those who have it.

From the foregoing remarks it will at once be seen that the whole question is

not decided when the percentage of recoveries to the total admissions is figured out, but the real question is, How many of the chronics admitted might have been saved had proper hospitals to which they could have gone, been provided at a stage when treatment was possible? When society has further advanced and people are willing to realize the great importance of the recognition of the danger signals in connection with the child whose heredity and constitution make him a likely subject for mental disease, something more in the way of prevention will be done. It is almost too much to hope that the time will come when education will make the world at large understand the part that heredity plays in the transmission of tendencies not only to mental diseases, but also other diseases.

In the meanwhile we must deal with problems that are quite practical at the present time, and look at such questions as that of recoveries in Hospitals for Insane, from the broadest standpoint possible, and must ask not only how many of the admissions recovered, but also how many more would have recovered under better conditions, as well as how many of the chronics received would have been saved to the country had facilities existed for their early detection and treatment. Because the most intricate problems in medicine, namely, those of psychiatry, have not yet been solved, it is no reason why we should stand idly by, waiting for others to discover the reason why. As a civilized and broad-minded community it is our duty to aid science in the investigation of these questions, as well as the duty of the State on humanitarian grounds, as well as for social and economical reasons, to aid in the work.

Heredity.

As has been intimated elsewhere the part heredity plays in the development of insanity is a most important question. I fear the tabular statement attached to this report will not add much to our knowledge of the subject, and yet some such table is necessary if we are to reach just conclusions. No doubt as time goes on we shall be able to accumulate knowledge of real value, but the present method of acquiring information on the part heredity plays is not satisfactory. That it is a tremendous factor in the development of insanity is apparent, possibly a greater factor than has been suspected, but unfortunately the statistics regarding it have always been compiled in the loosest way possible. What we must aim at is scientific accuracy with an attempt to correlate the facts ascertained. For example, because we find two cousins insane we must not at once jump to the conclusion that the insanity is hereditary, and yet this is the ordinary process of reasoning adopted. Until a thorough sifting of the facts at hand is made, no opinion of any worth can be arrived at, and because an analysis of the true bearing of the figures given this year is not possible with the data furnished, the table cannot be considered of much worth. Physicians are to a great extent to blame, as in many instances they regard the questions asked in the "form of application" as unnecessary and uncalled for. Then again friends persistently dodge the telling of family secrets, especially when they have to be recorded in a public document.

Immigration of Defectives.

During the last year a great deal of criticism has been offered regarding the facts and figures set forth in last year's Annual Report, and also in the July, 1908, Bulletin, in respect to the number of defectives being brought to us from the Old World. It has been suggested that we have magnified the evil, and have been unfair

in drawing conclusions from the data at hand. Unfortunately the gravity of the situation has not been magnified, and it is not going too far to say that we, of all others, are in the best position to appreciate that the dangers to be expected from the importation of mental defectives. The bare facts are suggestive enough; an analysis of them makes us marvel at the complacency of those who calmly accuse us of a want of patriotism in decrying certain kinds of immigration from the old country. No matter how figures may be twisted by the pseudopatriotic enthusiast, when building up beautiful philanthropic plans which are to enable the slum weakling to shake off the stigmata of degeneracy in the free air of the prairies, or in the forests of the north, yet facts based on experience must prove in the end a far safer guide than finely spun theories, which are founded on sentiment rather than common sense. As has been pointed out before, and this cannot be too often repeated, much of the success of a nation will depend on the quality of the stock from which it springs, and any one who has time to investigate the results of the early immigration to Canada will learn something of interest concerning the possibilities and probabilities of the new immigration. Investigation into the antecedents of certain early settlers will show that it would have been wise to scan closely the possibilities even in the days when settlers were far more essential to the success of Canada than now. A recent writer who was active in imposing on Canada one of the biggest burdens in the way of alien population that we have to carry says, "Canadians, with patriotic selfishness that is not admirable, often ask why they should have the uplifting of inferior races—why should not Europe cure the people Europe has spoilt? Is it not rather wiser for a nation to share in the task of uplifting humanity rather than to try to maintain an exclusive virtue, limited by a political boundary, and safeguarded by deliberate selfishness?" This kind of sophistry has been employed even by Canadian writers, but while it may be comforting to those who have pangs of conscience regarding a manifest injury they have done to our nation yet it does not help us in our time of trial. We should not forget that there is more than a germ of truth in the Biblical statement: "for they have sown the wind, and they shall reap the whirlwind."

A brief perusal of the criminal annals for the last year or two will give some idea of the harvest we are already beginning to gather. Murders committed by epileptics shipped out as "nuisances"; several murders by low types of foreigners; a wife-beating tragedy, unique in our history—and so the story goes. Do not the figures on gaol population, furnished by Inspector Armstrong last year, speak for themselves? But without dealing in generalities let us see how things have been with us in the Toronto Hospital for the Insane in the last twelve months, a period during which immigration has fallen off, and inspection is said to have been far more rigid than formerly. Of two hundred and fifty-eight patients admitted to this Institution, no less than one hundred and sixteen were born outside of Canada; that is 44½ per cent. If that proportion had been 18 or 20 per cent., it would have been normal, but the startling fact is in connection with the nationality of admissions, no less than 65 of these being English, 13 Irish, and 10 Scotch; 15 came from the United States, the immigration from that country now being an important factor in the increase of population. Other countries account for thirteen, thus shewing that the immigration requiring the most careful scrutiny is that from the British Isles, especially that coming from cities, in the slums of which degeneracy and crime find a suitable soil for development. Forty-six of the admissions had been resident but a brief period, and no less than thirty patients were deported during the twelve months. If the Immigration Act had been a little broader in its provision and made the residence rule extend to three years, the number to be deported would

have been larger. We would suggest a residence rule of four years as advisable, as this would enable us to weed out defectives pretty thoroughly, as well as discover those whose former history cannot be learned at the time of landing.

It is a common experience to find that a patient admitted has had an asylum residence in the old land and has emigrated to get away from the history of this thing. One has deep sympathy for the sufferers, but after all should sentiment sway us when dealing with a subject that means the very life of a nation?

An analysis of the admissions proves most strikingly the importance of carefully scrutinizing those who come to our shores.

How some of them can pass any thorough system of inspection is a mystery; the general paretics, the precocious dement, the obvious degenerate all slip by and reach us in a surprisingly short time. Surely it would be wisdom and good economy on the part of the Federal authorities to have some of their medical inspectors trained in psychiatry. Even a mere tyro in the study of psychiatric problems would be able to detect the weak spots in many of those who at present safely run the gauntlet of port of arrival inspection.

The importation of boys and girls of distinctly defective type should be absolutely discouraged. Our experiences with these weaklings make us realize how great a menace they are, and how careful we should be to have a thorough examination of their antecedents made before admitting them. Better still would be to exclude them altogether, and when I say this I voice the opinion of many of those who have had to deal with these questions practically.

The following press despatch from England shows that the Old Country authorities are beginning to wake up to the fact that we are capable of thinking and acting for ourselves. I do not agree though with the conclusions of the magistrate in regard to the valuable experience the boys would receive. If they are of the type we suppose them to be, it is simply cruelty to expose them to unnecessary strain and hardship:

DEPORTING EMIGRANTS.

British Magistrate Thinks it not to Credit of Canada.

Canadian Associated Press Despatch, London, February 5th.

Before signing a declaration necessary in connection with the emigration of eight boys to Canada from Oldstreet, Magistrate Biron said he did not doubt it would be a good experience for the boys, but there was no guarantee that they would not soon be sent back here. He referred to the Oshawa deportation case, and said such a proceeding was not good for prospective emigrants or the credit of Canada.

Scientific Work.

The scientific side of psychiatry has been carefully developed. All the staff have taken a keen interest in the developments of modern medicine, and the laboratory results, as well as the clinical studies, have been very encouraging. It is plainly apparent that in the near future the biological student is to have his innings.

Unfortunately the work has been hampered and somewhat retarded by the many changes which have taken place in the personnel of the staff. Some of the results of the work accomplished will be detailed in forthcoming Bulletins,

others must necessarily be held in reserve until time has demonstrated the soundness of the conclusions arrived at.

Changes on the Staff.

As usual I have received the heartiest support from the officers and employees, and have had little fault to find with those who have helped me in carrying on the work.

Many changes took place, not only among the officers, but among the attendants. This is necessarily a restless time in this growing country, and the salaries paid attendants are so small that few young men of enterprise care to waste their time in institution work. This means, too, that it is scarcely possible to get male attendants who care to take a course in a Training School.

Dr. W. K. Ross, Assistant Superintendent for many years, was transferred to Hamilton Asylum. No more popular or efficient officer is connected with the service.

Dr. J. G. Fitzgerald, Pathologist, whose enthusiasm and devotion to scientific work will entitle him to a prominent place in due course, left us to pursue his studies in the Pathological Department of Harvard Medical School. He has been succeeded by Dr. Ernest Jones.

Dr. W. T. Wilson, Assistant Physician, became Superintendent of Cobourg Hospital for Insane, after several years of faithful and intelligent service. His promotion was gratefully received as marking the beginning of an era when efficient work will be regarded as the qualification for promotion.

Various Internes received well earned recognition, and have, I am certain, reflected credit on the Training School from which they graduated. Dr. W. Young became Assistant Physician at Rockwood Hospital, Kingston; Dr. J. Thompson, Assistant at Taunton, Mass.; Dr. J. Campbell, Assistant Physician, Toronto; and Dr. Galbraith, Assistant Physician at the Protestant Hospital for Insane, Montreal.

Dr. W. C. Herriman succeeded Dr. Ross as Assistant Superintendent.

Miss Marion Bethune, Trained Nurse, left the service at the end of the year. The excellent work she did in organizing the Training School and other branches of nursing will leave its impress on the staff for years. As a nurse she was indefatigable, and as an instructor she was unusually successful.

Miss E. M. Corley, Matron, who had spent many years in this Hospital in various capacities, was transferred to Orillia. She left a host of admirers and warm friends. Her place has been filled by the transfer of Miss Gibson from the Eastern Hospital.

Gentlemen,—In closing I must congratulate you on your efforts to establish the service on the most efficient basis possible, and a brief persual of your report will prove to the public that you are keenly alive to the fact that this is an age of progress.

I have the honor to be,

Sirs,

Your obedient servant.

C. K. Clarke,
Medical Superintendent.

ANNUAL STATISTICAL REPORT OF THE OPERATIONS OF THE HOSPITAL FOR INSANE, TORONTO, FOR THE YEAR ENDING DECEMBER 31st, 1908.

TABLE No. 1.

HOSPITAL FOR THE INSANE, LONDON.

ANNUAL REPORT OF THE MEDICAL SUPERINTENDENT FOR THE YEAR ENDING DECEMBER, 31ST, 1908.

To S. A. ARMSTRONG, ESQ., and E. R. ROGERS, ESQ.,
Inspectors of Provincial Hospitals for Insane.

GENTLEMEN,—I beg to submit for your approval the thirty-seventh annual report of the Hospital for Insane, London.

On the 31st day of December, 1907, there were in this Hospital 511 males and 545 females, or a total of 1056 patients. There were admitted during the year 1908 by warrant, 37 males and 16 females, by medical certificate, 73 males and 77 females, or a total of 203 patients, an increase of 27 over 1907. There were discharged during the same period 20 males and 6 females as recovered, 22 males and 21 females as improved, 1 male and 1 female as unimproved, a total of 71 discharges. The deaths numbered 71; 3 were deported; 1 eloped, and 12 were transferred to other hospitals in the Province. We have remaining in the hospital on the 31st of December, 1908, 540 men and 563 women, 1103 patients in all, an increase of 47 during the year.

RECEPTION HOSPITAL.

The most important of the year's work was the establishment of a Reception Hospital where all cases could be placed immediately on admission. Previous to the establishment of this Hospital we were obliged to place these patients in the chronic wards wherever, by chance, a vacant bed could be found. There were no specially trained nurses in these wards, and no facilities for any special treatment such as many acute patients require. The surroundings could not be made attractive and it was impossible for the medical staff, as a whole, to keep in touch with the recent cases. The effect on the patient when he was able to judge of his surroundings must have been most depressing. With the establishment of the Reception Hospital all is changed. The patient is immediately placed in a bright, handsome, well-furnished and well-ventilated building. The rooms are not crowded, nurses are well trained and attentive, and all his surroundings are those of a well conducted General Hospital.

The Assistant Superintendent, Dr. Forster, has entire charge of these patients, but every member of the medical staff visits the Hospital daily and watches every development which takes place. In addition to this, every patient is presented at one of the regular conferences of the staff, which are held three times a week. When it is determined that further Hospital treatment is not required, the patient is sent to some other ward of the Institution. We are thus enabled at the very beginning of the patient's Hospital life to give him the best available medical and nursing skill. The results of this new department have thus far been most encouraging, as a fair portion of our patients have been able to return to their homes without ever seeing the chronic wards or mingling with the chronic patients.

We are fortunate in having a building specially adapted for our purpose, built about six years ago as a hospital for medical and surgical cases. These cases, however, occupied only a very small portion of the building, and it gradually became filled with chronic patients. The removal of these patients to other suitable wards

was accomplished about the beginning of April, since which date every new patient has been placed in the Reception Hospital.

A complete system of hydro-therapeutic appliances has been installed. This includes six continuous baths, the needle, circular and rain sprays, the Scotch douche, the perineal douche, a shampoo and massage table, hot air cabinet and pack beds. All the work connected with the installation of this rather complicated apparatus has been done by our mechanics. The tiling of the bathrooms and the marbling of the douche room has been well done by our mason, and the engineering staff have completed the plumbing in a most satisfactory manner.

We have fitted up in the basement a dark room for ophthalmoscopic work, and also a very well equipped laboratory with the apparatus necessary for urinary analysis, examination of the blood, spinal fluid, sputum, etc.

Chronic Wards.

These wards have been over-crowded to some extent, owing to the increased number of admissions. The only relief we could find for this condition was to keep the patients in the open air as much as possible. At certain periods of every fine day the wards are completely emptied, with the exception of a few infirm or bedridden patients.

Many of these chronic patients are employed in the various occupations connected with the working of this Institution.

The early training of the chronic patients in useful and productive work has a two-fold advantage. In the first place, if all the work of an Institution, such as ours, was done by paid labor, the cost to the Province would be a very great burden. The second and most important advantage is the great benefit derived by the patient from regular work. The patient who is constantly employed deteriorates to a much less extent than the patient who cannot work. The higher class of work he can be taught to do, the more he improves. The utilization of the immense amount of latent energy which is to be found in every Hospital for Insane is a problem worthy of the greatest consideration, and is second only, both from an economic and medical point of view, to the curative treatment of the acute insane.

Religious Services.

Our thanks are due to the clergymen of the city who conduct services in our chapel each Sunday morning, and who at all times are most active in attending to the spiritual wants of our patients. The Sunday services have been rendered more attractive by the music supplied by our orchestra.

Our thanks are also due to the clergymen of St. Peter's Cathedral who conduct service every alternate Sunday afternoon for the benefit of the Roman Catholic portion of our community.

Amusements.

The weekly dance still continues to be the most attractive entertainment for our patients. In addition, a number of concerts have been furnished by various musical societies belonging to the city, which have been a source of enjoyment, not only to the patients, but also to the members of the staff.

Bowling, cricket and football form splendid sources of amusement during the summer months for both patients and attendants.

We are urgently in need of a skating and curling rink in order that patients, nurses and officers may have suitable exercise during the long winter months.

Trees.

During the year a beginning has been made in thinning out the shade trees, which are abundant in all parts of our grounds. These trees have grown so rapidly and are so over-crowded that few perfect specimens are to be found. Prof. Hutt, of the O. A. C., and Mr. Pearce, Superintendent of Parks, London, very kindly gave us the benefit of their advice and experience. Already, upwards of two hundred trees have been taken out and many more are marked for removal when time permits.

Water Supply.

The most important outside work during the year was the laying of some 5,000 feet of new water main at an average depth of about seven feet. This work was satisfactorily accomplished by patient labor under the direction of our chief engineer without the slightest accident.

That it was urgently required was shown by the fact that we were face to face with a water famine before the work was completed, the reservoir being completely emptied.

Improvements.

During the year a great deal of work has been done by our staff of mechanics in keeping the building in a proper state of repair, such as remodelling the east greenhouse and installing a new heating apparatus, installing new heaters in the Hospital and laundry, new machinery in the carpenter shop, a steam carving table in the kitchen; a Jones underfeed stoker was also installed in our main boiler house which has largely decreased the consumption of coal and almost completely done away with the thick black smoke which formerly issued from our chimneys.

One thousand dollars was appropriated last session for the purpose of painting the exterior of the Main Building. This work was done by day labor, assisted by our staff of painters, and the amount of the appropriation proved sufficient not only to do the work originally intended, but also to paint the exterior of the kitchen, amusement hall, engine-room, boiler house and bakery. The interior of the amusement hall was also redecorated out of the same appropriation. All this work was urgently needed, and would have cost 75 per cent more. if let by contract in the ordinary way.

Dairy.

During the early part of the year it was thought advisable to apply the tuberculin test to our entire dairy herd, with the result that about 20 per cent. reacted to the test. The animals which reacted were slaughtered under the supervision of a Dominion Government Meat Inspector, and all showed evidences of tuberculosis in a greater or less degree.

Apparently one great cause of tuberculosis is lack of ventilation, overcrowding, and unsanitary condition of stables. It is our intention during the coming year to remodel our dairy stables so as to overcome some of these defects.

A daily test of the quantity of milk produced by each cow was commenced on May 1st, and during the eight months it has been in operation it has proved to be

most instructive and interesting. As a result of this test a large proportion of the herd has been discarded. Every cow producing less than 6,000 lbs. of milk yearly is marked for the slaughter-house. We are gradually filling up the herd with Holstein grade cows, which thus far have been most satisfactory as milk producers.

Farm.

The farm, as usual, continues to produce most bountiful crops. It has by years of careful farming reached a high state of fertility.

Sewage Farm.

Our sewage farm, after many years' operation, continues to perform its work of sewage purification in a very satisfactory manner and without creating the least nuisance. Between the trenches garden produce of all kinds grows most luxuriantly, and probably no more productive piece of land can be found in the Province of Ontario.

Staff.

I must express my high appreciation of the great service rendered me by the Medical Staff. At all times enthusiasm and energy have characterized their actions, and the utmost harmony has prevailed in every branch of the service. No change has taken place in the staff during the year, but on Jan. 1st Dr. Clare leaves here to assume the position of Assistant Superintendent at Mimico. While keenly regretting the loss of his valuable services, we must congratulate Dr. Clare on his well-merited promotion.

The attendants and nurses continue to perform their duties in a very satisfactory manner, and we are fortunate in having as heads of our various departments men of sterling worth and character.

My thanks are also due in a special manner to the Inspectors who so readily co-operated in everything which tended to improve the condition of our patients.

I have the honor to be,

Your obedient servant,

W. J. Robinson,
Medical Superintendent.

ANNUAL STATISTICAL REPORT OF THE OPERATIONS OF THE HOSPITAL FOR INSANE, LONDON, FOR THE YEAR ENDING DECEMBER 31ST, 1908.

TABLE No. 1.

Showing movements of patients in the Hospital for the official year ending December 31st, 1908.

	Male.	Female.	Total.	Male.	Female.	Total.
Capacity of Hospital	511	555	1,066			
In Residence, 1907				511	545	1,056

HOSPITAL FOR INSANE, KINGSTON.

Annual Report of the Medical Superintendent for the Year Ending December 31st, 1908.

Messrs. S. A. Armstrong and E. R. Rogers, Toronto.

Sirs,—I have the honor to enclose the report for Rockwood Hospital for the year ending 31st December, 1908 .

The number of patients treated annually at Rockwood is gradually increasing. The admissions last year were 119. Ten years ago the admissions were 79. The average admission rate for the past ten years was 108. I am not saying this indicates that insanity is increasing. The improved hospital methods of recent years have led, and will continue to lead, to an ever increasing number who will take advantage of hospital treatment.

There is a public awakening to the true character of the institutions and the work accomplished therein. The period of evolution from the Asylum to the Hospital is passing; for some institutions it has already passed. The last few years have witnessed a remarkable transition: new methods, modern therapeutic agencies, a hospital dietary necessary for the sick, skilled assistants, trained nurses, research work, all bring in their train financial outlay. However economical one desires to be, expansion and advancement mean increased expenditure; so it seems clear that the problem of increased accommodation and increased expenditure is one that must be faced and solved.

The new forms for purposes of classification shew a decided improvement on those formerly in use. They are certainly more in touch with present-day methods and cannot but encourage and stimulate further study and research along the lines indicated.

In many respects this has been a fruitful year, and Rockwood has made some decided advances.

In June, 1908, we inaugurated a more adequate night service in the Hospital. In connection therewith I have pleasure in placing before you the results of our work:

Female Department.

In 1905 the night service of the female department of the Main Building consisted of only two nurses, who had charge of 195 patients. In 1907 another nurse was appointed to the staff, and in June, 1908, the staff was still further supplemented by the appointment of a night Supervisor, in order that there might be more supervision and better facilities for carrying out hydrotherapeutic treatment and nursing during the night.

Heretofore, owing to the small night staff, it was almost impossible to nurse patients requiring special care during the night. Since the staff has been increased, the condition of the patients and wards has very much improved, as evidenced by the lessening of the number of filthy patients, and also the decrease in the destruction of clothing.

On ward 1, in June, 1908, there were two filthy patients, one of whom was an epileptic who only soiled the bed when she had an epileptic seizure. Now there is only the epileptic.

On ward 3, in June, 1908, there were ten filthy patients; now there are four occasionally. One of these was recently transferred from Cobourg Hospital for the Insane, and another is an old woman who has no control over her sphincters.

On ward 5 there were eleven filthy patients in June, 1908; now there are three regularly and one only occasionally.

On ward 7 there were four filthy patients in June, 1908; now occasionally there are two.

All the patients who are in any way inclined to filthy habits are made to get up every two hours during the night. Any patient who becomes filthy is given a warm bath and the bedding changed, sometimes as often as three or four times during the night.

In June, 1908, there was one woman destructive on ward 1; now there is no one.

On ward 3 there were three destructive patients; now there is only one.

On ward 5 there were six destructive patients; now there are two.

On ward 7 there was one destructive patient; now there is none.

The wards are not nearly so noisy as formerly, as any patient who becomes noisy or excited during the night is either given a hot or cold pack or placed in the continuous bath.

The ratio of the night staff in the Female Department in 1905 was one nurse to ninety-eight patients; at the present time the ratio is one nurse to forty-nine patients.

The offensive odor so common in large institutions of this character has completely disappeared from the wards.

Male Department.

The night staff on the male side was increased to the same number and at the same time as on the female wards. We have now four men to 250 patients, a ratio of one attendant to sixty-two patients. The results have exceeded our most sanguine expectations.

In May, 1908, that is, just before the appointment of a night Supervisor, we had an average of twenty-one patients with filthy beds or floors every night. Since the increased help was employed this number has steadily decreased until at present the average number is not more than five; the filthy class is now confined entirely to a very small number of very old men, a few others suffering from organic nervous disease, epileptics with incontinence during seizures, and occasionally a patient in acute mania.

At first it was necessary to arouse some of these patients four or five times during the night, but by persistent training patients who had been filthy every night for years, and even dements regarded by us as most unpromising, have been taught cleanly habits, and few of them now require to be aroused more frequently than once in the night, to prevent a relapse to their former filthy habits.

The increased night help enables us to give nourishment and other treatment during the night, which was not possible under the former conditions. A tendency to be sleepless, restless or noisy is met with a glass of hot milk, a hot or cold pack, or a few hours in the continuous bath. The last named measure is most effectual in quieting a noisy patient, and in nearly every case these patients sleep well after they are removed from the bath.

By the above means our wards are kept comparatively free from noise. During

the past month not more than half a dozen doses of chemical sedatives have been employed among these 250 patients, and in no case were these used on any but very chronic patients.

The beneficial effect of the better night nursing is not confined to the night alone, the day nursing is much more satisfactory than formerly. The various therapeutic measures employed produce better results for the reason that they can be continued, if necessary, during the night, instead of, as formerly, being nullified by drugs.

Our patients are better nourished, the air in our institution is more healthful, there is less destruction of clothing, bedding and other property both by night and by day, and our day staff have testified that their patients are less quarrelsome and more tractable, and that their work has lost much that was very disagreeable since the improved night service was inaugurated six months ago.

An earnest attempt has been made during the past year to mark an advance in the dietetics of the hospitals. With this end in view, meat, milk and eggs and their various food products were freely used, these being the foods most essential in a hospital dietary. Our night service was of great assistance in carrying out the improved methods of dietetics.

I have pleasure in placing before you the practical results of the improved methods: In 1898 the discharges were 43. The average discharges for the past ten years were 60.2. The discharges in 1908 were 78; of these 54 were recovered and 20 decidedly improved and have not returned. This is the largest number in the history of Rockwood Hospital.

The cost at first glance may appear large, but this is far outweighed by the economic gain to the Province in the restoration to industrial pursuits of those treated in the hospital.

The whole character of the institution is undergoing a gradual transformation. The hygienic conditions have improved, the dietary is such as may reasonably be expected for the best care of the sick. Modern therapeutic agencies, under trained nurses and attendants, are employed for the welfare of our patients by night as well as by day. The noise, confusion and excitement of the asylum are being replaced by the order and decorum of the well-regulated hospital.

There is another aspect of the subject that merits consideration. Public confidence in the hospital character of Rockwood is increasing day by day. The profession throughout this district are freely and earnestly directing their patients toward Rockwood in preference to private institutions, even for those who could well afford to take advantage of the latter. For the first time in the history of Rockwood we have patients whose friends are willingly paying more than the statutory demand of $2.75 per week.

Your attention is respectfully directed to the advanced character of the institution from its scientific and scholastic aspect.

Aside from our morning conferences, out of four afternoons each week we devote two hours to the work of the Training School for Nurses and to laboratory investigation.

The Training School for Nurses has thus been brought to a high state of efficiency. On our recent visit of inspection it was a pleasure to recognize the uniform of the Rockwood Training School on many of our graduate nurses on the post-graduate staffs of the hospitals in the city of New York.

The entire afternoon of every Thursday is employed in teaching and clinical demonstrations both in the main wards of the hospital and in the operating theatre.

Lectures are given by each member of the staff, who must be thoroughly prepared for that purpose, to the students of the University. These lectures include the subjects of Psychiatry, Epilepsy and the various Neuroses, and a wide field of clinical medicine. The necessary surgical work is performed in the operating room, and affords a valuable opportunity for the training of our nursing staff in surgical technique.

During the year there have been fourteen autopsies held, a number under the average; but as total deaths have been fewer the autopsy rate remains about as in previous years. A discussion of the findings and summary of each case has been filed, but need not accompany this report.

Twelve examinations of cerebro-spinal fluid obtained by lumbar puncture have been made, all except two being in cases of paresis. It is worthy of note that one case of paresis was examined four times and a lymphocytosis found only on the fourth examination. Two cases of epilepsy were examined for abnormal cellular constituents, change in albumin contents and for cholin, but with negative results. All cases of paresis gave (except as mentioned above) a lymphocytosis and increased albumin content. In all cases the cerebro-spinal fluid was found sterile both by direct and microscopic examinations and by usual culture methods. A more extended series of examinations will now be made, as proper needles have finally been secured.

A further series of swabs were taken from the nasal cavities of a number of male patients, and in all except one diphtheroid bacilli were found after culture. The patient in whom a negative result was recorded had been in the institution but three days. An examination of the tissues of a paretic for these bacilli as invaders has been made, but with negative results. This case, however, died with a terminal staphylococcus infection *via* the urinary tract.

Examinations were made of the blood in seven cases of suspected typhoid, with two positive findings, which corresponded to the clinical course.

Eight sputum specimens were examined for tubercle bacilli, with three positive findings.

Four samples of pus were also specially examined: two for gonococci, with one positive finding, the other being a staphylococcus pus; two for tubercle bacilli, one being positive, the other being a staphylococcus infection.

Special urine analyses were made in a number of cases, among others a morphine habitué with nephritis. In this case there was an abundant albumin (serum albumin) content with practically no casts.

Special blood counts were made also in a number of cases, but none proved of interest except case No. 238, where the hæmoglobin fell to 10 per cent. and corpuscles to 1,000,000 per cb. mm., yet recovery occurred. Uterine hæmorrhage was the cause of this anæmia. These urine analyses and blood counts were special examinations only, and no count is taken of the usual routine urine analyses and blood examinations as recorded in case books.

During the year a number of bacteriological examinations were made of the water from the taps and ward tanks; reports of these are already on file.

Examinations were made of the tissues removed at surgical operations. Amongst these was a leg removed for senile gangrene, showing in the arteries advanced calcareous degeneration of the media and a proliferative endarteritis of the intima of nodular type almost obliterating the lumen. These were present right up to the point of amputation at the knee. The patient recovered.

Another specimen was a limited tubercular abscess sac of upper arm, the cavity

being lined with a pyogenic membrane, a limiting fibrous wall which showed in places much calcareous deposit.

Recently an X-ray, with high frequency attachment, has been installed, that the principles of electro-therapy may be applied. We have not had time as yet to develop the work to our satisfaction. Our next report will contain a more detailed account of our experience.

There have been some changes in our staff during the year. Dr. Herriman, who gave services of a high order, has received the well-merited promotion to the Assistant Superintendent of Toronto Hospital for the Insane. Dr. Young takes his place.

Mrs. McNeil has been promoted to the position of Matron. An opportunity was thus afforded to carry out a long-cherished idea of having all the nurses and all the wards under the direction of a trained and experienced nurse; Miss Graydon has been placed over this service as Superintendent of Nurses, with trained assistants in charge of the various sections.

Many improvements for the comfort and convenience of the patients and staff have been added during the year.

A new conservatory is nearing completion, and this will enable us to make our wards more inviting and also to beautify our grounds.

Our labors here, though arduous, are rendered cheerful by a universal spirit of harmony and good will, all working together for the welfare of our patients, for the advancement of education and for the public weal.

EDW. RYAN.

ANNUAL STATISTICAL REPORT OF THE OPERATIONS OF THE HOSPITAL FOR INSANE, KINGSTON, FOR THE YEAR ENDING DECEMBER 31ST, 1908.

HOSPITAL FOR THE INSANE, HAMILTON, ONT.

Annual Report of the Medical Superintendent for the Year Ending December 31st, 1908.

Sirs,—In accordance with the Statutory requirement I beg herewith to submit the thirty-third report of this Hospital for the year ending December 31st, 1908.

Our admissions for the year were 168, and discharges from all causes 135; and thus. as our population at the first of this period was 1,113, we closed the year with a total population of patients of 1,146.

Changes in Staff, Etc.

Much to the regret of the many patients under his care, and his friends throughout the city, the Assistant Superintendent, Dr. Frank Beemer, resigned from the service at the end of the year. His place is now being ably filled by Dr. W. K. Ross, previously of the Toronto Hospital.

Early in the year, D. McCarthy, who since May, 1885, had been storekeeper, resigned and was succeeded by J. J. McGannon, of Morrisburg, who has taken up the work earnestly and has ably and efficiently filled the position. However, if our population and work continue to increase as they have recently it will be necessary to give him a qualified clerk.

After over eight years of efficient and faithful work as stenographer and typist, Miss Annie Kelly, of Norwood, resigned owing to ill-health.

The usual change in the staff of nurses and attendants has taken place, but I have been enabled to secure excellent substitutes.

Deportations.

Five men and one woman have been deported, and we have several more eligible if accurate information was available.

Work Done During the Year.

A new four-section cold storage building has been erected, adjacent to the Main Building Kitchen by our own staff, and I am pleased to say that it is giving entire satisfaction.

A local telephone system connecting the several buildings and halls, also residences, barns, etc., and including some 34 instruments has been installed and is proving a great convenience.

We have been enabled to almost complete the erection of a Pavilion for the especial use of those unfortunate patients suffering from pulmonary tuberculosis, but will require a considerable sum to equip it. A brief description of the building may be advantageously given. It is built of frame, is two stories in height and contains two airy wards 20 x 32 feet, with southerly exposure. As much glass as possible has been placed in the walls in order that the sunlight may flood the halls at every hour of the day. Surrounding the lower ward will be a cement-floored verandah, properly guarded, on which, if necessary, the patients may be placed both day

and night. For the upper flat a verandah 12 x 16 feet is all that could be provided. Meals for the patients of the shack will be sent from the Reception Building, and we trust that at no distant date we may be enabled to erect a covered passage-way therefrom.

Much outside work has been done by our mason, engineer, carpenter and painter.

A 21 x 150 ft. addition was made to our skating and curling rink, which will add much to the pleasure of these sports.

A stone foundation, 110 x 36 x 6 ft. has been laid under the old rink, and we hope during the coming summer to complete the building for a bowling alley, as suggested last year.

Besides the removal of the entire plumbing in East House, the whole interior has been painted, and this is now one of my most comfortable and up-to-date buildings.

New water mains have been laid to the bursar's and engineer's houses, the rinks, the officers' stables, and also to the prospective Reception Building and Tuberculosis Shack. In laying that to the Reception Building large leaks were found in the corroded supply pipe which undoubtedly allowed such a waste of water that by the saving effected the entire cost of the new main will be paid for in a few months.

The mountain sewer has been wholly renewed in iron 12-inch piping and is working thoroughly efficiently. In its construction several leaks were discovered in the sewer, allowing large amounts of sewage to flow down amid the crevices of the rocks, and crop out at many points along the mountain face. In fact, just at the brow a stream the size of a man's fist was unearthed at the side and immediately below the sewer pipe. In all some 600 ft. were laid, and though the work along the face of the mountain was at times most difficult and arduous, yet I am pleased to report that no serious accident of any kind occurred and that an excellent job was done.

The weekly killing of hogs has supplied us with an acceptable variation of meat for the patients, and to facilitate the work of the butcher we have laid some 250 ft. of steampipe within a glazed tile from the engine-room at the farm barn to the slaughter-house, and we can now have quickly prepared an adequate supply of boiling water.

Dairy Herd.

We have purchased a young thoroughbred Holstein bull of average record, and three thoroughbred heifers, the mothers of which showed exceptionally large milk records, and hope that in a few years we may have a Holstein herd unexcelled by any in the district.

Many excellent grade Holsteins have also been added to our stock and to replace those sold for beef.

Requirements.

An additional silo is greatly needed, as the present one is entirely too small to contain all the green corn we grow, and will not meet our requirements for the whole season.

A milk room at the Dairy barn should be provided in order that the milk may be strained and cooled in a place entirely separated from the stable in which the animals are housed and fed

Again I desire to draw your attention to the Amusement Hall, which is wholly

inadequate in size to meet the demands of our increasing large population. The work of construction could, to a large extent, be done by our own staff and patients.

An addition to the laundry is very much needed, and we have made a start in this regard by excavating a new engine-room to receive the new engine recently purchased from the Incline Railway. We estimate that $2,000.00 will provide all necessary material.

Verandahs for the wards of the Main Building are greatly needed, and their construction should be undertaken before another year passes by.

The reconstruction of our present pig-pen is urgently required, as the wooden divisions and yard fences are in a very bad state of repair, and the building is wholly inadequate to hold our large number of hogs. We have on hand the necessary lumber, stone, etc., on the spot, and purpose as soon as spring opens to construct the foundation for a 250 ft. building and move the present frame super-structure from the valley in which it now is situated to an adjacent hill, and add 100 ft. thereto and fit it up with cement floors, troughs, etc., and thus be enabled to keep the premises in a much more sanitary condition.

I also again desire to draw your attention to the advisability of erecting houses where 500 or 600 hens may be kept, and an endeavor made to supply the Hospital with eggs and poultry.

Plumbing.

The entire closet system of the Reception Building and Orchard House and a portion of the Main Building should be replaced, as the apparatus is worn out, and is a menace to the health of the occupants.

Long-Distance Telephone.

We have only at present three instruments on this service—two in the Main Building and one at the Superintendent's house, and for the convenience of our staff the service should be extended at least to Orchard House, East House, and the prospective Reception Building, and an exchange be established adjacent to the present local one, and an additional wire be put in from the city central office, as the present one is wholly inadequate to meet the increasing business calls.

Assistant Physician.

As our population continues to increase and our accommodation likewise, some twenty-three beds being added during the past year, it becomes more and more evident that our professional staff *must* be increased, if we are to be enabled to pay the individual attention required to work up the histories and observe the actions of our patients.

The conferences of the staff have been regularly held two and three times a week, and many interesting and instructive cases have been presented, but it has been absolutely impossible to work out and fully discuss all those admitted during the year.

The prospective purchase of additional farm land will permit us to raise all the grain required for chop for our dairy cattle and hogs, as well as providing more roots for the stock and vegetables for the patients; it will also give us adequate pasturage for our cows in place of thirteen acres only, which were at our service during the past

season. Likewise we will be enabled to get an additional supply of apples from the excellent orchard thereon, as well as a considerable amount of spring water, and in a year or two, after a suitable pond is made, our yearly ice supply.

Heartily thanking you for your ever ready assistance and advice,

I have the honor to be,

Sirs,

Your obedient servant,

W. M. ENGLISH.
Medical Superintendent.

To S. A. ARMSTRONG, ESQ., AND E. R. ROGERS, ESQ.,
Inspectors, Hospitals for the Insane,
Parliament Buildings,
Toronto, Ont.

HOSPITAL FOR INSANE, MIMICO.

ANNUAL REPORT OF MEDICAL SUPERINTENDENT FOR YEAR ENDING DECEMBER 31ST, 1908.

To S. A. ARMSTRONG, ESQ., AND E. R. ROGERS, ESQ.,
Inspectors of Hospitals for the Insane, etc.

SIRS,—In accordance with the requirements of the Statute, I have the honor to submit herewith the fourteenth annual report of this Hospital for the year ending December 31st, 1908.

——	Male.	Female.	Total.	Male.	Female.	Total.

Total leaving institution during year	.....	.....	.....	86	47	133
Remaining in Hospital, December 31st, 1908	.....	.....	.....	304	311	615

ADMISSIONS.

One hundred and twenty-nine patients were admitted during the year, seventy-one men and fifty-eight women. Of this number thirty-eight were reported to have been ill less than two months prior to admission, while on the other hand fifty-four were already chronics, and had a record of being ill over a year before admission. Sixty-five of the total number were under forty years of age when admitted, while twenty were over sixty, six had passed the age of seventy, and one had attained the age of eighty-three years. Sixty-five of the total number admitted were single and sixty-four were married, while of those who were single forty-four were men and twenty-one women; and of those who were married, twenty-seven were men and thirty-seven were women.

Of the total number admitted, thirty-two were discharged recovered and seventeen improved, during the year.

Discharges.

Sixty-seven patients were discharged during the year, forty-three men and twenty-four women. Forty-one of this number were under forty years of age while only three were under twenty years. Of this total number fifteen patients were deported by your department, some of whom had improved under treatment, but all of whom distinctly belonged to the degenerate and defective class, which, if not deported, would have become a permanent burden to our public institutions.

Deaths.

During the year there were thirty-four deaths in the institution, twenty-two men and twelve women.

Three of these deaths were due to epilepsy and three to tubercular disease, while four died from exhaustion of acute mental diseases, and nine from senility and the exhaustion incident to mental diseases of old age.

Of the total number of deaths four were between fifty and sixty years old, eight were between sixty and seventy years, three were between seventy and eighty years, while three were over eighty years of age.

Extension to the Boiler House.

The boiler house in this institution was originally too small for the accommodation of the heating plant; it was also very poorly lighted and poorly ventilated, and has always been in every way inadequate to the needs of the place. Some of the old boilers which were installed on the low pressure system at the opening of the institution had become worn and unsafe for continued use, and last year two new larger high pressure boilers were purchased to replace the most unsafe of the old ones. In order to make space accommodation for these new boilers and others of the same type which will, in the near future, be added to them to replace other worn-out old boilers, it became necessary to enlarge and reconstruct the boiler house itself. This work of the extension of the boiler house was undertaken by the management under the direction of the Public Works Department, and was performed by institution labor. As soon as the frost was out of the ground in the spring the excavation was commenced, and when completed the mason began putting up the walls of the new structure. The new building is sixty feet long and twenty-two feet wide; the roof is provided with sky-lights and ventilators and the windows in the walls are made large so that the space in front of the new boilers is now well lighted and ventilated. While the carpenter had immediate charge of the construction work, the changing of the boilers and the rearrangement of the steam pipes was under the direct supervision of the engineer.

Engineer's Department.

The work of reconstruction in this department independent of the installation of the two new boilers has been extensive and important.

The old turntables and iron tracks in the subways which carried the trucks for the delivery of food from the kitchen to the cottages, had in many places become worn and almost useless through age, and have in a large measure been replaced by new and more durable ones. A large iron carriage has also been constructed by the engineer for conveying coal from the vaults to the boiler house, and scales have

been so placed that the coal thus conveyed can be conveniently weighed before being used.

The old lavatories in the men's cottage, which were formerly provided with an obsolete type of insanitary automatic closets, have also been reconstructed and furnished with a more modern and efficient equipment.

Carpenter's Department.

The work in this department, besides the construction of the addition to the boiler house, has also been very extensive. New store-rooms for patients' clothing have been fitted up in all of the women's cottages, and the verandahs of all the front cottages, which had become unsafe through decay, have been repaired and put in good condition. Besides the usual repairs to furniture which, during the year, amounts to a large item, a good deal of work has been done on the interior of the cottages and the administration building.

Farms and Gardens.

The crops at the two farm properties have been a fair average, though the dry weather occasioned a shortage in the yield of potatoes; the other roots, however, and the hay and oats were good, and the products of these will probably be sufficient for the needs of the institution. The crop of garden vegetables has been somewhat lessened also, by reason of the weather, though a generous supply has always been available for use.

Spray Baths.

Several years ago spray baths were installed in Cottages A and B, and No. 1 and No. 2, and they have been found to be so satisfactory that it was desirable to introduce this system in the other cottages. During the past year Cottages Nos. 3, 4 and 5 have been furnished with these baths, so that now all the cottages for women are supplied with them. The preparation for the introduction of this system of baths has involved a large amount of labor for the engineer, carpenter and mason, but the work was important, and of great sanitary advantage to the patients.

Continuous Baths.

Cottage No. 2 on the women's side, which is temporarily used as a Reception Cottage, is now being equipped with two continuous baths, and the material is on hand and the work is now progressing for a similar equipment in Cottage B, the corresponding cottage on the men's side of the institution. The completion of this work will provide the institution with hydrotherapeutic facilities which have been much needed.

Opening New Road.

Last year permission was obtained from the Etobicoke Township Council for the closing of the road between the McNeil farm, on the west, and the property on which the cottages are situated. In order to secure this concession it was arranged with the council that a new road should be opened from the Lake Shore road southward to the lake along the western boundary of the McNeil farm. This has been accomplished during the past year, and fences have been put up on either side

of the new road allowance; and now that the whole property at this place is consolidated into one lot, greater convenience and protection will be afforded the institution.

Reception Ward.

At the present time the greatest need of this institution is a properly constructed Reception Ward for the observation and treatment of those who suffer from acute mental illness. The excellent work done at the Hospitals at London, Hamilton and Kingston, where such Reception Wards are now provided, will furnish ample evidence of the advantage which would accrue to the acute patients at this Hospital with equal facilities. With the Reception Ward will naturally come all the modern scientific equipment for management of these acute cases; it will be the appropriate home of the Training School and the trained nurse; and it will afford convenient accommodation for the establishment of a laboratory for the further investigation and study of the pathological side of the subject.

Religious Services.

The regular Sunday morning services have been conducted as usual by the resident clergymen at Mimico, namely, Rev. Canon Tremayne, Rev. Mr. Wilson, and Rev. Alex. McMillan, and to them and to Rev. Father Walsh the institution acknowledges its obligation.

Staff.

Among the changes on the staff during the year was the transfer of Dr. Forster, Assistant Medical Superintendent, from this place to a similar position at the London Hospital, and the promotion of Dr. Herriman from the Rockwood Hospital to fill the vacancy here. Dr. Forster had been Assistant Superintendent at this place since July, 1902, and had given to the work here a high degree of zeal and devotion, which were the outcome of a wide and rich experience.

Mr. Walter P. Sturt, who had filled the position of Bursar's Clerk since October, 1894, died here last May after a long illness. Mr. Sturt was an excellent public officer, attending to his special duties quietly and efficiently, and promoting harmony and concord among his fellow officers by his uniform cheerfulness and consideration for those about him.

One of the most regrettable accidents which could occur in connection with hospital life has just taken place here, and has robbed the institution of one of its oldest and most valued servants. On the 19th of December, Mr. Boulton, the farmer, was engaged in his usual duties in one of the farm buildings along with several patients, when one of them who had lived at the farm cottage and worked with the farmer during the past fifteen years, suddenly, and without warning, struck Mr. Boulton with a fork he was using, inflicting such injury that a fatal result followed. Mr. Boulton was esteemed by all who knew him as a man of unusual intelligence, unswerving and unsurpassed devotion to duty.

I have the honor to express my appreciation of your counsel and support during the past year.

I have the honor to be,

Sirs,

Your obedient servant,

N. H. Beemer.

ANNUAL STATISTICAL REPORT OF THE OPERATIONS OF THE HOSPITAL FOR INSANE, MIMICO, FOR THE YEAR ENDING 31st DECEMBER, 1908.

HOSPITAL FOR INSANE, BROCKVILLE.

ANNUAL REPORT OF THE MEDICAL SUPERINTENDENT OF THE HOSPITAL FOR THE INSANE, BROCKVILLE, FOR THE YEAR ENDING DECEMBER 31ST, 1908.

BROCKVILLE, ONT., January 1st, 1909.

The Inspectors of Prisons and Public Charities, Toronto, Ont.

SIR,—I have the honor to submit for your consideration the annual report of the Hospital for the Insane, Brockville, for the year 1908.

The total admissions for the year amounted to one hundred and forty-three, being three more than last year. The total number of patients under treatment amounted to six hundred and ninety-four, being nineteen more than last year. During the year fifty-eight patients were discharged and of this number thirty were recovered sufficiently to resume their previous occupation. This number is somewhat smaller than usual, and is due to the fact that many of the patients admitted were incurable as a result of having suffered from mental disease for many years. We were also obliged to admit a number of idiots and imbeciles as well as a considerable number of epileptics. When we consider these facts it is not surprising that our recovery rate is not as great as we would wish. The number of deaths was forty-eight, and sixteen patients were transferred to other stations. Taking it altogether there is very little change in the actual movements of our patients from year to year. The number of patients admitted annually remains about the same, and this would seem to indicate that so far as this district is concerned there is very little, if any, actual increase in insanity. It may be that the population of the district has decreased a very little, but it is also true that we now receive a number of patients from the eastern part of the province who would, a few years ago, be sent for treatment to similar institutions in the Province of Quebec. Owing to the crowded condition of our wards we were unable to award admission as promptly as we would desire in many cases. However, we have managed to arrange matters so as to leave very little ground for complaint on that score.

As usual we find that a number of patients are sent here for treatment who could under ordinary conditions be cared for in their own homes, but very often they have no friends to give them what little attention they require. Seven patients were admitted by warrant during the year, and an earnest effort has been made by the physicians, and especially by the gaol surgeons, in the district to have all patients sent direct to the institution. It is very gratifying indeed to know that at the present time very few of our patients are obliged to spend any time in gaol before being committed to the Hospital.

Our death rate remains about the same as last year, and, on the whole, our patients suffer very little from ordinary physical disease. During the early part of the year we were threatened with an epidemic of smallpox. A large number of cases occurred in the town of Brockville, and it was deemed prudent to vaccinate all our patients. Certain restrictions were also placed on visitors to the institution, and we were fortunate in preventing a single case occurring amongst our patients. We have had a few cases of diphtheria, but in nearly every instance the source of contagion was located outside of the institution. Frequently attendants visit their former homes in which this disease prevails, and in this manner contagion is brought to the Hospital.

Staff Conferences.

It is now more than four years since staff conferences were first held in connection with this hospital, and a marked improvement in the character of these meetings has taken place during the past year. The physicians in charge have been very diligent in examining their cases and preparing a complete history as soon as possible after admission. This history is read at a meeting of the medical staff, at which the patient is presented whenever possible. Cases are again presented from time to time when deemed necessary by the physicians in charge, and a consultation is always held before a discharge is made.

The installation of four continuous baths has enabled us to devote more attention to the hydrotherapeutic treatment of our patients, and I am glad to say that the results so far appear to be very satisfactory. Some of our most excited cases respond to treatment very readily, and there is no doubt but the expenditure in this matter was justifiable. This system of treatment, of course, means additional labor on the part of the nurses and the medical staff, but I am glad to say that everyone responded cheerfully to the extra work devolving on them.

During the year our kitchen has been re-arranged, and better facilities provided for supplying our patients with extra diet. At the present time this work is performed in a systematic manner, and the responsibility for preparing all special diet for patients placed on one individual. This advance has been very helpful to our patients, and we hope to make it even more successful in the future. Some progress has also been made in the matter of providing our patients with a more varied dietary.

In spite of the fact that we were obliged to assist in the work of erecting new buildings, we were still able to carry on almost as much work as usual on our grounds. New roads were constructed, fences built, lawns made, and various other improvements carried on with which you are no doubt familiar. We are especially pleased, however, to report that we were able this year to assist materially in the construction of a splendid assembly hall for which we have been asking for a great many years. The building is now very well advanced, and when completed will be superior to anything of this kind in the Province of Ontario. It is built of concrete, with slate roof, and will be absolutely fireproof. The building itself presents an imposing appearance, and is certainly a credit to your architect, who devoted much attention to the matter during the year. By utilizing patients' labor a saving of some thousand dollars was effected, and I am very glad indeed to have this opportunity of proving practically that the patients of an institution are able to contribute very largely towards its maintenance. If the labor of patients was prohibited in an institution of this kind the cost of maintenance would be very much larger than it is at the present time, and while, of course, this is and must always remain an important consideration, yet the paramount idea is that by permitting our patients to engage in a suitable occupation we are able to hasten their recovery from the mental disease from which they are suffering. I am sure it would be difficult or impossible to find a more pleasant, contented, or easily managed lot of laborers in connection with the erection of any building. Several of our patients who were engaged in this work improved mentally during the time the building was being erected and in some cases recovered so far that we were able to discharge them before the work was completed. My own personal opinion is that every facility should be offered to permit our patients to engage in work of this kind, notwithstanding the criticisms that are made from time to time. Great care was

exercised in seeing that not a single patient was obliged to accomplish more than his strength would permit, and every provision was made to protect those who were engaged in this work. Not a single accident occurred during the erection of the building, and I have to thank the Superintendent of Works, Mr. Denise, for his hearty co-operation in looking after the welfare of the patients while engaged in the erection of the new buildings. Our solar room, too, is almost completed, and will provide accommodation for from twenty-five to thirty patients. This building, which connects Hall "I" with Cottage "4," is also fireproof. The walls are almost wholly composed of glass, as well as a portion of the roof, and is so situated as to permit an abundant supply of sunshine and fresh air during every part of the day. This building, together with our continuous baths, has made our reception hall much more satisfactory than formerly.

The usual repairs were made in the boiler room, and our painter, mason, carpenter and plasterer were very busy during the year in renovating the different halls and cottages. In all our work we have endeavored to find as much occupation as possible for our patients, believing that there is no other form of treatment at the present time that has afforded better results.

During the summer croquet and lawn tennis were encouraged, and I am glad to say that bowling on the green was carried on very successfully, and at the present time our club, composed principally of patients, are able to more than hold their own with the different clubs in this vicinity. During the winter the rink was occupied every afternoon and evening when ice was available, and our curlers were also able to win a majority of their games. Curling and skating have afforded our patients a great deal of amusement, carnivals being held from time to time.

During the year we were able to extend our system of placing female nurses in charge of male patients, and with, I am glad to say, very gratifying results. At the present time female nurses are employed in the majority of the men's halls and cottages, and before the end of another year we hope that at least one nurse will be found in each division on the men's side. This is no longer an experiment, and I would be very sorry indeed to return to the old system where patients were obliged to depend on male nurses alone.

During the year the night nursing on the female side has been very much improved, and at the present time our patients receive almost as much attention at night as during the day. It will be necessary to increase the night staff on the men's side as well as to appoint a night supervisor to look after the work generally.

Our training school was carried on as usual very successfully. During the year we were fortunate in securing a number of physicians from Brockville to deliver lectures on certain subjects, and in this way, with the assistance of our own staff, we were able to give our nurses and attendants a very comprehensive course. As a result of this training many of our nurses passed creditable examinations in the spring, and the general character of our whole nursing staff has materially improved. The fact that we were able to obtain a number of physicians from Brockville to assist us made it possible for our own staff to give more time to the practical part of the work, and in this way our nurses and attendants receive a more practical training.

I shall not refer to the wants of this institution, as these matters have already been discussed with the department during the year. I desire, however, to express my most sincere thanks to the Honorable the Provincial Secretary for the large-hearted manner in which he has dealt with all matters pertaining to this institution.

Every suggestion has appeared to receive serious consideration, and whenever possible, the necessary funds to carry on our work were cheerfully supplied.

The religious services have been carried on as usual by the pastors of the churches in Brockville, and I must again thank them for their kindness in looking after the spiritual wants of our patients. I am glad to know that provision will be made in our Assembly Hall by which these clergymen will be able to carry on their work in a more satisfactory manner, and I desire to repeat what I have already stated on previous occasions, that these men should receive some financial consideration for their services.

There were very few changes amongst our staff of female nurses during the year, but, as usual, we found it difficult to obtain a suitable class of male attendants. Hardly one out of every ten male attendants proved satisfactory, and this is very largely owing to the fact that it is impossible to obtain competent men on account of the small remuneration received for their services.

I am glad to say that not a single serious accident occurred. This speaks well for the vigilance and care exercised by our attendants and nurses, and I desire to publicly thank them for the keen interest they have taken in their work.

In conclusion I desire to offer you my most sincere thanks for the interest you have taken in this institution during the year, and to say that I appreciate very much the assistance you have cheerfully given me in matters of importance.

I have the honor to be,

Sirs,

Your obedient servant,

THOS. J. MOHER,
Medical Superintendent.

ANNUAL STATISTICAL REPORT OF THE OPERATIONS OF THE HOSPITAL FOR INSANE, BROCKVILLE, FOR THE YEAR ENDING DECEMBER 31ST, 1908.

TABLE No. 1.

Showing movements of patients in the Hospital for the official year ending December 31st, 1908.

	Male.	Female.	Total.	Male.	Female.	Total.

HOSPITAL FOR THE INSANE, COBOURG.

ANNUAL REPORT OF THE MEDICAL SUPERINTENDENT FOR THE YEAR ENDING DECEMBER 31ST, 1908.

JANUARY 5TH, 1909.

TO S. A. ARMSTRONG, ESQ., AND E. R. ROGERS, ESQ.,
Inspectors of Hospitals for Insane, etc., Toronto.

GENTLEMEN,—In accordance with the statutory requirements, I have the honor to submit the seventh annual statistical report of this hospital for the year ending December 31st, 1908.

The year opened with 145 patients in residence. There were eighteen admissions, two discharges, one of which was deported to England, ten deaths, and five transfers, leaving us at the end of the year with our full capacity of one hundred and forty-six patients.

REQUIREMENTS.

In an institution of this size our wants are not many, but if our small garden is to be worked and vegetables produced, it is necessary to have some place to store these vegetables for winter use. I therefore strongly recommend the building of a suitable root house.

The installation of a stand pipe with hose on each flat for fire protection is now under consideration, and when completed will add very materially to the safety of the institution from fire. A hose reel for carrying the hose that is kept for connection with the town water works and a shelter for same in rear of building will add to our security.

The front hall and officers' quarters will require paint, and the screens on windows will have to be painted to prevent their rusting. The dining-room of Hall 2, now heated from the laundry, would be much more comfortable in cold weather if a radiator or steam pipes were placed therein.

IMPROVEMENTS.

During the year the dormitories were all painted, adding much to the comfort and appearance of the halls. The walls were papered, and inside woodwork painted at Superintendent's residence.

MAINTENANCE.

The cost of maintenance at this institution is necessarily high, but compares favorably with that of other Provincial institutions when the number of patients is considered. The per capita cost might be slightly decreased by lessening the number on our staff, but this could only be done if a better class of patients, such as those at Hall 1, Orchard House, Hamilton, were gradually sent here. Cobourg is a most expensive place in which to live. The question of building, and thus increasing the capacity of the institution, as the only way in which the cost of maintenance can be materially reduced has, no doubt, been brought to your attention.

STAFF.

There were few changes in the official staff or employees during the year. On the 19th of September Dr. C. E. Hickey, who had been Superintendent here for three years, was, much to the regret of all who knew him, called to his long last home, and Dr. W. T. Wilson was appointed in his stead.

In November, Wm. K. Stewart, who had been gardener since the opening of the institution, and who had served many years at Penetanguishene, handed in his resignation. He was always a faithful worker and had the best interests of the institution at heart.

During my short tenure of office I have had little to complain of relative to the efficiency of those on the staff; they as a whole take suggestions kindly and are faithful in the performance of their duties.

I have the honor to be, Sirs,

Your obedient servant,

W. F. WILSON,
Medical Superintendent.

ANNUAL STATISTICAL REPORT OF THE OPERATIONS OF THE HOSPITAL FOR INSANE, COBOURG, FOR THE YEAR ENDING DECEMBER 31ST, 1908.

HOSPITAL FOR THE INSANE, PENETANGUISHENE.

Annual Report of the Medical Superintendent for the Year Ending December 31st, 1908.

To S. A. Armstrong, Esq., and E. R. Rogers, Esq.,
Inspectors of Hospitals for Insane, Etc., Parliament Buildings, Toronto.

Gentlemen,—In accordance with the requirements of the Statute, I herewith submit the fifth Annual Report of this Hospital for the year 1908.

It will be observed that it has not been usual to admit to this Hospital acute cases. This year we have admitted several, and when we get the improvements, which we expect early in 1909, we can take all the acute cases which may occur in our district, as far as our capacity will allow. Heretofore we have been filled up with consignments of patients from other institutions, and, as might be expected, the best patients were not consigned to us. However, in spite of all this, our death rate has been remarkably small considering the old, feeble and diseased cases sent us. Again, our tables do not show all of the recoveries which have actually taken place, on account of the fact that there is no column to show the state of those *deported*. The same may be said of those during the year who have eloped. One man who eloped had quite recovered, and of three deported, two men had recovered and one was much improved.

A report of the management of this Hospital for the year 1908 necessarily resolves itself into a narrative of the work done and improvements made. Owing to the decision of the Government to fit up the old workshop which had been burned, into a building for the accommodation of the male patients, the place during the whole of last winter was simply a chaotic mass of every conceivable kind of rubbish, and when spring arrived and the kindly services of an overlying mantle of snow had disappeared, then the scene about the place was most discouraging.

Immediately to the east of the buildings and along the driveway, about a quarter of an acre of ground was covered to a depth of four or five feet with coarse cinders from the boiler house; around the newly repaired building were piles of old lumber, bricks, mortar and every conceivable form of scrap iron, from old boilers down to rods and iron screens twisted into every sort of shape. The laundry, the bakery, the paint shop and other buildings had been enlarged or patched up, and some parts of the walls had been whitewashed, some painted, more of them the color of new brick, until the mention of Joseph's coat as a comparison with which to convey an idea of the medley of colors would have been quite inadequate. The ground, too, in numerous places was thrown up in heaps owing to recent work in baring sewer, steam or water pipes, until as a matter of fact only one word—chaos—can convey any idea of the condition of the place.

To clear this up and make the place assume any sort of orderly appearance required an immense amount of work throughout the whole season; indeed, it is not by any means finished yet, and will require many seasons of work before the grounds and buildings are what they should be. Nature has done wonders in furnishing one of the most beautiful sites for an Institution which could be conceived, and art, if properly directed, can in the future make it one of the most beautiful places in the Province. Although we were heartily discouraged with the appearance and condition of things, we started to work early in the spring with all the available workers we had, and have kept steadily at it the whole season, until, when winter set in, we

congratulated ourselves that we had accomplished a great deal, and in order to give a description of the work in as few words as possible, we propose giving just a list of what has been done. We kept gangs with teams as regularly as we could, clearing away the rubbish during the whole season.

Many good works have been done during the year, as, for instance, completing the new dormitories for the men, the new bakery and laundry, installing an elevator, and we now have four new drier-rooms installed in the laundry.

A temporary ice-house was built on the north side of the barn, so that our employees could have during the season what ice they needed, since we filled not only it, but the old ice-house also.

The carpenters finished the bursar's barn. Built temporary stairs outside of main building, which serve as a short cut for the men to reach the dining-room, and also as a fire-escape in case of necessity. Had an office fitted up for Mr. Newton.

As we found 1,500 bushels of fine mangels frozen as hard as stones in the new cement root-house, we had that so repaired that even, as is common here in winter, forty degrees below zero would not freeze roots there again. A shoemaker's shop was fitted up, and we had a soap-room built, and an apparatus for making soap installed. This is a great success, and a great saving of valuable material, formerly wasted. We built a lime and cement house; also a compartment for paints, oils, etc. This is made of iron and fills a much needed want.

All of the brick buildings were colored with permanent wash, so as to give them a uniform color with the stone buildings. This improved the appearance very much, and reflects credit on the attendant who so patiently stuck at it until all were done, although it was a dirty and difficult job. A good terrace was made in front of the main building on the south side of the entrance. One hundred and sixty rods of Lamb fencing was put up. Had the two wards formerly occupied by the men fitted up, repaired and painted throughout to accommodate eighty women. Repaired and renewed the Assistant Physician's house; this entailed a great deal of work, as the old building was not worth repairing; also laid 428 ft. of 2-inch steampipe to the Assistant Physician's house for heating purposes.

A dining-room for the attendants and nurses and other employees was fitted up, instead of having them eat with the patients. This all concerned found a very satisfactory change. A scullery for this dining-room was also built.

A granolithic walk three feet wide was built in the quadrangle, about 250 ft. in length, to be continued next season. We broke up, stoned and cultivated the grounds in the front of the main building, preparatory to having it properly laid out by a landscape gardener.

We levelled up, stoned and plowed what was known as the cricket ground, to the north of the building, cleared away the old fences and posts and seeded it down with lawn-grass seed; built a large lumber shed for the carpenters, in which to stow the lumber formerly scattered all over the ground; built a splendid wood-shed, 106 ft. long, where all wood, both hard and kindling wood, may be kept dry.

The farmer cleared of stones about four and a half acres near the barn and enclosed it in the eighteen-acre field, which was then planted to potatoes. Cleared up and plowed about 20 acres of the Triangle across the bay, which will make a good field for potatoes next year. Through a typographical error last year's report said there were sixty acres cleared up across the bay, when all told there are only now twenty acres.

We built a good roadway around the front of the building; also made a good

road leading to the town with the cinders for about a mile. This was needed on account of the heavy, sandy road, which is now a first-class road.

Our *chef-d'oeuvre,* however, was the excavation and building of the large coal vault, the dimensions of which are 70 x 52 x 12 ft. This was all done by patients' work, and the patients also attended the masons in building the walls. This was an immense work for the few workers we have. About 150 loads of gravel were drawn nearly two miles for this work, all done by our teams and labor. This was the big work of the season and was a very difficult undertaking, on account of the water which kept coming in from the eastern bank; we also succeeded in getting a good cement floor throughout.

We laid out a new cemetery in the field next the bay. This is a very favorable site and may be beautified with a hedge about it and ornamental trees. We moved most of the bodies from the old cemetery, where they occupied a place out in our best field.

We put in new cement floors in the closets on the female wards Nos. 1 and 2. This was badly needed. A new barn was built for one of the married attendants. Moved the old fire station to the barnyard, and made of it a most useful tool house for all the small farm implements, an office for the farmer, and also a place where the barn gang may go to get warmed when necessary. Out of the stone basement of the old fire station we have made a fountain and basin, which will add much to the appearance and comfort of the quadrangle in the summer.

We took out the old oven in the old bakery, and are now engaged in putting in a cement floor, after adding the room to the kitchen. This will make a fine kitchen and scullery. In order to get the kitchen range in the right place we were obliged to move one of the massive stone chimneys, which proved more of an undertaking than we expected; however, it is finished and will prove very convenient.

Our painters, beside the ordinary everyday work of an Institution, painted a great deal of the new building for the men. They did a good deal of necessary work at the Residence, and Assistant Physician's residence. They painted the cornices, doors, frames and window sashes of all the buildings except the main building, so as to make a finish after coloring the walls. They painted five houses of the employees outside and in. Painted the inside of the laundry and bakery. Decorated the Amusement Hall throughout. Painted the bursar's barn and the boat house, and besides painting the inside of a number of the employees' houses, two or three carriages and the launch.

The carpenter had a busy season, and accomplished a great deal of useful work, some of which has been mentioned, and a list is appended.

The engineer's department has been faithfully carried on amid many difficulties. A list of work is appended.

The gardening operations were very successfully carried on, and the Institution supplied plentifully with the best of vegetables of every kind. A list of products is given. Besides this, the greenhouse was a great comfort, furnishing large quantities of cut flowers and ornamental plants with which to beautify the grounds, which are very well kept. We started to stone and reclaim the slope on the east side of the garden, which should be planted to small fruit, etc., so much needed for the Institution. This we intend to try and accomplish during the ensuing season.

The farm work has been very successfully carried out. The products and a list of extra work is given, which reflects great credit to the farmer, and shows that little time could have been wasted.

Improvements Needed.

In the case of a new Institution like this, there are so many things needed that it is difficult to decide which are most urgently needed. We need three new balconies on the west end of the men's dormitories, so as to enable them to get out in the fresh air and sun.

Coal Carrier.

The transportation of the coal used is perhaps one of the most important questions. There is now delivered at the dock each season about 1,600 tons. The dock is situated 525 yards from and 125 yards below the coal vault, and has to be hauled with heavy teams in all kinds of weather and over all kinds of roads, keeping two teams almost continuously busy during the winter. We think that if we had an endless wire rope system, carrying buckets, and the power derived from a traction engine, this problem would be easily solved.

Cold Storage.

We also need a cold storage building for meats, fruit, milk, butter, etc. This is an almost absolute necessity to prevent much of the waste, which is now unavoidable.

Cow Stable.

We need badly a modern cow stable, capable of accommodating about thirty cows. The old stable is badly arranged, without sunlight, and is a most favorable place for tuberculosis, a stable not at all in keeping with modern ideas of sanitation.

Slaughter House.

We need very badly a small slaughter house where our meat may be killed in a cleanly manner; at present we have no place whatever.

New Dock.

We need a new dock across the bay where an easy landing may be made. This work will be inexpensive and may be done with our own labor.

Hospital.

We propose, during the present winter, to fit up an operating room and two small wards, where we can do necessary work in that line, and where we can isolate and nurse properly our sick. At present we have no place, except in a large open dormitory, where there are thirty or forty in the same room. This is not as it should be, and we have a good opportunity of remedying the defect.

Separate Rooms.

We need badly three or four separate rooms on the women's side, where restless, excited patients may be kept at night, so that they will not disturb the whole ward as they now do in spite of anything we can do.

The above new work will be probably more than we shall be able to compass our-

selves, but we hope that some of the large buildings may be taken in hand by the Public Works Department, and probably let by contract.

Our grounds, fences and roads will necessarily take up a good deal of attention and involve a lot of work.

Since last year Dr. Cattermole and myself have been placed in charge, and every effort is being made to get the place in good working order. As will be observed, over a hundred new patients have been transferred here, and in many respects they are very comfortably housed and taken care of. Our facilities are not what they should be yet, but in the near future we hope to have everything arranged so as to make it second to none in the Province.

I have much pleasure in saying that the employees are and have been very agreeable, all anxious to make the Hospital a success as far as any effort of theirs may contribute towards that end. They are patient and painstaking under many difficulties, and I take this opportunity of thanking them for their hearty co-operation.

I have also to thank you, Sirs, for your kind consideration in attending to our many wants so promptly and effectually.

I have the honor to be,

Sirs,

Your obedient servant,

G. W. McCallum,
Medical Superintendent.

ANNUAL STATISTICAL REPORT OF THE OPERATIONS OF THE HOSPITAL FOR THE INSANE, PENETANGUISHENE, FOR THE YEAR ENDING DECEMBER 31ST, 1908.

TABLE No. 1.

Showing movements of patients in the Hospital for the official year ending December 31st, 1908.

	Male.	Female.	Total.	Male.	Female.	Total.
Capacity of Hospital	166	199	365			
In Residence, December 31st, 1907				140	138	278
Admitted during year 1908:—						
By Warrant	25	28	53			
By Medical Certificate	10	24	34	35	52	87
Total number under treatment during year				175	190	365
Discharges during year:—						
As recovered	2	3	5			
" improved

FORTY-FIRST ANNUAL REPORT

OF THE

Inspector of Prisons and Public Charities

UPON THE

COMMON GAOLS

OF THE

PROVINCE OF ONTARIO

BEING FOR THE YEAR ENDING 30TH SEPTEMBER,

1908

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO

TORONTO:
Printed and Published by L. K. CAMERON, Printer to the King's Most Excellent Majesty,
1909.

WARWICK BRO'S & RUTTER, Limited, Printers,
TORONTO.

TORONTO, November 30th, 1908.

To His Honour JOHN MORISON GIBSON, *a Colonel in the Militia of Canada, etc., etc., etc., Lieutenant-Governor of the Province of Ontario.*

MAY IT PLEASE YOUR HONOUR:

I beg to submit herewith the Forty-first Annual Report upon the Common Goals, being for the year ending 30th September, 1908.

I have the honour to be,

Your Honour's most obedient servant,

W. J. HANNA,

Provincial Secretary.

Toronto, November 28th, 1908.

Sir,—

I have the honour to submit herewith to be presented to His Honour the Lieutenant-Governor, the Forty-first Annual Report upon the Common Gaols of the Province of Ontario, being for the official year ending 30th September, 1908.

I have the honour to be, Sir,

Your obedient servant,

R. W. Bruce Smith,

Inspector.

The Honourable W. J. Hanna, M.P.P.,
Secretary of the Province of Ontario,
Toronto.

CENTRAL PRISON 39

ANDREW MERCER REFORMATORY FOR FEMALES 50

FORTY-FIRST ANNUAL REPORT

UPON THE

Gaols and District Lock-ups of Ontario

In presenting the Forty-first Annual Report of the Gaols and Lock-ups of Ontario, I beg to submit the following statistics for the year ending September 30th, 1908.

(1) Number of Gaols in Ontario 45

Number of Provincial Lock-ups 11

(2) Total expenditure for Gaol maintenance in Ontario:

In 1907	$164,852 39
In 1908	175,829 20
Increase	$10,976 81

(3) The cash revenue from Gaol labour during 1908 was $93.12, and was earned at Perth and Port Arthur Gaols.

Average cost per day for each prisoner in the County Gaols of Ontario was:

In 1907	27 cents.
In 1908	23 cents.

(4) Number of persons committed to Gaols and Lock-ups during the past two years was:

In 1907	11,804
In 1908	13,083
Increase during the past year	1,279

Commitments for murder in 1907	23
Commitments for murder in 1908	34
Increase	11

Commitments for manslaughter in 1907	19
Commitments for manslaughter in 1908	10
Decrease	9

Commitments for crime against the person:

In 1907	868
In 1908	874
Increase	6

Commitments for crime against property:

In 1907	2,936
In 1908	3,546
Increase	610

Commitments for crime against public morals and decency:

In 1907	457
In 1908	544
Increase	87

Commitments for crime against public order and peace:

In 1907	6,833
In 1908	7,187
Increase	354

Number of insane committed to Gaols:

In 1907	258
In 1908	266
Increase	8

Prisoners sentenced to the Penitentiary during the past year show an increase of 50, as compared with the previous year, and the number transferred to the Central Prison was 9 more than in 1907.

Number of prisoners sentenced in 1907	7,059
Number of prisoners sentenced in 1908	7,804
Increase	745

The percentage of sentences to commitments was:

In 1907	59.80
In 1908	59.65

The number of prisoners sentenced to terms of one year and upwards was 106 more than during the previous year.

The number confined in penal institutions of Ontario was 166 more on September 30th, 1908, than on the same date last year.

Of those committed during the year, 4,729 were married and 8,354 were single.

Habits of life of those committed to Gaols:

In 1907, number of commitments 11,804; temperate 2,889; percentage 24.48.

In 1908, number of commitments, 13,083; temperate, 3,462; percentage, 26.46.

Less than fifteen per cent. of the prisoners committed to the Gaols during the past year could not read or write.

Number of days' stay of prisoners:

In 1907	229,752
In 1908	292,177
Showing an increase of days	62,425

Escapes and captures:

Thirty-eight prisoners escaped during the year, of whom eighteen were re-captured.

Deaths in Gaols:

In 1907	19
In 1908	13

Inspections.

Visits of inspection have been made during the year to the different Gaols and reports of such inspection have been made to the Honourable the Provincial Secretary and to the Sheriff of each County. In some Gaols the sanitary conditions and equipments have been much improved, but there are a few which have not yet responded to the demands made for necessary alterations. Unfortunately, in several Gaols there are such marked structural defects that it would be extremely difficult and expensive to make all the alterations that would bring about the improvements desired. Probably the time is not far distant when district Gaols farms can be established in

different parts of the Province, and, in that event, it will not be necessary to detain prisoners for any length of time in the present structures, where it is next to impossible to classify and separate prisoners in accordance with the rules laid down for that purpose. Under present conditions it is difficult to provide work for prisoners. Idleness is nowhere more deplorable than in Gaols. When prisoners are permitted to idle away their time day after day in the corridors the results of such associations and lack of occupation are harmful in the extreme. A Gaoler who is faithful and conscientious in the discharge of his duty will always endeavour to discourage idleness among his prisoners. Work of some kind can generally be provided. In this Province where there is such a demand for material for road-making all prisoners, while in custody in Gaols, might profitably be kept employed and the results of their labours in contributing material for good roads would be appreciated by the public and probably little criticism made for having labour so engaged.

Indeterminate Sentence and Probation.

The records each year indicate the need in Canada for the system of indeterminate sentence and probation, which have long been advocated in these Annual Reports. The success of such systems in other countries has demonstrated the fact that reformation can be attained in a much larger proportion of cases than under the old methods where punishment and not reformation is aimed at. At the Canadian Conference of Charities and Correction this year the subject of the need for prison reform received very earnest attention. An interesting address by Dr. J. A. Leonard, Superintendent of the Ohio State Reformatory at Mansfield, was full of interesting facts, showing the advantages to society of adopting the methods of dealing with prisoners which have proved successful in England and several of the United States. He urged that when an accused person is found guilty of a crime, the Court, instead of *punishing the crime*, should proceed to inquire who is the criminal, and what are his character and antecedents and circumstances; and that upon the result of that inquiry he should be dealt with in whatever way the interests of the public demand. The effect would be that some offenders who now go to prison would be committed to the guardianship and care of a probation officer and be at once placed into some employment, and that others who give proof that they live by preying upon the community would be permanently deprived of the liberty which they abuse and be sentenced to prison for an indeterminate term and only released on probation when the Judge or Magistrate is satisfied that reformation has been established.

Gaols and Lock-ups in New Ontario.

During the past year a new district Gaol has been satisfactorily completed at Fort Francis, in Rainy River District. On account of railway construction bringing to some of the districts a large foreign population, the Gaols at Kenora, Port Arthur, Sudbury and North Bay have been at times greatly overcrowded. Under the conditions which have existed it has been quite impossible to maintain some of the Gaols in a sanitary condition, and on account of the great distance to Toronto it has been found impossible to relieve the overcrowding by removing the prisoners to the Central Prison. Careful consideration of the question leads to the conclusion that it would be of great advantage to establish a Gaol farm on the north shore of Lake Superior, to which all prisoners sentenced for more than one month might

be transferred. The labour of prisoners could be utilized to erect whatever buildings would be required to clear the land, build roads and establish an Industrial Farm, where all prison labour might profitably be employed on public work. Such a farm would probably in time become a valuable asset to the Province.

Toronto Gaol.

Notwithstanding the fact that the report of the special Commissioner appointed last year to inquire into conditions at Toronto Gaol called attention to the necessity of more accommodation being provided, no addition has been made. The number of prisoners is frequently in excess of the cell accommodation, and under such deplorable conditions proper classification of prisoners is impossible. Removal to a large farm in the country adjacent to the city seems to be the only rational solution to the difficulty. The attention of the city council has repeatedly been called to the absolute necessity for providing proper accommodation.

R. W. Bruce Smith,
Inspector.

COMMON GAOLS.

The following table shows the number of prisoners committed to the Common Gaols in the Province in each year, from the 1st October, 1869, to 30th September, 1908.

Date of Commitment.	Men over 16 years of age.	Boys under 16 years of age.	Women over 16 years of age.	Girls under 16 years of age.	Total.

The disposition made of the persons committed to the gaols of the Province is set forth in the table printed below :

Acquitted on being brought to trial and discharged	3,080
Discharged without trial by order of judges, magistrates and courts, including remand cases	1,270
Detained for want of securities to keep the peace	64
Detained as witnesses	28
Detained as fraudulent debtors	18
Detained as lunatics, idiots and persons unsafe to be at large	266
Died before trial	1
Detained by civil processes other than above	39
Waiting trial and otherwise detained on 30th September, 1908	107
Found guilty and sentenced	7,804
Discharged under suspended sentence	406
Total number of commitments	13,083

The places of confinement to which the convicted persons were sentenced are set forth in the following statement, and similar information is given as regards the sentenced prisoners of the previous year :

	1907.	1908.
Sentenced to Kingston Penetentiary	146	196
do to the Industrial School	23	27
do direct to Central Prison	776	714
do to the Common Gaols and subsequently transferred to the Central Prison	46	117
do direct to the Reformatory for Females	84	121
do to Common Gaols and subsequently transferred to the Reformatory for Females	5	16
do to the Common Gaols and there detained until the expiration of sentence	5,964	6,601
Died while undergoing sentence	15	12
Total	7,059	7,804

The summaries given below shew the nature of the offence committed by the convicted persons :

1. *Crimes against the Person.*

	Total commitments for the year.	Number found guilty and sentenced.
Assault, common	422	207
Assault, felonious	213	95
Cutting and wounding, stabbing and shooting with intent	81	40
Rape, and assault with intent	60	18
Murder	34	4
Manslaughter	10	3
Attempted suicide	34	15
Miscellaneous	20	8
Total	874	390

2. Crimes against Property.

	Total commitments for the year.	Number found guilty and sentenced.
Arson and incendiarism	33	8
Burglary	70	42
Counterfeiting and passing counterfeit money	2	..
Destroying and injuring property	66	43
Embezzlement	5	2
Forgery	112	67
Fraud and obtaining money and goods under false pretenses	174	68
Horse, cattle and sheep stealing	43	20
Housebreaking and robbery	216	125
Larceny	2,264	1,328
Receiving stolen goods	51	19
Trespass	510	392
Miscellaneous	...	...
Total	3,546	2,114

3. Crimes against Public Morals and Decency.

Bigamy	26	18
Inmates and frequenters of houses of ill-fame	180	70
Keeping houses of ill-fame	130	74
Perjury	32	12
Seduction	27	6
Indecent assault and exposure	124	70
Miscellaneous	25	21
Total	544	271

4. Offences against Public Order and Peace.

Abusive and obscene language	34	26
Breaches of peace, breaches of by-laws, escapes from and obstructing constables	203	148
Carrying unlawful weapons	76	53
Deserting employment, etc	29	25
Drunk and disorderly	4,753	3,122
Selling liquor without a license and selling or giving it to Indians	96	88
Threatening and seditious language	43	12
Vagrancy	1,912	1,260
Miscellaneous	41	19
Total	7,187	4,753
Contempt of court, lunatics, etc	331	56
Other offences, not classified in foregoing	601	220
Grand Total	13,083	7,804

The following tables shew the period of sentence passed on the convicted prisoners and the sex, social conditions, habits, etc., of the total number of prisoners committed.

Periods of Sentence.

	1907.	1908.
For periods under thirty days	2,480	2,749
For thirty days and up to sixty days, or two months, not including the last term	2,241	2,349

Periods of Sentence.—Continued.	1907.	1908.
For sixty days, or two months	571	544
Over two months to three months	405	495
Over three months to four months	192	220
Over four months to five months	84	99
Over five months to six months	569	717
Over six months to nine months	101	111
Over nine months up to one year, inclusive	104	156
Over one year and up to two years	148	156
Over two years and up to three years in the Penitentiary	71	94
Over three years in the Penitentiary	62	85
For periods of any length in the Industrial Schools	27	21
Sentenced to death and executed	..	2
Sentenced to death and commuted to imprisonment	1	2
Sentenced to imprisonment with corporal punishment	3	10
	7,059	7,804
Sex.		
Male	10,576	11,746
Female	1,228	1,337
	11,804	13,083
Social Condition.		
Married	4,295	4,729
Unmarried	7,509	8,354
	11,804	13,083
Habits.		
Temperate	2,889	3,462
Intemperate	8,915	9,621
	11,804	13,083
Educational Status.		
Could read and write	10,193	11,230
Could neither read nor write	1,611	1,853
	11,804	13,083

Nationality		*Religious Denomination.*	
Canadian	7,393	Roman Catholic	4,980
English	1,994	English Church	3,318
Irish	1,016	Presbyterian	1,757
Scotch	726	Methodist	1,804
United States	896	Other Denominations	1,224
Other Countries	1,058		
	13,083		13,083

The number of prisoners confined in the various custodial institutions of the Province at the close of the past official year, and the year preceding, is exhibited in the following summary:—

	1907.	1908.
In the Common Gaols	689	751
In the Central Prison, Toronto	411	411
In the Reformatory for Females and Refuge for Girls, Toronto	46	74
In the Dominion Penitentiary, Kingston	455	531
	1,601	1,767

Gaol Expenditures.

The usual table is appended shewing the cost of maintaining the Common Gaols during the past thirty-one years, under the heading of rations, clothing, fuel, salaries and wages and repairs.

Year.	Total number of prisoners in custody each year.	Cost of rations, clothing, fuel, etc., each year.	Cost of salaries and wages of gaol officials each year.	Cost of repairs.	Total gaol expenditure.

A summary is given below shewing the days' stay respectively of those prisoners whose maintenance was chargeable to the Province and of those who were a charge on the Municipalities:—

		Days' stay.
4,647	Criminal prisoners remained in gaol.....	147,613
8,436	Municipal " " "	144,564
13,083	Prisoners in all " "	292,177

Statistical Tables.

Following this portion of the report will be found the tables named in the list given hereunder:

Table No. 2, shewing the total number of prisoners in the several gaols on the 30th September, 1908, and the nature of their imprisonment.

Table No. 3, shewing the number of prisoners over and under 16 years of age, the number of recommittals, the number of persons acquitted on being brought to trial, and the number of persons committed under civil processes.

Table No. 4, shewing the offences for which prisoners were sentenced.

Table No. 5, shewing the number of prisoners, male and female, sentenced under each offence during the year.

Table No. 6, shewing the social status and habits of the prisoners committed during the year.

Table No. 7, shewing the number of prisoners upon whom sentence was passed, the nature of the sentences, and the operation of the County Judges' Criminal Courts.

Table No. 8, shewing how the prisoners committed during the year were maintained, the cost thereof, and the salaries of officials.

Table No. 9, shewing the number of escapes and deaths, the revenue derived from prison labor, the cost of diet, accommodations of the gaols, and the highest and lowest number of prisoners in custody in each gaol during the year.

Table No. 10, shewing the daily cost per prisoner in each of the gaols of the Province for the year ending 30th September, 1908.

Table No. 11, shewing the number of prisoners, male and female, sentenced during the year ending 30th September, 1908, and a comparison of the same with the previous year.

TABLE No. 2.

Shewing the total number of prisoners who were in the several gaols of the Province on the evening of 30th September, 1908, and the nature of their imprisonment.

Name of gaol.	Classification.				Nature of imprisonment.						Total number of persons who remained in custody 30th September, 1908.
	Men.	Women.	Boys under 16 years.	Girls under 16 years.	Waiting trial.	Under sentence for periods of 2 months and under.	Under sentence for periods over 2 months.	In default of sureties to keep the peace.	Insane, idiotic or imbecile persons.	Otherwise detained.

FORTY-FIRST ANNUAL REPORT

OF THE

INSPECTOR OF

Prisons and Reformatories

OF THE

PROVINCE OF ONTARIO

BEING FOR THE YEAR ENDING 31ST DECEMBER

1908

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO

TORONTO:
Printed and Published by L. K. CAMERON, Printer to the King's Most Excellent Majesty
1909.

TORONTO, January 31st, 1909.

To His Honour JOHN MORISON GIBSON, *a Colonel in the Militia of Canada, etc, etc., etc., Lieutenant-Governor of the Province of Ontario.*

MAY IT PLEASE YOUR HONOUR:

I beg to submit herewith the Forty-first Annual Report upon the Prisons and Reformatories, being for the year ending 31st December, 1908.

I have the honour to be,

Your Honour's most obedient servant,

W. J. HANNA,

Provincial Secretary.

Toronto, January 31st, 1909.

Sir,—

I have the honour to submit herewith, to be presented to His Honour the the Lieutenant-Governor, the Forty-first Annual Report upon the Prisons and Reformatories of the Province of Ontario, being for the year ending 31st December, 1908.

I have the honour to be, Sir,

Your obedient servant,

EDWIN R. ROGERS,
Inspector

The Honourable W. J. Hanna, M.P.P.,
Secretary of the Province of Ontario,
Toronto.

CENTRAL PRISON.

INTRODUCTION.

During 1908, the number of commitments to the Central Prison was very large, and the smallness of the Prison would not allow the admission of nearly 120 prisoners who were sentenced direct, and who would have to remain in confinement in the County Gaols.

The removal of the Central Prison to a large farm outside the city limits, and the erection of larger buildings, will, in some measure, relieve the overcrowded condition of the present prison. The different locations suggested for these new buildings have been examined, and the buildings themselves will be commenced before the summer closes.

With the erection of the new buildings, proper classification of the different prisoners sentenced will be made, and the general behaviour and work of the prisoner while under sentence will assist very materially in his own advancement to what is known as a "trusty," and under the further improvement of the Parole System and the Indeterminate Sentence it is to be hoped that when the prisoner leaves the institution he will not carry with him the stigma that in the past has always rested on those who have been confined within prison walls.

The continued increase in the cost of provisions has slightly increased the cost per capita to the end of the year.

The industries still continue to be a great benefit in the employment and reformation of the prisoners who are able to assist in the different works.

I wish to express the thanks of the Department to all the Christian Workers who have devoted their time and talents to the good work of trying to elevate the morals of those confined within prison walls, and also to those whose arms are open to receive the discharged, and in many cases find for him employment, and care for the unfortunate family who have been deprived of the bread winner during his confinement.

I wish to thank the Warden and staff for their attention and care throughout the past year.

EDWIN R. ROGERS,
Inspector.

TORONTO, 15th January, 1909.

MR. EDWIN R. ROGERS,
Inspector of Prisons, etc.,
Toronto.

SIR,—In submitting the Annual Report of the Central Prison of Ontario for the year 1908 there is not much that is new to record. The prison capacity has been taxed to its utmost throughout the entire year, and for the greater part of the year there were from one hundred to two hundred prisoners sentenced to the Central Prison who were kept in the County Jails as there was not room in the prison for them.

It is worthy of note and suggestive, that one-third of the men admitted to the prison during 1908 came from New Ontario. The transportation of so great a number these long distances is costly. One reason of New Ontario furnishing such a large proportion of the prison population is the fact that the adventurous element seek the mining regions and districts where railways are under construction.

The Central Prison Industries have been conducted economically and successfully throughout the yaer. A considerable number of men who entered the Central Prison little better than hoboes have learned useful trades, and have been able to secure positions on their discharge at remunerative wages. This condition is the basis of reformation. In this age of keen competition and specialization, unless a man is taught modern methods and the use of modern machinery he is seriously handicapped in the labor market. Skilled mechanics very seldom enter prison. The young man who spends his early years in learning a good trade seldom turns to crime. One of the greatest causes of crime is defective early environment, and properly conducted prison industries do much to repair this defect.

The Prisoners' Aid Association, the Salvation Army, and the Rev. Father Walsh have been unremitting in their efforts to benefit Central Prison inmates both spiritually and temporally. Mr. Hamilton Cassels, K. C., Superintendent of the Central Prison Sunday School is never weary in his work of faith, and labor of love. Mr. Cassels' twenty-eight years of service here has not made him skeptical of successful effort among the criminal class.

Throughout the year we have had the loyal and efficient assistance of the Central Prison Staff.

I wish to thank the Honourable, the Provincial Secretary, and yourself for your cordial support in all matters relating to the management of this institution

I have the honour te be, Sir.

Your obedient Servant,

J. T. GILMOUR,
Warden.

ANNUAL STATEMENT OF EXPENDITURE.

On Maintenance Account at the Central Prison, For the Year ending December 31st, 1908.

Service.	Total expenditure for year ending 31st Dec., 1907.	Yearly cost per head	Total expenditure for year ending Dec. 31st, 1908.	Yearly cost per head
	$ c.	$ c.	$ c.	$ c.

Total	64,043 86	160 91	66,364 80	162 63

Total days' stay 1907, 145,350 ; average 398.
Total days' stay 1908, 149,429 ; average 408.
* 15 months expenditure.

The first table shows the committals and discharges during the past three years :

	1906.	1907.	1908.
In custody at commencement of year (1st January)	400	400	409
Committed during the year	639	693	605
Total number in custody during the year	1,039	1,093	1,014
Discharged on expiration of sentence	582	587	507
Discharged on payment of fine	1	4	2
Discharged by remission of sentence	18	12	23
Transferred to common gaols as unfit for labor	....	....	4
Died in prison hospital	1	2	....
Transferred to lunatic asylum	....	5	2
Ticket of leave	39	72	62
Escaped	1	....	1
Conviction quashed	2	2	2
Remaining in custody	395	409	411
Total discharges, deaths, etc	1,039	1,093	1,014

The number of prisoners sentenced direct to the prison, and of those sentenced to the gaols and afterwards removed to the Central Prison, is shown in the following summary :

	1906.	1907.	1908.
Sentenced direct	574	645	592
Transferred from common goals	65	48	13
Total	639	693	605

Social condition.	Committed during the year.	Total commitments.
Married	154	6,627
Single	451	16,497
	605	23,124

Habits.	Committed during the year.	Total commitments.
Temperate	191	5,619
Intemperate	414	17,505
	605	23,124
Educational status.		
Could read and write	516	18,617
Could read only	3	1,292
Could neither read or write	86	3,215
	605	23,124

The prisoners received during the year who were reported to be of temperate habits represented 31.57 per cent. of the commitments; in 1907 the percentage was 29.73.

The total uneducated men represented 14.22 per cent. of the commitments of the year, as compared with 10.33 per cent. in 1907.

The table annexed shows how the prisoners were employed, and the number of days' work which was performed by them at the different industries:

	1907.	1908.
In the woodenware shop	39,985 days.	46,948 days.
In the tailoring shop	3,873 "	4.113 "
In the shoe shop	1,942 "	1,753 "
In the machine shop, including blacksmith, tinsmith and engineer's shop	13,303 "	14,036 "
In the south shop, woollen mill	6,497 "	7,506 "
In the cordage shop	20,727 "	16,364 "
In permanent improvements and work on the garden and grounds	5,090 "	5,016 "
Carpenter shop	931 "	765 "
Number of days of productive labor	92,348	96,501
Number of days of domestic work	16,971	17,587
Total number of days worked	109,319	114,088

The proportion which the number of days of productive labor bears to the total stay of the prisoners during the two years will be seen in the following summary:

1907.

Total stay of prisoners	145,350 days.
Number of days' productive labor	92,348 "
Proportion	63.53 per cent.

1908.

Total stay of prisoners	149,429 days.
Number of days' productive labor	96,501 "
Proportion	64.58 per cent.

SURGEON'S REPORT.

TORONTO, Jan., 1909.

E. R. ROGERS, ESQ.,
Inspector of Prisons, etc.,
Toronto.

SIR,—I have to report that the Central Prison may fairly claim exemption from serious epidemic or contagious diseases during the past year. There have been no deaths.

We had three cases of typhoid fever, but recovery was satisfactory. There have been many cases of influenza, but none of a serious character.

We have had more than our usual share of minor surgery, requiring care and attention, and necessitating some increase in our expenditure for surgical dressings.

We have continued to vaccinate all prisoners requiring it upon admission.

There have been no complaints as to the quantity or quality of the food during the past year.

All of which is respectfully submitted.

WM. SLOAN,
Surgeon.

CENTRAL PRISON HOSPITAL REPORT, YEAR ENDING DECEMBER 31ST, 1908.

Total number of patients in hospital	82
Total number of days in hospital	1,302
Average number of days for each	15-87
No Deaths during the year.	
Total number of calls at Surgery	6,131

I. WEBB,
Hospital Guard.

SALVATION ARMY PRISONERS' AID WORK.

SALVATION ARMY HEADQUARTERS.

INSPECTOR OF PRISONS, ETC.

SIR,—I regard the Ex-Prisoner as a man. Whatever his past may have been and however far he may have gone into sin and crime, he is still a man and well worth an effort to save. An authority has said "A man is not to be helped because he is a prisoner, but because he is a man and in a needy condition."

The work of reforming a criminal, to get destroyed in him the desire to commit crime, transforming him from a dangerous to a useful member of society, is a very difficult undertaking, still there is a good percentage who, if little trouble is taken with them, can be lead into a better way of living. The day of the prisoner's discharge is a most critical time so much depends upon how he starts life again. The attitude of society towards the released prisoner often hinders those who are trying to save him and make his lot hard. I do not excuse the wrong, but plead for such to have a chance. What impresses me with regard to these men is not that they are resentful and vicious, but that they are as helpless as babes, powerless to help themselves. What the discharged prisoner needs is a real friend who will give him the opportunity to rise and do better on the causeway of redemption, meeting him at the Prison doors,

arranging a helpful environment and providing him with some employment of some kind, for "Satan finds some mischief still for idle hands to do."

The Salvation Army is endeavoring to do this kind of work in connection with the Police Courts, Prisons and Jails of Ontario, as the following statistics will show :—

Prisoners met and dealt with on their discharge	1,457
Prisoners for whom employment has been found	655
Prisoners interviewed at Police Courts	1,958
Interceded on behalf of prisoners	921

Of these 630 were let go on remanded sentence or discharged. In addition thousands of meals, lodgings and articles of clothing have been given ex-prisoners and a number assisted with fares to the country.

Commissioner Coombs, who has charge of all Army operations in the Dominion, with myself, appreciates the kindness and consideration shown to our workers by all Prison Officials, and you may always depend upon our best efforts being put forth for the reformation of those who have fallen in the battle of life. I am, dear sir,

Yours for God and humanity,

JOSEPH S. PUGMIRE,
Men's Social and Prison Secretary.

PRISONERS' AID ASSOCIATION OF CANADA.

Report of the Board of Managers.

The Association has completed thirty-four years in the various departments of its work, and it is interesting to note the development of its usefulness. It began its work in a very small way, and its success is due to many who have labored in the interests of the class it aims to assist.

The spiritual welfare of prisoners constituted the original scope of effort. Later came the aiding of discharged prisoners, and their families, and this in turn was followed by the establisment of an evening school in the Central Prison.

Within the last ten years we have opened a "Home for Girls" in order to rescue as many as possible of those who appear in the Police Court, Jail and Reformatory for Women. This "Home" has done good work in the past and is open to women and girls who find few to extend them a helping hand.

Our most recent extension of work is the evening school in the Andrew Mercer Reformatory for Women. This, as well as the one in the Central Prison, is doing excellent work on behalf of the illiterate class who find themselves as inmates to these institutions.

By reference to the several reports herein contained and by consulting the summary of practical work shown on page 12, anyone interested can gather for himself a fairly good idea of the character and far-reaching effect of our work, as it touches the lives of so many persons.

As we enter upon the duties and privileges of another year we feel grateful to those who have in any way assisted us in our undertakings, or who have contributed of their means toward the support of our work.

We are very thankful to the officials of the several institutions for their usual courtesy, sympathy and co-operation, and the press and Ministerial Association for assistance.

Signed on behalf of the Board,

Hamilton Cassels,
President.

Report of the Central Prison Sunday School.

The year covered by this report has furnished no new features to record. The attendance of both men and teachers has been quite regular, there being scarcely any change from the preceding year. The average number of men in the school was 222, and of teachers 28.

We regret to announce the death of two of our teachers, Mr. H. Best and Prof. Jos. H. Shepard. Their presence and help will be missed in the school very much, and we trust their places will be taken by others equally faithful and efficient.

The usual courtesy and interest of the Warden, Officers and Guards have contributed towards the harmony and pleasure of the work under our supervision.

The teachers on our staff, at the close of the year, were as follows:—

Josiah Ablett, H. A. Boyd, W. B. Clark, W. A. Cameron, Wm. Jas. Christie, Alex. Chisholm, Joseph Dunlop, Henry Eymann, Kenneth Easson, Osborne A. Graham, P. A. Grandjean, A. A. Hewstone, Thomas Hitch, Robert G. Hunter, Andrew Johnston, Charles Johnston, W. C. Johnston, Martin Libby, James Longley, John McAllister, W. H. MacCormack, J. E. McCorquodale, Arthur H. McGreer, Archibald McIntyre, E. J. Mothersill, J. A. Mundell, Lawrence Newton, Fred Nicholson, Arnott S. Orton, L. V. Redman, George Roberts, Wm. Ruddy, Wm. Stephens, Horace G. Smith, Arthur W. Strickland, Seymour Tackaberry, John A. Tuer, Hubert Warner, Robert Warner, George Wakefield, A. H. Wilby, David W. White and George Williams.

Hamilton Cassels, *Superintendent.*

Report of the Central Prison Night School.

Year Ending Sept. 30th, 1908.

The work in connection with the evening classes in the Prison has been carried on four nights a week during the school year. The men, with few exceptions, continue to take interest in their work and have endeavored to learn as much as possible during the time at their disposal for secular education.

There has been an increase of over twenty per cent. in the attendance during the year, and also an increase in the number of foreigners in the school The latter are chiefly Italians, Swedes and Finlanders, who all appear to be anxious to learn to speak and write English. They comprise nearly thirty per cent. of the school.

One hundred and fifty nine were registered during the year. Sixty could neither read nor write, and in many cases even the alphabet had to be learned. Forty-two knew the alphabet and could read but little in the first reader, while fifty-one could read in part second and in the second reader.

Fifty-three were under twenty-one years of age; eighty were from twenty-one to thirty-five years old, while the remainder were over thirty-five.

The subjects taught are reading, writing, arithmetic and correspondence. Current topics of the day are sometimes referred to in a brief way just at the close of the session.

The total aggregate of school hours amounted to 8,539, or an average of 54 hours per man in the school room.

Warden Gilmour and his staff have at all times been most kind and sympathetic in their support of the school, and, as a result, have contributed in making "the schools of letters" a pleasant and profitable department of the institution

FINLAY SPENCER, *Teacher.*

MERCER REFORMATORY.

INTRODUCTION.

The increased population at the Mercer Reformatory is to be regretted, and the additional inmates during the past year have made an increase of nearly fifty per cent. To keep these prisoners employed is an undertaking, with such limited industries. The work in the laundry is the principal industry, and the capacity in this respect has been almost doubled, and discharged prisoners have found employment at this work remunerative outside the prison walls.

The net cost per capita has veen very much reduced during the past year.

The thanks of the department are due to the many Christian Workers who have done such valuable work in carrying on their labours for the good of the unfortunate souls who have been confined in prison.

The work of the Superintendent and her staff has been faithfully carried out during the past year.

EDWIN R. ROGERS,
Inspector.

TORONTO, March 9th. 1909.

EDWIN R. ROGERS, ESQ.,
Inspector of Prisons, etc.,
Toronto.

SIR,—I have the honour to submit the report of the Andrew Mercer Ontario Reformatory for females, for the year ending December 31st, 1908.

The statistical tables appended show the population, the condition of life, the work engaged in before entering the Reformatory and the industry followed by the inmates within the Reformatory.

It is greatly to be desired that the industries carried on in the Reformatory should be a distinct account as the materials used there and the skilled help employed to carry on the industries are heavy charges upon the maintenance appropriation.

I have nothing to add to the recommendations made in former reports regarding the futility of short sentences, the desirability of supervision over discharged prisoners, the great need of completing the separation within the institution of the three classes of first offenders, habitual offenders and keepers of houses, and the pressing necessity of a sufficient number of isolated cells for refractory women.

I would again urge that a teacher of letters be added to the staff.

I wish to acknowledge the devoted work of Miss Mary Kelly among the women confined here and also her continued interest in them when released from the institution.

As in past years the Ministers of the different denominations have conducted services for the women not only on Sunday but during the week; while the Salvation Army and the Prisoners' Aid Association have been unremitting in their attendance.

The Reverend Father Walsh has been unwearied in his care for the Catholic population of the institution.

To these and many kind friends who have remembered the institution on holiday occasions my thanks are earnestly tendered.

I have the honour to be,

Sir,

Your obedient servant,

EMMA O'SULLIVAN,

Superintendent.

REPORT OF THE ANDREW MERCER REFORMATORY NIGHT SCHOOL.

The month of September, 1908, brings to a close another year's work in the history of this school, which was established in February, 1902, by the Prisoners' Aid Association of Canada, and we have nothing new to report either in method or management.

At first, every inmate who wished to do so, was allowed to enter our evening classes. But, after experimenting for four years, we were reluctantly compelled, in the interest of the illiterate, to exclude all who could make out ordinary household accounts and conduct their own correspondence.

We have adhered to this decision throughout the present year, and the result has more than justified us. The teacher was able to devote her attention to those who needed assistance, and in many instances has been delighted with the progress of her pupils.

Fifty-two women have been enrolled during the year. Of these sixteen were almost totally illiterate, yet all now in the school, with one exception, are ready for Part II. Reader.

Such results are easily tabulated. But watch these weary women plodding at their books like the dullest of our little children, or with their poor stiffened fingers laboriously trying to form letters; and estimate, if you can, the moral effects.

The hour of pleasant, healthful asociations, the anxiety of these women to profit by it, the acquisition of new ideas, the habits of concentration acquired by them, and their joy in accomplishing a hitheto hopeless task, with the posibility this suggests of conquest in other directions, must all be taken into consideration in estimating the value of the School your Association has established in this Institution.

In view of the fact that younger girls are now sent to the Reformatory than formerly, I take the liberty of recommending that you extend your good work and endeavour to have a permanent Day School established here in charge of a properly qualified teacher.

As in the past, the kindness of Mrs. O'Sullivan, the superintendent, Mrs. Coad, the assistant superintendent, and all the attendants has been unfailing, and has done much to make the work agreeable and successful.

Respectfuly submitted,
S. McKenzie.

REPORT OF THE ANDREW MERCER REFORMATORY SABBATH SCHOOL.

Year Ending 30th September, 1908.

The year of work has passed and judgment rendered as to the nature of the work done and the good accomplished.

We have to report that 52 sessions were held. During the first part of the year the attendance was low, but the latter half the population of the Institution increased, and thus the school was much added to; the average of the year when compared with the previous year, shows an increase of over 30 per cent., it being 38 for the year.

The interest of the pupils does not seem to flag at all; the women and girls are all very attentive and appreciative.

The teachers have been regular in their attendance and attentive to their work. We have great reason to render thanks for the blessings that have attended our efforts to extend the Kingdom of our Lord.

The teachers are strongly impressed with the opinion that the Government should give more attention to the secular training of the women. Instead of one teacher, as now employed, there should be two, so that all the women and girls who are desirous of availing themselves of this great opportunity of improving their very limited knowledge may be obtainable.

As it is now, only the very illiterate can be, and are, attended to in the way of instruction, and indeed this section of the inmates' need heretofore was made in their favour.

It was found impracticable and impossible in the time allotted or set apart by the Institution to overtake any more than this class of those who are anxious to receive such instruction as will improve and help them when their term of solitude has elapsed and they return again to society better fitted to take their places as citizens of the State.

If two teachers were employed—one to take the more advanced and the other to take the illiterates—for one hour each day for five days each week, as at present, the result accomplished would greatly compensate the State in return for the small financial outlay necessary to be assumed by the Province.

In this path, along with the knowledge of the Word of God, the State should exercise its efforts to raise and elevate the fallen of our race who are brothers and sisters, included in the covenant of God's grace with his Son Jesus Christ.

The teaching staff consists of the following: Misses McKenzie, Howell, Wallace, Wilcox, Wordell, Mrs. Cullen Banks and Miss Hardy.

We feel deeply grateful to Mrs. O'Sullivan, the Superintendent, and her able staff, for the help and assistance they have in their many ways rendered during the year.

HUGH MACMATH,
Superintendent.

AGNES HOWELL,
Secretary pro tem.

TORONTO, February 1, 1909.

Time has brought us to a close of another year, and we gratefully acknowledge the goodness of God in permitting me to work for Him. It is impossible for one to be of any service in this work, unless our hearts are full of love and sympathy for our fallen sisters.

I also thank the Morality Department and the officers of each Institution I visit for their kindness to me in doing what they can for those who need our help.

Statistics for year ending December 31st, 1908.

Number of visits to Police Court	209
Number of visits to the Jail	89
Number of visits to Mercer Reformatory	86
Number of visits to the Hospitals	106
Number of visits to Haven and other Institutes	76
Number of calls made	1,505
Number of calls received	285
Number of letters written	685
Number of letters received	429

Respectfully submitted,
MARY KELLY.

Hospitals, Refuges and Orphanages.

In presenting the thirty-ninth annual report on the Public Hospitals, Refuges and Orphanages for the year ending September 30th, 1908, I beg to state that there are at present in Ontario:—

69 Hospitals.
34 Refuges.
30 Orphanages.
3 Homes for Incurables.
2 Convalescent Homes.
2 Magdalen Asylums.
28 County Houses of Refuge.

They have received official visits of inspection during the year and those entitled to Government aid in accordance with the terms of the Charity Aid Act have shared in the grants voted by the Legislature for Hospitals and Charities.

The Hospitals.

The records of the year indicate the continued success and progress of the Hospitals of Ontario.

Number of patients in the hospitals, October 1st, 1907	2,935
Number of patients admitted during the year	41,696
Number of births in the hospitals during the year	2,340
Total number under treatment during the year	46,971

The above figures do not include those who received medicine and treatment as outdoor patients.

Number of deaths during the year	2,748
Percentage of deaths to number under treatment	5.85
Total number of days' stay in the hospitals	1,034,591
Provincial grant to hospitals	$146,268 08
Amount received from all sources	1,278,000 16
Subscriptions, donations, etc.	140,600 69
Total expenditure for hospitals (including account $1,508,-138.74)	2,721,524 28
Average cost for each patient per day	$1 21
Percentage of Provincial grant to total maintenance expenditure	.1388

The above summary affords evidence of progress and indicates a growth of the hospital spirit that is very satisfactory. The large expenditures for hospital maintenance and on capital account are larger than during any previous year. The total number under treatment during the year was larger

than ever before. In 1898 the total expenditure of the hospitals of Ontario for maintenance was $437,034, and the total number under treatment in that year was 21,828. During the past few years a spirit of liberality has been manifested and has brought about results that are highly satisfactory. The total expenditure for the hospitals of Ontario during the past year was $2,721,524.28 and 46,971 patients were under treatment. The executive of every hospital in Ontario has during the past year felt the increased cost of maintenance. The daily cost of maintenance has been higher than ever before. The average daily cost per patient has been $1.21 per day and to meet this increased cost local philanthropy has contributed more liberally than ever before. The local hospital is year by year becoming recognized as a necessity to every large town. It is no longer necessary for a patient to undertake a railway journey to a distant city for a surgical operation, or medical treatment. The surgical and medical equipment of some of our town hospitals is superior to that found in some of our city institutions. The work that is done in some of the smaller hospitals of Ontario is equal to that of any of the metropolitan institutions anywhere. This is due largely to the well recognized fact that the establishment of a hospital in a community invariably encourages the introduction of the methods of research and treatment which modern science can suggest. The local hospital becomes a centre from which beneficial and uplifting influences radiate. No town in Ontario would permit the doors of its local hospital to be closed, although in many instances it has required no small amount of earnest, faithful work and practical benevolence to bring the financial receipts within speaking distance of the expenditures. In nearly every town and city there are local boards, the members of which have been most faithful and earnest in their efforts, and it is satisfactory to note that the results have shown that the work has not been in vain.

Provincial Aid to Hospitals.

1. A Provincial grant is made for all patients in a hospital during the first ten years of its existence at the rate of twenty cents per day, irrespective of what sum is contributed by the patients themselves.

2. After a hospital has been in existence for ten years the grant is paid only for patients for whose maintenance $4.90 per week or less is contributed.

3. In all cases the limit is 120 days and if patients remain in the hospital longer than that period the refuge rate of seven cents per day is allowed.

4. Children over one year and under twelve years are allowed for at the rate of seven cents per day.

5. No allowance is made for infants under one year of age.

6. The grant to Sanatoria for Consumptives will for the coming year be $3.00 per week for all patients for whose maintenance $4.90 per week or less is contributed.

Visit to Old Country Hospitals.

During the year an opportunity was afforded me of studying hospital methods and construction in the Old Country. A visit was paid to London, Birmingham, Edinborough, Glasgow, Belfast, and a number of the rural towns where smaller hospitals and sanatoria have been erected on modern plans. The visit was most interesting and instructive. During the past ten years marked progress has been made in hospital construction. The advances have had to keep pace with the improvements in aseptic and antiseptic methods in surgery and in the treatment of the sick generally. Much more

importance is attached to the details of sanitation than to the separation and isolation which are now deemed of secondary importance. The hospitals of Great Britain and Ireland are, particularly in the small cities, models unexcelled in the whole world. The progress made in hospital work and construction may be briefly stated to be:

1. In surgical equipment.

2. In the departments of the hospital devoted to casualties and out-patients.

3. In mechanical ventilation and the regulation of temperature.

It is most evident that an effort has been made by improvements in surgical equipment to keep pace with the immense advancement of recent years in surgery. The modern operating room and its accessories present a great contrast to such a room ten years ago. The great aim is to have as nearly aseptic conditions as can be secured. No provision is now made for a large crowd of students. Many of the best operating rooms only provide for six spectators who stand behind a glass screen. The modern operating room is smaller and its floors, walls, and ceiling are all in a condition to be closed down and steamed out daily, or even several times daily if necessary.

In the large city hospitals the improvements in the out-patient department for the sick poor are most marked, the latest development being the amalgamation of the out-patients and casualty departments in well lighted and properly ventilated quarters.

In hospital ventilation probably more careful work has been done by English architects than any other. Inspection of the different institutions and various methods of ventilation gives convincing evidence of the fact that the present period is one of transition. It, therefore, would seem very necessary for those contemplating hospital construction to watch carefully the interesting development now in progress in the matter of ventilation.

A visit was paid to several of the best hospitals for sick children, and although some were larger none was as well equipped as the Toronto institution.

All the modern hospitals are now being built in such a way as will provide abundant space by wide verandahs for open air treatment. No longer is a sofa or a bed on a balcony regarded as a special treat for a patient. The facilities for open air treatment are now regarded as an essential and valuable part of the treatment of every patient. In discussing hospital construction during the past year with a leading Superintendent in England the remark was made by him that no modern hospital was complete which did not furnish outdoor balcony accommodation for at least one-half its patients. The older hospitals in England I found were erecting balconies and fitting up roof gardens and solaria to provide for what is now recognized as essential. It is to be hoped that no new hospital will be erected in Ontario that will be without spacious balconies.

It is not necessary to make more extended reference to the many other improvements noted in hospital construction further than to express a sense of gratitude to Sir Henry Burdett, the great leader in hospital progress in England, and those Superintendents and Architects who generously gave their time and attention and supplied me with valuable plans to be kept for reference in the Department. These plans can be referred to by anyone interested in hospital construction at any time.

Toronto Hospitals.

Reference must again be called to the urgent need that exists in Toronto Hospitals for better accommodation for the sick poor. Many of the public wards are so crowded that it is impossible to satisfactorily carry on the work, and conditions are tolerated that would not be permitted elsewhere. It is not fair to the other public hospitals of Ontario which have been forced to maintain a proper standard of equipment in buildings in order to receive the annual government grant, that Toronto Hospitals are permitted to display the indifference which some manifest towards the need for improving the accommodations for the sick poor. Conditions as they are at present, and as they have been for some time, cannot be allowed to continue. There should be at the entrance to each public ward a card on the wall stating the number of cubic feet therein and the number of patients allowed in that ward. The number of cubic feet per patient should never be less than 1,500, with facilities provided for ventilation that will permit the air of the ward to be completely changed at least once each hour. The monthly return to the Department from each hospital should show whether the capacity had been exceeded: and the Government grant would be allowed only for the number of public ward patients that there was authorized capacity for. I recommend that such a regulation as the above be authorized and put in force at once for there is no reason whatever why the sick poor of Toronto should not be cared for in as sanitary surroundings as in the public hospitals in the other cities and towns of Ontario. Why should Toronto Hospitals not afford as good accommodation for its public ward patients as is provided at London, Ottawa, Brockville, Sarnia, Lindsay, Stratford, and scores of other places in the Province?

Relation of Municipality to the Hospital.

The contrast between municipal hospitals and those institutions which are controlled and directed by local boards is most marked. Fortunately in this country we have not the experience which has been so expensive in some of the American cities during the past year. There are only two or three what might be termed municipal hospitals in Ontario. Where these are located there is an absence of the hospital spirit among the people of the community. Local philanthropy is never exerted for the benefit of the hospital. It would, indeed, be a surprise for such a hospital to receive a contribution or become the object of a bequest. Not only is the hospital deprived of the contributions, and sympathy of the people of the community, but the greater privilege of giving is kept from those who would otherwise find comfort and delight in practical benevolence. There are one or two places in Ontario where the people would as soon think of making a donation to the City Hall or Street Railway as to the local hospital under municipal control and management. There is no room in Ontario for more hospitals solely under municipal control. The ideal plan is, as so largely prevails in this Province, local management under the direction of those who are actuated by a spirit of philanthropy coupled with civic pride, and are willing to administer the important trust committed to their care. These local boards, however, deserve and must receive municipal support. The Municipal Act of Ontario gives power to vote an annual grant each year for hospital support. Every city, town, village, township, and county council can exercise that power. Some of the municipalities make liberal grants towards the support of the hospitals in their midst. Unfortunately, there are many that will not take

advantage of the power they possess to vote hospital grants. Some municipalities decline to contribute anything towards paying for the hospital care and treatment their indigent patients receive. The time has come when municipalities should be awakened to a sense of the duty they owe to the local hospitals who care for their sick poor. An amendment to the Charity Aid Act might with great advantage be introduced giving hospital boards the power to collect from a municipality the actual cost of maintenance of a patient who is unable to pay for what the hospital has afforded him during his illness. The Municipal Act now gives the power for the municipality to make the grant: why not give hospitals the power to collect what the municipality owes for the care of its indigents? During the past year I have several times been appealed to by hospital boards, relating the circumstance of some poor man or woman being brought to the hospital from an adjoining municipality, but without any prospect of the hospital being paid for the patient's maintenance. When the hospital appealed to the municipality for aid no attention was paid and nothing could be done to enforce payment. This injustice should be remedied.

The Consumptive in General Hospitals.

Where no other provision is made in the community, it is wrong to refuse to admit tubercular cases to a General Hospital. With the knowledge that we now have of the life history and habits of the tubercle bacillus and with proper observance of simple precautions regarding the care of the sputum and excreta, the consumptive patient can safely be taken into a general hospital, without fear of the disease spreading. It is absolutely necessary that tubercular patients shall be kept in a separate ward, that the food left over after meals shall not be returned to the diet kitchen, and that the laundry of such patients shall be carefully sterilized before being sent out for washing. With the now well-understood precautions it would be perfectly proper for every hospital to set aside a well aired ward for the reception of tubercular cases. Any hospital which turns a poor consumptive from its doors, if there is no other place provided for him in the community, should be deprived forthwith of a share in the Government grant. The chronic cases should and must be cared for. Hitherto there has been altogether too much dread of the poor consumptive who, under discipline and management, is not by any means the menace that we have heard so much about. The only way in which consumption can be eradicated from Ontario is by local effort, and in such a movement the local hospital should be the leader. On nearly every hospital site in Ontario there is room for a shack with a wide verandah and such a building might be erected and made comfortable for the chronic cases now so often sadly neglected.

Hospitals for Consumptives.

During the past year 871 patients were admitted to the special hospitals, or sanatoria, established for the treatment and care of consumptives in Ontario. When the number admitted to these institutions is compared with the total number of cases which are known to exist it will be readily seen that only a small percentage of the number of tubercular patients in Ontario are receiving hospital care. The reason for this is largely due to the fact that the distance is often considered too great, and, therefore, the necessity is more apparent than ever for having local sanatoria established in different parts of the Province. The consumptives of each county, or group of counties,

should have separate provision made for them. The best methods of caring for tubercular patients have engaged public attention in several countries during the past year. The latest pronouncement comes in a report from a special commission appointed by the general assembly of the State of Connecticut last year. This commission has evidently made a careful study of the whole subject, and as the result of the investigations the report recommends that local sanatoria be established in the counties of the state, each county to furnish the site, and the state and county to divide the cost of buildings and maintenance. It has been found to be a mistake for a state to erect and maintain large institutions for the treatment of consumption. States which have taken that method have, after a few years' experience, realized this fact and that it would have been better to establish small local institutions than the more expensive and less useful larger ones. The report of the Connecticut Commission is a valuable contribution and may be taken as agreeing with the best thought of those who have made a special study of all the plans devised for fighting the white plague. It is remarkable how the report of the Connecticut Commission agrees with the plan agreed upon in Ontario and from which there should be little deviation. The Ontario Government grant to every municipality establishing a local sanatarium for the treatment of consumptives is $4,000, and afterwards it makes a liberal contribution towards each patient's maintenance. It seems strange that municipalities are slow in taking advantage of this liberal provision. The idea has prevailed that in establishing local sanatoria it would be necessary to copy the usual methods of hospital construction, and the question of expense has stood in the way. Expensive and ornate constructions should not be thought of in preparing plans for the housing of consumptive patients. The one aim should be to provide for a maximum amount of pure air at a minimum expense in architectural outlay. A frame building with wide verandahs and a few shacks comfortably fitted up would surely be an investment that every county in Ontario could profitably make. The many instances that we have in Ontario where consumption has been cured is assuring evidence that should justify the establishment of municipal sanatoria, especially when the Government grant is liberal. The districts in Germany, England and Scotland that have had sanatoria established for several years demonstrate the fact that these institutions are never a menace to the community where they are located On the other hand, it is clearly shown that there is less tuberculosis in the immediate neighborhood of the institutions than there was previous to their establishment. We know that Gravenhurst has not suffered in any sense by having the two hospitals for consumptives so convenient thereto. This country is gradually awakening to the proper methods of dealing with the white plague and the next decade will no doubt bring about greatly increased sanitarium facilities for the proper care of the consumptive individual. The establishment of these local institutions will not only effect a cure, or improvement, in patients under their shelter, but one of their great missions will be to teach a proper mode of life to the community in general and to the consumptive in particular. They will spread the gospel of a life in pure air as the only proper mode of life for every human being.

The example of the Hamilton Health Association shows what could be done in many other places in Ontario. The Mountain Sanitarium at Hamilton has had a most successful year, and the establishment was due to a few philanthropic citizens forming an Association and establishing a local sanitarium on a farm convenient to the city.

Education in Regard to Consumption.

During the past year there has been, at the suggestion of the Honorable the Provincial Secretary, a great forward movement in education in regard to consumption. Under the direction of the Provincial Board of Health an exhibit was prepared for the purpose of demonstrating the modern methods for the open air treatment of tuberculosis. This exhibit has been shown in many places in Ontario and the interest taken has clearly demonstrated the fact that the people greatly appreciated the effort made to demonstrate the means devised to combat the disease. An incalculable amount of good must come from these efforts to enlighten the public in regard to the nature and methods for the cure of consumption. If people were properly educated, not frightened, in regard to the disease a more rational view would be taken and the steps necessary for its prevention and cure would be better understood. The result would be seen in the disease being gradually but certainly exterminated from Ontario. There should be in at least twenty of the hospital centres of this Province a public dispensary established along lines similar to the tuberculosis clinic in connection with Toronto General Hospital, and the one under the direction of the Hamilton Health Association. No one can estimate the value of the work which a well conducted dispensary, with the visiting nurse attached thereto, can do not only in prescribing for the patients but in teaching them how to live. The visiting nurse going to the homes of the patients and seeing that the surroundings are made and kept right fills a mission of the highest importance. The distribution of cards and literature for the guidance of patients is also another method of teaching the public the simple but effective ways by which the disease may be prevented. The day will surely soon come when in Ontario we will have compulsory notification, not for publicity, but in order that the local health authorities may be able to locate every case and make sure, particularly among the poor, that the best methods are known and being followed to effect a cure and prevent, through neglect of the sputa, the danger of contagion.

The Undesirable Immigrant Class.

Attention must again be called to the fact that a large number of undesirable and unsuitable immigrants have been induced to come to Ontario and have, shortly after landing, become a public charge on our hospitals and charities. There are no more benevolent and patriotic people to be found anywhere than those who so generously support the charitable institutions of this Province. They have just reason to complain of the unreasonably large number of dependants and defectives that some designing agencies have induced to seek shelter here. The most kindly spirit has been displayed by our charitable organizations to provide for the needy and the sick, but when week after week cases are reported that should have been kept at home and apparently were only sent to Canada to be gotten rid of, it is little wonder that protests are made. Any system that permits Government, steamship, or any other agency to induce immigration, without proper discrimination, cannot be defended. During the past year it has cost the hospitals and public charities of this Province of Ontario many thousands of dollars to provide for people who should never have been allowed to embark for this country. The fault lies in the system that allows these poor people to have their little means taken from them on the other side of the Atlantic and told they will be well looked after in Canada. The time and place to check the undesirable immigrant is when proposing to leave his domicile in the Old Country. For example: in November last, a young man who was a well known epileptic in Newcastle-on-Tyne, and who had attacks of his disease, frequently, both before

and during his trip to this country, landed in Canada. He came to Toronto and went to work on a farm in the country, exactly four weeks from the date of his arrival. During an epileptic seizure he shot the farmer with whom he was living and after trial was sent to a public institution where he must remain in custody for the rest of his life. Such a case might, with little investigation, have been prevented from emigrating to Canada. In August I saw a poor consumptive being helped on board a steamship at Glasgow bound for Canada. He was so frail he could scarcely walk. Before landing at Quebec I protested to the ship's surgeon that such a man should not have been permitted to emigrate from the Old Country, and that he would certainly become at once a public charge in one of our hospitals. The poor fellow was not permitted to land and was returned on the same ship. The ship surgeon afterwards wrote me that this patient died on board before reaching his native land. The large expenditure that it costs the public charities in this country to care for the helpless consumptives, epileptics. etc., that come to Canada, might be in a large measure curtailed if a rigid system of investigation and inspection was established before allowing undesirable emigrants to embark for Canada.

City Refuges Receiving Government Aid.

There are 44 refuges and homes in Ontario receiving Government aid. The total population of these homes during the past year was 5,947. The total expenditure for their maintenance during the year was $351,877.86. Towards this expenditure the Government contributed $75,-572.30 to be divided among these institutions at the rate of seven cents per day, as provided for by the Charity Aid Act, according to the length of residence of inmates, the balance of the expenditure being contributed by subscriptions, bequests, municipal grants, etc. These refuges have all been visited and inspected, according to statute, and suggestions made in some instances for their improvement. Criticism has to be made too often in regard to the number of inmates being in excess of the accommodation. Overcrowding poorly ventilated dormitories has frequently to be complained of It is difficult to lay down a hard and fast rule in regard to the number of beds that should be permitted in each room; but there is a general regulation that in every dormitory there must be a space of at least two feet between each bed, and that each sleeping apartment must be properly ventilated. In visiting some of the refuges in Great Britain, during the year, I found that at the entrance to each dormitory there was a card stating the number of cubic feet that room contained, and below this the number of inmates allowed for that apartment. Each inmate must be allowed at least eight hundred cubic feet of air space, and the system of ventilation must provide a complete change of air throughout the room at least every hour. It would be an excellent regulation to introduce in the refuges of Ontario.

Attention has had to be called on the occasion of inspection, in some instances, to that clause in the statutes relating to refuges which states that no child between the ages of two and sixteen years shall be received or boarded in any House of Industry, House of Refuge, or other institution established for the reception and care of paupers or other dependent adults. This is a regulation that must be enforced and the Government grant should be withheld from any institution violating this statutory enactment.

While we are gratified with the evidences of philanthropy that provides homes for the aged and infirm, care must be taken that we do not fall into the mistake which has been created in some countries and build up a system that encourages thriftlessness and consequently pauperism. Only those

who are incapacitated by the infirmities of age should seek assistance. England to-day, is struggling under the tremendous burden of its work-house system, not so much on account of its enormous cost as on account of its undermining influence on British character, breeding as it does a population of spiritless paupers. Pauperism is a condition created by indiscriminate charity. This we must seek to avoid. The management of our city refuges have a great task in working out plans that will avoid creating conditions in this country that have proved harmful in Great Britain.

It is gratifying to note that there has been considerable improvement in the facilities for fire protection at these refuges. Too great caution cannot be taken to have constantly at hand not only simple and effective means for checking a fire, but also a recognized and well understood system for the quick removal of the inmates if danger should be threatened. Those in charge of these refuges have in nearly every instance cheerfully complied with the suggestions that have been given, and it is pleasing to record many observed incidents indicating faithful and conscientious devotion to duty in caring for the old and infirm committed to their care.

County Houses of Refuge.

There are now 28 County Houses of Refuge which, by the Act of Legislature of 1906, were brought under inspection of this department. The average number of inmates during the year was 1,533. The statute enacts that the Inspector shall make such recommendations and suggestions in relation to the management of these institutions as he may deem best. These recommendations, however, the county council may carry out or ignore, as it pleases. The majority of these municipal institutions are well conducted and afford comfortable homes for the indigent old people sent thereto. There are a few, however, that are not properly managed, and in these, on account of general neglect, there is not the comfort afforded that might be obtained under better conditions. In the Province of Ontario there are some Houses of Refuge that are not surpassed anywhere, and in some counties these institutions reflect the greatest credit on the liberal spirit that has provided such homes for their aged. There are some, fortunately only a few, that no amount of suggestions or recommendations seem to improve. In such the unfortunate inmates seemed to be left to take care of themselves and the sick were apparently neglected, and all because of the parsimony of the local authorities who were unwilling to provide sufficient help to care for the inmates properly. In one of the largest and most wealthy counties in the Province, with a House of Refuge having a male population of 57, one large room in the basement has to serve the purpose of a sitting room, a smoking room and a dining room. In such, unsanitary conditions might well be expected with evidence of neglect on every hand. On account of the beds being improperly looked after and no proper provision made for the care of clothing, vermin and other pests have apparently to be tolerated by the unfortunate inmates. No institution supported by public funds should be maintained in an unsanitary state. To remedy these conditions statutory authority should be given to enable the Department to prescribe a uniform system for the whole Province in the management of these homes. In the Hospitals for the Insane the Department prescribes the number of nurses and attendants for each institution in accordance with the number of patients being cared for. Until that is done it seems little improvement can be expected in the few counties in Ontario that have disregarded reasonable recommendations and suggestions for improvement. Statutory enactments might well be made to compel the counties to remove from the Hospitals for the Insane many of the harmless, quiet, old people who are not insane and would not

be permitted to remain in such institutions if they had not become poor and friendless. The County of Waterloo has generously taken some old people, who had for years been confined in the institutions for the insane, and given them the larger liberty of life in the country at the House of Refuge. Special mention is made of this, as an instance illustrating a spirit of benevolence that other counties might well adopt. The last report of the Inspector of the Hospitals for the Insane calls attention to the hundreds of quiet, harmless, old people who are kept in those institutions, who should be removed and cared for in the counties from which they were originally admitted. There is altogether too great a disposition to expect the Province to support those whose care and maintenance rightly belong to the counties. Only legislation will correct some of the anomalies that prevail.

Orphanages.

During the year 30 orphanages in Ontario have received Government aid. These institutions had a total population of 4,718 children. The total expenditure for the maintenance of these charities during the year was $157,592.01. The Government's grant to assist in meeting that expenditure was, at the rate of two cents per day, $17,388.05, the balance being contributed by private donations, municipal grants, etc. An official visit of inspection has been paid to each of these institutions. Each year attention has to be called to the overcrowding found in many of the orphanages; especially in the dormitories too many children are crowded together, and in some the lavatory facilities are found deficient and unsanitary. The number of children now in the orphanages of Ontario is larger than for several years. This is not a hopeful sign. The best institution is a poor substitute for the home. The Children's Aid Societies throughout Ontario have more applications for children for adoption than can be supplied, and it seems wrong that so many children should be kept in orphanages who might be adopted into comfortable homes. Nearly all the institutions for the care of children in Ontario are well managed, but at best the life of a child therein is deprived of that broadening development that comes from intercourse with outside children. The environment in childhood has a potent influence in moulding character. No matter how kindly cared for they may be in these institutions there is lacking many of the elements that make for rugged upbuilding of character. We are yearly providing in Canada comfortable homes for hundreds of children brought out from the orphanages of Great Britain, while keeping so many of our native born young Canadians housed in our own institutions. The majority of people taking old country children express a preference for the Canadian born, but for some reason their wishes cannot be complied with. The fault lies, I am convinced, not nearly so much with the people in charge of our orphanages as with the persons who commit children to these institutions with the expressed understanding that they must be kept there and not given out for adoption into private homes. I have expressed the opinion that the rules governing the admission of all inmates should be changed so as to compel the management of all our orphanages, after a child has remained a certain period, to provide for adoption into the homes now seeking such children. Just as soon as an orphanage becomes a boarding school the Government grant should be withdrawn. It will probably be necessary for some well defined regulations to be issued shortly that will correct the sentiment that keeps the children, who might be given out for adoption, shut up, instead of sending them to homes in the country where they would be well cared for.

R. W. Bruce Smith,
Inspector.

TABLE I.—Showing the general movements in each hospital separately,

Hospitals.	Location.	Dormitory capacity in beds.	Number remaining under treatment on 1st Oct., 1907.	Number admitted during the year ending 30th Sept., 1908.	Number of births in hospitals during the year.	Total No. under treatment during the year ending 30th Sept., 1908.	Number discharged during the year.	Number who died during the year.	Number remaining under treatment on 30th Sept., 1908.

County of Bruce House of Refuge.

ORPHAN ASYLUMS.

The statistical tables on the following pages of this report show an increase in the contributions to several of the Institutions, while in some cases there is a falling off as compared with last year.

The total number of children cared for in the Orphanages during the year was 4,718, as compared with 4,426 in 1907.

In the tables will be found full details of the receiving and discharging of children, etc.

The statistics relating to the sex and previous residence of the inmates are given in the following summary :

Sex.

Male	2,416
Female	2,302
	4,718

Previous Residence.

Received from cities in which Orphanages are located	3,275
Received from counties in which Orphanages are located	826
Received from other counties in the Province	474
Immigrants and foreigners and unknown	143
	4,718

REPORT

ON THE OPERATION OF THE

LIQUOR LICENSE ACTS, ONTARIO

FOR THE YEAR 1908

PROVINCIAL SECRETARY'S OFFICE,
LICENSE BRANCH.

TORONTO, 1st January, 1908.

To the Honourable JOHN MORISON GIBSON, ESQ., K.C., LL.D.
Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

I have the honour to submit the Thirty-third Annual Report, and accompanying Schedules, respecting the operation of the Liquor License Laws of the Province.

In doing so I would call attention in the first place to the fact that the Tavern, Shop, Club and Wholesale Licenses for the License Year 1907-1908 have been reduced by 90 as compared with the previous year.

In Local Option municipalities the law has been vigorously enforced, and fines collected amounting to $5,940.00.

The Provincial revenue from the License Branch for the financial year ending December 31st, 1908, was $577,771.11.

Number of Licenses.

Schedule A is a comparative statement of the number of Licenses of the various denominations issued, and of the number extended and transferred in each of the License Districts of the Province during the past three license years, and may be thus summarized :

Years.	Licenses.								Extensions and transfers of licenses.		
	Tavern.										
	Yearly.		Six months.								
	Ordinary.	Beer and wine.	Ordinary.	Beer and wine.	Shop.	Wholesale.	Club.	Total.	Extensions.	Transfers.	Total.
1905-6.....	2,366	18	51	3	283	24	.....	2,745	126	751	905
1906-7.....	2,197	10	47	3	267	23	24	2,571	54	281	335
1907-8.....	2,102	8	43	3	265	25	35	2,481	52	420	472

Provincial Revenue.

The same Schedule shows the revenue derived by the Province from Tavern and Shop Licenses, Transfers, Fines, etc., to have been for

1905-6	$330,430 33
1906-7	471,827 76
1907-8	497,195 15

Licenses in Counties and Cities.

Schedule B is a statement of the number of licenses issued in the several Counties and Cities during the past thirty-three years.

Licenses in Minor Municipalities.

Schedule C gives in detail as regards each City, Town, Incorporated Village and Township, and Unorganized Territory of the Province, the number of Licenses, and of extensions and transfers granted during the past three years.

Total Collections

This Schedule also gives the amounts collected on account of Licenses and Fines, including the sums imposed by municipal by-laws, the totals of which were as follows :

1905-6	$657,813 44
1906-7	991,652 86
1907-8	1,020,233 36

Municipal Revenue.

The payments to the Municipalities are shown by the same Schedule to have been in

1905-6	$241,019 57
1906-7	411,916 71
1907-8	411,041 92

The amounts imposed in each Municipality by by-laws, in excess of statutory duties, are also given in this Schedule.

Fines.

The fines collected during the past year, as shown by Schedule D, amounted to $32,850.00, the largest amount ever collected.

Salaries of Inspectors—Expenses of Commissioners.

The payments under these heads are also shown in Schedule D.

Miscellaneous Expenditure.

Schedule E shows the expenditure of enforcing the Act in the several districts other than those included in Schedule D, consisting of office rent, postage, stationery, printing, advertising, magistrates, constables, witness, counsel and detective fees, etc., etc.

Schedule F shows names and addresses of Distillers, Brewers, Brewers' warehouses and Wholesalers licensed by the Province.

Commitments for Drunkenness.

Schedule G shows the number of Prisoners committed for drunkenness during the years from 1876 to 1908 inclusive. The number committed during the year 1908, as compared with 1907, shows a decrease of 30.

The average yearly commitments for each period of five years from 1876 to 1905 inclusive are as follows:

From 1876 to 1880 inclusive		3,812
1881 to 1885	"	4,016
1886 to 1890	"	3,311
1891 to 1895	"	2,703
1896 to 1900	"	1,920
1901 to 1905	"	3,186

The statutory duties payable for wholesale, tavern and shop licenses, are set out in Schedule H.

The Municipalities in which Local Option By-laws are in force, and detailed statements showing the vote polled are given in Schedule I.

A statement showing the number of prosecutions under the Act and the result thereof will be found in Schedule J.

Schedule K shows fines imposed and collected where Local Option is in force.

The names and post office addresses of Inspectors of Licenses are set out in Schedule L.

Statement showing the Revenue of the Province from Liquor Licenses for the *financial years*, 1906, 1907 and 1908 is given on page 153.

Special Inspection of License Districts

The special inspection of the License Districts, and the examination of the work of the license officials therein, from time to time, have been continued during the past year.

Respectfully submitted,

W. J. HANNA,

Provincial Secretary.

SCHEDULES.

1907	2,110	262	25	.....	35	2,432

The Six Months' Licenses and the Licenses *extended* do not appear in the above Schedule or recapitulation, and as a consequence the total number of Licenses issued, according to the Statement, does not correspond with the number as shown in Schedules A and C. Beer and Wine Licenses are included with the ordinary licenses, under the heads of Tavern Licenses and Vessel Licenses respectively. An *extended* License is good for a period not exceeding three months. It is not in the nature of a new License, but simply a permission, granted by the Board of Commissioners, to the holder of a License expiring in April, to continue his business under the old license for the specified period, that he may be able to dispose of his stock on hand and quit the business without loss. Six Months' Licenses run from the first day of May to the thirty-first day of October, and are not valid after the latter date. They are granted to localities which are largely resorted to in summer by visitors, where the Board of Commissioners are of the opinion that increased tavern accommodation for the summer months is necessary.

SCHEDULE C.

SCHEDULE C.

COMPARATIVE STATEMENT BY MUNICIPALITIES, showing the number of Provincial Licenses issued, whether ordinary or Beer and Wine and Club, and the number extended and transferred and number of bartenders' licenses issued, and for fines, the gross sums deposited to the credit of the License Funds Accounts therefor, the amount imposed by Municipal by-laws for licenses in excess of statutory duties, for the license years 1905-6, 1906-7 and 1907-8 and the revenue paid over to the Municipal treasurers on account of the license years 1905-6, 1906-7 and 1907-8.

TWELFTH ANNUAL REPORT

OF THE

Provincial Municipal Auditor

FOR

1908

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO

TORONTO:
Printed by L. K. CAMERON, Printer to the King's Most Excellent Majesty
1909.

WARWICK BROS' & RUTTER, Limited, Printers,
TORONTO.

Parliament Buildings,
January, 1909.

To the Honourable J. J. Fox, K.C., M.P.P.,

Attorney-General.

Sir,—I have the honour to present to you my report for the year 1908.

J. B. Laing,
Provincial Municipal Auditor.

To His Honour the Honourable JOHN MORISON GIBSON,

Lieutenant-Governor of Ontario.

MAY IT PLEASE YOUR HONOUR,

I have the honour to present to you the report of the Provincial Municipal Auditor for 1908.

J. J. FOY,
Attorney-General.

Parliament Buildings,
January, 1909.

Report of the Provincial Municipal Auditor, 1908.

PARLIAMENT BUILDINGS,
TORONTO, January, 1909.

TO THE HONOURABLE J. J. FOY, K.C., M.P.P.,
Attorney-General for Ontario.

SIR,—I have the honour to submit to you the twelfth annual report of this Department which continues to show activity in the state of the accounts throughout the province with a decided tendency towards bettering in some of the conditions although not as much as might reasonably be expected. There is a painful lack of encouragement shown by the greater number of the municipalities in the payment of their officers, especially the Treasurers' salaries in most cases paid to these officials should be doubled and then they would be small enough. Until the corporations interested show more interest in remunerating their officers, they can scarcely expect much improvement in their book-keeping.

The following is a list of the inspections and examinations made by myself during the year of 1908:—

Village of Arkona, County of Lambton.

Total receipts for 1907	$3,366 05
Total payments for 1907	3,058 64
Balance on hand	$307 41
Receipts to 13th March, 1908	$329 85
Payments to 13th March, 1908	108 38
Balance on hand	$221 47

Total assessment of municipality for 1907, $108,683.61. Collector's roll for 1907, $1,789.51; paid in full. Tax rate 15 mills on dollar. Treasurer's salary $10 per annum; 5 years in office. Assets including schools and Town Hall, about $5,000. Liabilities, $4,000. Books fairly well kept, Government Form.

Village of Wyoming, County of Lambton.

Total receipts for 1907	$17,268 23
Total payments for 1907	16,812 52
Balance in Treasurer's hand	$455 71
Receipt to 1st March, 1908	$1,167 03
Payments to 1st March, 1908	352 39
Balance in Treasurer's hands	$814 64

Total assessment of municipality, $128,824.50. Collector's roll for 1907, $3,708.88. Tax rate, 25 mills. Schools value at $6,000. Debentures, $7,000. Uncollected taxes, about $1,000. Treasurer's salary, $25 per annum; 2 sureties for $2,000 in all. No sinking funds. Treasurer in office 23 years. Fairly good officer.

Village of Watford, County of Lambton.

Total receipts for 1907	$23,363 86
Total payments for 1907	23,034 20
Balance in Merchants' Bank, Watford	$329 66
Receipts to 7th March, 1908	$4,530 41
Payments to 7th March, 1908	4,006 80
Balance in Merchants' Bank, Watford	$523 61

Total assessment of municipality, $365,593. Collector's roll for 1907, $9,142.18; paid in full less $11. Tax rate, 22 7-10 mills. High Schools and Public School well managed. Treasurer is a fairly good officer, only receives $35 per annum, been in office 10 years. Total assets $40,924.73. Total debentures, $30,261.31. Treasurer sureties, bond and personal for moderate sum.

County of Lambton.

Total receipts for 1907	$102,755 51
Total payments for 1907	91,727 26
Balance in Traders Bank, Sarnia, 31st Dec., 1907.	$11,028 25
Receipts to 11th March, 1908	$28,310 85
Payments to 11th March, 1908	21,127 53
Balance in Traders Bank, Sarnia, 31st Dec., 1907.	$7,183 32

Total assessment of county, $31,350,000, equalized assessment. County rates, collected 1907, $48,201.17. To Wollich $3,115.39. Tax rate 1½ mills. Treasurer's salary, $1,100 per annum; 14 years in office. Treasurer's securities, 4 names ample, $20,000 own security. Total assets, county property, $102,758.42. Liabilities, including Traders Bank, $15,000, $26,166.18.

Municipality of Point Edward, County of Lambton.

Total receipts for 1907	$6,402 46
Total payments for 1907	5,805 94
	$596 52
Receipts to 11th March, 1908	$1,397 32
Payments to 11th March, 1908	1,030 72
Balance	$366 60

Total assessment of municipality, $263,000. Collector's roll for 1907, $4,790.50. Tax rate, 15 mills. Debenture registrar, $17,030.91. Treasurer's salary, $75 per annum; in office 5 years. Treasurer's security, guarantee bond for $2,000. Assets, uncollected taxes, $1,500; Town Hall, $1,500; real estate, $875; cash, $596.52; miscellaneous, $98.54; total $4,569.06. Liabilities, debentures, etc., $20,470.69.

Municipality of Sarnia, County of Lambton.

Total receipts for 1907	$664,068 33
Total payments for 1907	643,698 63
Balance	$369 70
Receipts to 1st March, 1908	$99,872 80
Payments to 1st March, 1908	99,422 29
Balance in Treasurer's hands	$450 51

Total assessment of municipality, $4,658,045.00. Collector's roll for 1907, $125,112.54. Paid on this roll 11th March 80, $74,876.83. Tax rate, 21 mills. Debentures, $680,416.29. REPORT OF SPECIAL INSPECTION, AUDIT AND EXAMINATION OF THE BOOKS, ACCOUNTS, VOUCHERS AND MONEYS OF THE MUNICIPAL CORPORATION OF THE TOWNSHIP OF DOVER IN THE COUNTY OF KENT.

Upon the authority of an Order-inCouncil approved by his Honour, the Lieutenant-Governor of the Province of Ontario, the 28th day of June, 1907, A. F. Falls, Chartered Accountant, of the City of Chatham, was instructed and empowered to make an inspection, examination and audit of the books, accounts, vouchers, and moneys of the Municipal Corporation of the Township of Dover, in the County of Kent, under the provisions of Chapter 228, R.S.O. 1897.

In pursuance of the said authority and instruction, the said A. F. Falls hereby reports that he has made an inspection, examination and audit of the various accounts of the said Corporation.

The audit is made upon the petition of certain ratepayers, addressed to the Provincial Municipal Auditor.

The petition requests that the examination be made for the following reasons: —

(1) We think that the system of book-keeping in the said Township is out of date, antiquated and altogether insufficient for the proper accounting of the finances of the Township.

(2) The tax rate in the said Township is abnormally high and your petitioners believe that many items are charged to the general funds of the township that should be charged up. under the provisions of the Municipal Drainage Act to certain drainage areas.

(3) Some of your petitioners have been residents and ratepayers of the said Township for forty years, and never in that time has there been an audit of the books of the township by an expert accountant. The auditing is being done from time to time by men whom your petitioners consider are not properly trained for that purpose, and your petitioners have no confidence in the audits that have from time to time been printed in respect of the Township Accounts.

(4) According to the last auditor's report, the Auditors state that they are of the opinion that there is enough money collected from Statute Labour Tax (commutation) to grade and maintain the roads in a proper condition throughout the Township, if properly managed; but notwithstanding that statement in the report, the Township appropriated, according to said report, from the general funds for the maintenance of the roads and bridges the sum of Fourteen hundred dollars and actually spent Two thousand four hundred and twenty-five dollars and fifty cents ($2,425.50), showing the account of roads and bridges for 1906 overdrawn to the extent of $1,036.70.

Scope of Audit.

The inspection and examination under the authority of Order-in-Council covers the accounts of the Municipality since 1897. Under authority of by-law No. 19 passed Oct. 17, 1907, by the Council of the Municipal Corporation of Dover, the audit was extended and carried down to Dec. 31, 1907.

John Welsh, Clerk, has held office as clerk continuously during the period covered by the audit.

Medric Carson, Treasurer, has held office as treasurer continuously during the period covered by this audit.

In conformity with my usual custom, the petitioners, members of Council and other ratepayers were invited to attend at the Township Hall, Dover, upon the 3rd day of October, 1907, then and there to furnish such information or make such statements and charges as to them might seem meet, respecting the conduct of the municipal affairs of the said Township.

No specific charges were preferred. Complaint was made, however, that the drainage accounts generally, had not been kept properly, and that certain sums had been charged roads and bridges and division accounts which should have been charged to the drain from which the earth was dredged and placed on the road.

With reference to the four complaints in the petition these will be taken up in their order:—

Book-keeping.

(1) There was good ground for complaint on the manner in which the book-keeping was done. The ledger did not contain all the accounts that it should. No account was kept in the ledger for the fixed assets of the Township, such as town hall, lot and building, these should be in the treasurer's ledger and in the audit report among the assets of the Township. There was no pretence at keeping the ledgers in balance, the total debits equal to the total credits before this audit. The system of book-keeping with recommendations for changes is referred to elsewhere in this report.

Tax Rate.

(2) The complaint that the tax rate is high, and that items were charged to the general funds that should be charged to Municipal Drainage areas, on examination has disclosed the fact that while some items were charged to the General Funds of the Township that should have been charged to drain accounts, yet the amount charged to drain accounts which should have been charged to general funds was very much greater. The one account of Little Bear Creek Drain was improperly charged with over one thousand dollars, being part of the cost of constructing two bridges over the drain on the Bear Line, the balance of the cost was charged to roads and bridges account. This has been corrected by entries crediting to the drain account and charging roads and bridges. The maintenance of these two bridges is a charge on the general funds of the township and not the drain.

The general tax rate of the Township for the last ten years is as follows:—

1898	6 Mills	1903	7 9-20 Mills (1 M. Small-pox).
1899	6 Mills		
1900	6 1-10 Mills	1904	6 7-10 Mills
1901	6 5-10 Mills	1905	5 5-10 Mills
1902	7 2-10 Mills (1¼ M. Small-pox).	1906	6 3-10 Mills
		1907	6 9-10 Mills

The values at which property is assessed is low in comparison with values as reported on by Judge Bell, in connection with the County equalization. The total taxes raised in 1907 from statements furnished the Treasurer by the Clerk,, amounted to $34,559.04. The following will show how they were applied:

Levy on 1907 Tax Rolls.

Ratepayers on drains to meet debentures		$11,287 60
Township portion for roads and drains to meet debentures		3,109 77
County rate including special School rate and care of inmates in House of Industry		4,108 86
Schools including School Debentures Levies		9,135 03
Total uncontrollable taxes on roll		$27,641 26
Amount under control of Council for the year for current expenditures		6,917 78
The total of 1907		$34,559 04

The amount controllable by Council is $6.917.78, out of which $688.28 was used to meet township's portion of bridge over Rivard Drain at 6th concession, the balance is all that is under the control of the Council to provide for Salaries, Board of Health, Relief of Poor in Township, Law Costs, repairs and work on roads and bridges and on pathmasters' beats, township's portion award drains, sheep killed, repairs to Town Hall, stationery, printing, postage and miscellaneous expenditures.

From the above it will be seen that of the total tax roll, 80 per cent. is raised for purpose for which the Council for the year have no control.

The increased amount of drainage, for which the roads are assessed is one of the chief causes of the increase in the tax rate.

Yearly Audits.

(3) The number or corrections in drainage and other accounts explains the foundation for this complaint.

Expenditure on Roads.

(4) The complaint about expenditure on roads, of $2,425.50, in roads and bridges account in 1906. This amount includes a charge of $470.00 for new scrapers. In addition to amount charged the roads and bridges account, there was expended on roads, by the various pathmasters of beats, in 1906 over $1,000.00.

At the present time there are over 60 pathmasters, besides the members of the council, who exercise just as much power to have work or repairs done on the roads of the township and to issue orders for the work, as the Reeve. The amounts expended for this work are not made public, by statements at the Council meetings.

The amounts of these disbursements of the township funds, to whom paid, what for and how much, cannot be ascertained by the ratepayers till the annual audit report is published.

No check is kept on the pathmasters to see that they do not overdraw the amount advised by the clerk in writing that they may expend on their beat. As a result a number of the beat accounts were overdrawn, December 31, 1907.

In reference to pathmasters' orders, the evidence given by F. Rankin, Reeve, is as follows:—

"These are issued on the reeve for work, and there is no means of the reeve knowing how funds of the beat stand, when the order is presented for his signature. The pathmasters have no right to issue orders that exceed the amount at the credit of their beats, as notified by the clerk in writing."

The expenditure on roads would be made much more economically, if the number of those with authority to expend money, was reduced to four at the most, who would be directly responsible to the ratepayers. This subject is referred to elsewhere under the heading of statute labour.

The complaint in reference to charges to roads and bridges and division for repair to roads by dredge, made by one of the ratepayers. This is answered by the written question submitted to Matthew Wilson, K.C., and his written answer to the same, as follows:—

Washouts of Roads.

Questions Submitted.

By floods, part of a road on the higway in the township was washed away. There was no means of procuring material to repair or build up the road again without purchasing land, or dredging earth out of the drains in the locality where the washout took place. The Council made arrangements with the Dredging Company, when the dredge was returning from completing work on a drain, which passed close to where the washout took place, to dredge out a narrow strip of land left between two dredge cuts, which the engineer's report on the drain did not require to be removed, and place the earth dredged out on the highway to build up a good road. The earth cost nothing and its removal was not to improve the drain, but to make the road. Objection has been made to charging $50.00 to the road division, and $150.00

to roads and bridges for this work. The contention being that the drain from which the earth was removed should be charged with the work.

Was the amount properly charged?

Would the municipality have to pay the cost of repairing the road in any event, whether the washout was caused by the waters from the drain or not?

Matthew Wilson's Opinion.

"The drain should not be charged with the cost of this work, which was done not as part of the drainage work, under the report of an engineer, but for the purpose of making the road. The amount should be charged to roads and bridges, and paid out of the general funds of the Municipality. When I mentioned that a charge should be made to the account for roads and bridges, I did not exclude an allowance charged against the Division or a Commissioner or Pathmaster, for the purpose of roads and bridges. I merely mean that the work should not be charged to the drainage work, but should be borne by the Municipality as if the Drainage Act did not exist.

The Municipality must pay the cost of repairing the roadbed, whether the washout was caused by the drain or not, unless the roadbed is an embankment forming part of a drainage scheme, in which event any repair necessary to keep up that embankment is a repair to the drainage work, and should be charged to the drainage area."

Having dealt with the specific complaints. I now come to the consideration of the affairs of the township in other particulars, and as is usually the case, the examination has disclosed irregularities and discrepancies not surmised or suggested by those who petitioned for the audit.

The complaint in reference to the drainage accounts is taken up fully under the drains later on.

Assessment and Collectors' Rolls.

The Assessment Rolls do not contain list of the property exempted with valuation in detail. The acreage assessed for different year varies in the roll.

The description of some of the property in the Assessment Roll is too vague. On this account the County Treasurer has not been able to charge some of the arrears returned, on account of not procuring proper descriptions. This should be taken up by the Council, with the solicitor. The County Council had their attention called to the lack of plans in County Audit report of 1906, and on June 7, 1907, the finance committee recommended in clause 2 of report adopted by the County Council; That the treasurer's office be furnished with plans of all the subdivisions of Townships and villages and copies of same to be sent to Municipalities.

If these plans were procured and used by the assessor in his work the township clerk would be saved much worry and trouble and the taxes charged up to the proper descriptions, when in arrears, by the County Treasurer.

The assessment rolls have been compared with the Collector's roll for each year covered by the audit and have generally been found accurate.

The schedule or summary of the collector's tax rolls necessary to comply with statutory requirements does not appear in the roll for any year covered by this audit. In lieu of the summary a statement is made to the treasurer giving the amount to be charged the collector of each division, with a list of amounts to be credited the various accounts for appropriations, school sections for amounts on the rolls and the drainage debenture rates to meet maturing debentures. This list does not show the exact amount collected

on the roll against the lands for each drainage by-law, but instead gives the amount that should be on the collector's roll against lands together with the townships' portion for roads.

Owing to the manner in which this summary is made it was necessary to analyze the levy against each drain, school section and every special levy on the rolls, for each year, which entailed a lot of work. The fact that there are two collectors' divisions in the township makes three summaries necessary, one for each roll and a summary combining the two. A number of drains and school sections are partly in both of the collectors' rolls.

With the exception of the omission of summaries in the rolls, the manner of their preparation during the entire period under review reflects credit on the clerk.

The large number of drains in the township has compelled the clerk to enter assessments of more than one by-law in the same column of the collector's tax roll with a memo for distinguishing purposes. This and the fact that the township is divided into two divisions has entailed much extra work upon the clerk in preparing the rolls. An inexperienced or less intelligent clerk would on account of the intricate work on the rolls have probably caused serious loss to the township. This could be avoided in the future if the rolls were made specially wide to permit a separate column for each drainage by-law, against any description of land.

The collectors' rolls have been checked and the amounts they contain accounted for in the books of the treasurer. There was no entry in the rolls prior to 1907, of the treasurer's settlement with the collector. This should appear in the roll together with the collector's declaration in reference to any taxes returned to the treasurer uncollected. The duplicate statement of collectors' settlement is not filed with the clerk as required by the Act. This should be done so the clerk can notify all those whose taxes have been returned unpaid. This was pointed out to the treasurer, who conformed to the above in settlement, 1907 roll.

The statement of collector's settlement with the treasurer should give full particulars after the form for which figures of division 2 and 3, for 1907, are used to explain and show as follows:—

Total amount on roll	$17,065 99	
Interest on delinquent taxes	145 54	
Total cash paid Treasurer		$17,175 42
Arrears uncollected N.W. 1-4, Lot 6, Con. 5.		33 58
Dogs uncollected		3 00
[Allowance by resolution of council in detail with date of resolution, etc., if any, would be inserted here].		
Balance	47	
	$17,212 00	$17,212 00
Balance due Collector		47

The rolls are not returned to the Treasurer on time. They have been too late every year since 1893, except the 1907 roll, to have the percentage added to the arrears in the country treasurer's office. This has been a loss to the township of several hundred dollars. The 1907 rolls for both divisions were returned before May 1st, and avoided the loss of 10 per cent. on arrears.

In the year 1094, 5, 6, no by-law was passed imposing a penalty for taxes unpaid by a certain date. A by-law was passed in 1907, which covers 1907 and future years until amended or rescinded.

Drainage Accounts.

A careful examination of all drainage accounts has been made. They were found to be so badly mixed that reference to nearly every municipal drain in the township is necessary in order to place the result of this audit before the ratepayers and officials of the Municipality so as to avoid if possible the past errors and be a benefit in the future.

To keep drain accounts correctly it is necessary to have a separate account for the receipts and expenditures under each by-law where the area of territory assessment varies from that of any previous by-law on the same drain. This has been entirely disregarded in the accounting of the affairs of this township.

It never has been my duty to investigate drain accounts in a township which were more complicated and mixed and where so many drains and by-laws called by the same name as in the township of Dover. Some reasons why the drain accounts are so badly muddled are:—

(*a*) The clerk, who is a permanent official, has more intimate knowledge and easier access to the by-law under which drains are assessed than any member of the Council, and is more familiar with them, has nothing to do with the issuing or countersigning of the orders passed by the Council or issued by commissioners of divisions marked to be charged to drains.

(*b*) The commissioners of divisions, who are frequently appointed by resolution, issue orders for work they order to be done on drains and roads in their divisions, without these expenditures being brought before the Council for ratification or to the notice of the ratepayers till such time as the audit report is published. Frequently such orders are issued by members of the Council chargeable to a drain on which there is a commissioner appointed by by-law to look after that particular drain. The ratepayers on a drain have no means of knowing about expenditures made on drains, if three or even four different persons can have work done and charge the drain account, without reference to the Council or the amount of the expenditure becoming public for months after the transaction took place. The present methods are wide open for improper dealings; they are not legal, and should be discontinued. In connection with this, and to show that members of the Council thought they were doing right, Thos. Bordeau, Jr., in his evidence swore, "I understood that I was properly entitled to issue orders chargeable to drains for any expenditures necessary in way of repairs in the division to which I was appointed commissioner by resolution of the Council."

(*c*) There was no map in the township showing the location of drains and the different parts of drains, when more than one section is called by the same name. It was necessary for me to make a map of the township and place on it all the drains as they now exist; but to do this it was also necessary to trace on a map each drain or part of drain under a different by-law, showing its course when originally constructed, and by different colors all the changes made by engineers from time to time, of different sections of the drain improved, enlarged or repaired, and the year and by-law number under which the work was performed. In nearly every instance of a new report and by-law on a drain, the area assessed was different from that in any previous by-laws, frequently when different parts of drains were repaired or improved they were continued in the same account in the treasurer's ledger, although practically by the

variation in area or assessment it was an entirely different drain, the account which must be kept separate from any other.

Some conception of the manner in which the accounts of the drains were complicated, can be learned from the fact that there have been 16 different Rivard Drain by-laws passed since the year 1889. The accounts of each by-law of this drain and its many sections have not been kept separate, according to the different areas assessed or by by-law under which they were constructed or repaired, but items of as many as three, and sometimes four different sections of the drain under different by-laws have been kept in the one ledger account.

Section nine of the Municipal Drainage Act, gives the engineer power to assess bridges and culverts on highways, and apportion the cost and upkeep between the drainage work and the Municipality or Municipalities having jurisdiction over such public highway as to him may seem just. Bridges assessed by the engineer under Subsection 1, Sec. 9, must be maintained in that proportion till another engineer's report varies the assessment. During the period covered by this audit, a number of bridges assessed by the engineer to be maintained in whole or part by the municipality, have by subsequent engineer's reports been constituted part of the drain; these, as long as the by-laws existed requiring all or part to be maintained by the municipality have had to be charged to the accounts as directed in the engineer's report. It is remarkable, that hardly a single item was charged to the municipality for repair or upkeep of over forty of these bridges and culverts on which the engineer's report required the municipality to pay all or part. The drains were charged with all the repairs. In giving evidence under oath on this point, Joseph Lewis, one of the commissioners, who was a member of the Council for some years, swore, "Charges for bridge repairs, 1903, was for washouts, on solicitor's opinion, all bridge repairs were charged drains regardless of what the engineer's report contains." John Grant, Ex-Reeve, in his evidence stated, "I always had the impression that the repair and maintenance of bridges on public highways over drains was all to be charged to the drain, and that the assessment against roads of the municipality paid the entire portion the township had to bear."

C. Purser, Ex-Reeve, in his evidence stated: "In 1904 there was high water and washouts, and the legal opinion received was that drains should be charged with all repairs of bridges caused by high water."

After taking evidence under oath in regard to charges made to drain accounts, which conflicted with engineer's reports, and the Drainage Act, it was deemed advisable to formulate a number of questions and procure the written opinion of Matthew Wilson, K.C., Township Solicitor. The question and solicitor's answers are included in this report, under the drains or other subjects to which they particularly refer. The folowing are some of the questions submitted in writing, with the written opinion:—

Municipal Bridges.

Question.

When the engineers under subsection 1 of section 9 of the Drainage Act reports a bridge or bridges on a drain to be charged in whole or part to the municipality.

Will damage to a bridge, caused by the flow of water in the drain during floods, in any way affect the engineer's report and permit the legally charging of the maintenance or repair in whole or part, of the bridge or bridges to the drain account?

Does the maintenance of such a bridge remain a charge against the municipality till another engineer's report is adopted, repairing or enlarging the drain?

MATTHEW WILSON'S OPINION.

"The damage to the bridge caused by the flow of water cannot change the effect of the engineer's report. No matter what may be the cause of the damage to the bridge it ought to be repaired and the cost of repairs charged in the first instance in the manner directed by the engineer's report. If the report charges the cost partly to the municipality and partly to the drain, then that report must be followed; but if the report charges the whole cost to the municipality, then the municipality must bear it. Of course, the Referee has power on appeal to vary the proportions if appealed to within ten days after the making of the report.

The maintenance of the bridge remains a charge against the municipality, or partly against the municipality and partly against the drain until some future report of the engineer under the provisions of the Drainage Act varies these proportions."

CHANGES IN ASSESSMENTS BY COUNCIL ON DRAINS AFTER COURT OF REVISION.

Question.

After by-law 173, Rivard Drain, 1889 was passed by the Court of Revision and levied on the tax rolls some of the ratepayers claimed there was an error in the acreage for which they were assessed. The Council issued orders refunding these claims overcharged, and charged the amounts to the drain. In the years 1902, 1903 and 1904 (the Clerk says) the Council verbally instructed the Clerk to leave these items off the rolls. The items omitted to be placed on the rolls amounted to $23.77 each of the three years. There was included in the schedule of this by-law two descriptions of property twice. The annual total of the two which were duplicated was $8.67. The drain account has been charged with the refunds and what the collection fell short annually of meeting the debentures which were issued on the basis of the total original assessment.

Can the amount refunded and omitted from the rolls now be collected from the lands against which they are levied in the by-law?

If the amounts cannot be recovered should they be charged to the drain or the general funds of the Township?

Should the amount duplicated annually, $8.67, be charged to the drain account or general funds of the Township?

Matthew Wilson's Opinion.

"In my opinion, the amounts could not now be collected from the parties relieved from taxes by the Council, although, in my opinion, the Council ought not to have interfered with the assessment after the Court of Revision had disposed of it. The liability of the lands, however, is not free from doubt, because a Judge might hold that the action of the Council in interfering with the assessment and refunding what appeared to be overcharges was so entirely beyond the powers of the Council that the lands still remain liable for the charge. In any event, the amounts should not be charged to the drain, but if not paid by the lands against which they seem to be

erroneously charged, the amounts should be charged to and paid out of the general funds of the Township."

"The amount duplicated, and which was released, should not be charged to the drain account, but paid out of the general funds, unless the duplicated amount should be collected from the lands erroneously charged. The owner against whose lands the charges were duplicated ought to have appealed to the Court of Revision and had the improper charge stricken off, and then the Court of Revision or the County Judge, on appeal from the Court of Revision, could have charged such amount to the drain, and spread it pro rata over the lands assessed. The Council, however, had no authority to do this."

"The Council should always remember that as a Council they have no power to deal with these assessments upon local drains, the Court of Revision and the County Judge being the only tribunals to dispose of these questions of assessment."

Part of Drains Covered by Two By-laws.

Question.

In 1893, under By-law 219, part of the Ouellette drain was repaired by dredging from the outlet to the third Concession road, and continued by team work from there to the Crow road. The bridges, according to the engineer's report on By-law 219, were part of the drain. In 1899 the same drain was repaired and enlarged under By-law 270, by extending the dredge cut from the Third Concession road to the Crow road, and team work from the Crow road to the head of the drain, a few rods west of the Winter Line. Under By-law 270 three bridges, under subsection 1 of section 9 are to be charged to the municipality. The assessed area of By-laws 219 and 270 is entirely different.

In the books of the Township the two by-laws are included in one account; the repairs to all the bridges have been charged to the drain account.

The accounts of the two by-laws must be separated.

To which one of the by-laws is to be charged the cost of repair on that portion of the drain from the third Concession road to the Crow road covered by both by-laws?

Matthew Wilson's Opinion.

"The accounts under the two by-laws 219 and 270 ought not to have been joined as one account. The two works are separate and distinct works. The last by-law, being by-law 270, would supersede the former by-law so far as is necessary to carry out the repairs under the last by-law; but if the first by-law provided for bridges and the second by-law did not interfere with those bridges, then, they would be repaired under the provisions of the same by-law; but no work done under the second by-law would be repaired under the second or last by-law. In other words, you would charge the cost of repairs to that portion of the drain from the Third Concession road to the Crow road to the drainage area as mentioned in the last by-law unless these repairs were to a bridge or something of that sort that was constructed under the first by-law and not interfered with under the second by-law, in which event the drainage area under the first by-law would bear the cost of repairs."

Bridges Over Drains Where no Bridges Previously Existed.

Question.

A drain is constructed with an outlet through marsh lands that are not under cultivation. Roads are constructed a few years later in the vicinity of the outlet. A bridge is built over the drain on the authority of a resolution of the Council only, the cost of construction of this bridge was all charged to the drain.

Can any part of the original charge for construction or repair of this bridge be legally made to the drain account unless the bridge is included in an engineer's report adopted by the Council constituting it as part of the drain?

Matthew Wilson's Opinion.

"The cost of the bridge under the circumstances mentioned could not properly be charged to the drain, but should be paid out of the general funds.

"No part of the charge of construction or repair of the bridge could be charged to the drain unless the bridge work is included in an engineer's report adopted by the Council so as to make such bridge a part of the drainage work."

This is in connection with bridges built over Rivard and Ouellette drains and is referred to elsewhere under these drains.

Costs of Suit Chatham vs. Dover.

(To be Collected from Dover Ratepayers on Drain Only.)

Question.

There was a suit, Chatham vs. Dover, in connection with Little Bear Creek Drain maintenance of bridges. The Referee's decision charging each municipality one half, was appealed from and Dover won.

Are the costs Dover paid to solicitors over the amount recovered from Chatham ownship legally chargeable to the drain to be collected from the ratepayers pro rata?

Matthew Wilson's Opinion.

"The cost of the suit of Chatham vs. Dover paid to the solicitors should be charged to the Drainage Work and paid pro rata according to the assessment in Dover, just as if the by-law had raised an insufficient amount to do the work."

Tile or Culverts Across Roads Providing Outlet not Assessed for.

Question.

Drains have been charged with Tile and Culvert Material, not included as part of the drain in the engineer's report, to provide an outlet across roads for individual ratepayers who were only assessed for cut off on the drain into which they have thus secured an outlet.

The drain must receive credit for these improper charges.

Should the amount be charged to roads and bridges account?

What action can be taken to stop the water now flowing across the highway into the drain from lands assessed for outlet only?

What means must be taken to assess those receiving this benefit of outlet for which they are not taxed?

Matthew Wilson's Opinion.

"In answer to your first question, the amounts should be charged to the account for roads and bridges and paid out of the general funds.

The township can direct its pathmaster or Commissioner or other person to close the opening across the highway so as to prevent the flow of water through the highway.

In order to assess these lands and allow them to drain into a local drainage work the Council may procure the written agreement of the land owner with the consent of the parties assessed in the drainage area, or the Council may send on an engineer to report upon the work and to assess the parties benefited and using it."

Tile for crossig road.

In connection with the assessment for cut-off, the Drainage Act, Sec. 65, states:—

Any lands or roads from which the flow of surface water is by any drainage work cut off, may be assessed and charged for same by the engineer or surveyor of the municipality doing the work; and such assessment shall be classified and scheduled as benefit. Since this Act was passed there is no column for cut off in engineer's reports.

Sewer pipe was frequently furnished for the purpose of providing an outlet across roads and charged to the drain into which the outlet was provided. Wherever the information on the orders indicated such charges and evidence could be procured from those who issued the orders, the amounts have been credited back to the drain and charged roads and bridges account.

P. Crawford, in his evidence on this subject stated, "At a Council meeting at Mitchells Bay towards end of the year 1903, a number of the ratepayers wanted tile to cross the road to the drains to provide them an outlet. The matter was talked, but no motion passed, the ratepayers asked for the tile to provide outlet to drains for which they were assessed. There was no objection by any member of the Council and they mutually agreed that the Commissioner of the division to furnish the tile and charge for the same to the drain account to which outlet was made. That has continued to be done in some instances till 1907, when Reeve Rankin said he did not think it should be done."

C. P. Hart, in reference to this subject, stated in his evidence, "There have been a number of such tile drains given, but I cannot call to mind where they are located."

W. J. Foy, in his evidence stated:—

"Tile has frequently been given to cross roads and charged to drains; I cannot tell where at present time, but think at the Cadotte Mechanical Drain."

John Grant in his evidence stated:—

"In my time any tile provided where the road would be benefited was charged to the division account. They were refused when for the benefit of private parties and no benefit to the road."

C. Purser in his evidence under oath states:—

"These were given when the road would benefit and charged the division or roads and bridges. When for an outlet for water to a drain it was charged to the drain. I was of the opinion that the ratepayers paying to the drain had a right for an outlet."

Drainage.

The original drainage by-laws are carefully kept by the Clerk, and are transcribed in the books for that purpose. By-laws recently passed, not yet entered will be transcribed as time permits.

Bonds have not always been required to be furnished by contractors on drains. This too frequently results in the work being slighted.

The attention of the officials of the township was called by me to the fact that the majority of the Drainage by-laws passed during the last ten years could have been quashed had proceedings been instituted in time, owing to the fact that the Council exceeded their authority, when acting as a court of revision on drains, reducing assessments without increasing others by a like amount to maintain the original amount of the engineer's report. Reducing assessments and cutting the engineer's estimate down by the amount reduced, is not only illegal, but results in the amount of reduction being a further and unfair charge pro rata on the assessment of those not reduced, as any deficiency must be made up by those assessed.

A great many of the errors in the drain accounts might have been avoided if each drain or part of drain covered by a separate by-law had a different name, so they would not be confused. It is very difficult to keep the accounts correct when there are different sections of drains with the same name, as is the case at the present time with over fifteen municipal drains, the Hind Drain under four different by-laws and another proposed Hind Relief. Rivard under five different by-laws, Hendricks under four different by-laws, there are five different by-laws for four sections and one bridge of the Hyatt Drain, four by-laws of different sections of the Fryer Drain and also the Hyatt & Fryer outlet, making no less that ten by-laws of the two name Hyatt & Fryer, and they are not all in the same part of the Township.

Payments for construction and drainage repairs are made on the order of a Commissioner on the drains frequently only appointed by resolution of Council, or the Commissioner of the division without an authorization of the Council. It has been customary for councillors to have repair and work done on drains in their division. This has always been considered as legal by the members of the council till their attention was brought to it during this audit. In most instances now the Reeve countersigns the orders issued by the Commissioners on drains, but this up to 1907, was only a verbal understanding; orders were frequently cashed without the signatures of the Reeve, before as well as since 1907.

When any drain is constructed or repaired the Commissioner in charge of the work, should upon its completion, make up and present to the council in writing, a report and statement showing in detail the orders issued by him, giving date, payee and amount. This should be referred to the treasurer to check up and add any other charges made to the drain account than the orders issued by the Commissioner. The statement so amended after being passed on by the Council should be filed with the Clerk with papers pertaining to the drain to which it refers. This has been done by Commissioners in a few instances only.

Interest has not been taken into account in this report in connection with drains or other overdrawn accounts in the books of the township.

The remuneration of the Clerk fixed by by-law paid out of the general funds of the township, covers the work preparing by-laws on drains and work on award drains. The engineers in the year 1907, did not include in their estimate of the expenses in connection with drains any amount to compensate the general funds by charging the ratepayers on drains a proportion of the Clerk's salary for time occupied on this work. When the Clerk was paid the fees, the item was always provided by the engineer and the drain charged. Each drain should pay its portion of the Clerk's services by charging the drain account and crediting the general funds with an amount the engineer should include in the estimate in each instance the same as is done in the case of engineer's fees. The proper way to treat the Clerk's fees allowed is by issuing an order charging the drain, which the treasurer will charge the drain and place to the credit of the general funds of the township. The fact that the Clerk does not get paid by fees is no reason why the ratepayers on the drains in Dover and other contributing townships should not pay for services for which they derive the benefit.

There are no less that 18 bridges over the Chatham and Dover Townline and Townline extension drains, all of which the drains contribute to in a more or less degree. The members of the Council cannot be expected to remember what is the proportion for maintenance of each bridge, without a copy of the by-law and a map marked to indicate how the bridges are to be maintained, as well as which bridges Chatham Township are to look after, according to the engineer's report. There are over forty bridges over drains in the Township, that have to be kept in repair at the expense of the general funds or the road and bridges account. When this fact is understood the reason that each drain contribute a proper share for the Clerk's services, will be appreciated.

The amount realized from sales of old boilers and engines replaced at the Mechanical Drains, have not been turned over to the treasurer.

Orders issued on the council by Commissioners of Mechanical Drains, should always be accompanied by a written account, and countersigned by the Reeve, before accepted by the bank.

Any insurance policies on Mechanical drain pump houses and machinery should be filed with the clerk and not retained by the Commissioners.

Conclusion of Reference to drains.

From the foregoing statements regarding the different drains it must be very clear to everyone who reads this, how much the drainage accounts were mixed. A glance at the map which accompanies this report will show how easily they become so, and the amount of care that must be used to prevent a repetition of this in the future. There are no less than 87 municipal drain accounts at the present time in the treasurer's ledger. A few of these will be closed out of the books entirely as soon as the Council take action as recommended, they are: —

Boyle 184, $68.60, overdrawn.

Boyle 205, $86.85, credit.

these to be transferred to Boyle 341, and closed out by a resolution.

Hoover 256, $78.18, overdrawn.

Hyatt 245, $17.61, overdrawn.

Pain Court, $171.25, overdrawn.

these to be collected by amending by-laws and closed out.

Hind 277 or 282½, $18.92, overdrawn.

this balance to be closed in account of by-law 211, by resoulution.

Rivard 173, $30.55, credit, this balance to be closed into Rivard 364, which is practically the same area, by a resolution.

There are a number of drains in the township constructed many years ago, parts of which have since come under engineer's reports with a different assessment covering part of the original area. New drains have since been constructed that have changed the course of water that came to the original drain, but the original part of the drain not repaired or improved by an engineer's report since, is still assessed against the lands and roads under which it was constructed although some of those lands do not now use the original drain as an outlet or derive any benefit, yet repairs are to be paid for by those originally assessed. The only way this can be remedied is by a new survey and assessment, the following will illustrate this:—

(*a*) The Hendricks, 168, on south side of 7th Con. road, is all of original by-law 168, that has not been covered by engineer's reports and new by-laws, a dam was placed at Baldoon Street, lands east of Baldoon Street must contribute to the upkeep of this part of the original drain, till another engineer's report is brought in.

(*b*) The Gordon, 161, all that has not since been covered by engineer's reports of this drain is from McKenzie Creek to the outlet in Little Bear Creek. Two culverts across 15th Con. and Bear Line have to be maintained by the drain. The Gordon Drain east of Baldoon, has been diverted into the Marder Drain, there is a dam at Baldoon Street, the water from Baldoon St., west to McKenzie Creek goes to the dredge cut, yet the repair to bridges in 1907, west of McKenzie Creek, on by-law 161, will be contributed to by lands east of Baldoon St., which now derive no benefit whatever.

The map of municipal drains will enable the ratepayers and members of council to intelligently discuss the matter of repair, improvement or new construction of drains. Had such a map existed prior to this audit a considerable amount of time and expense would have been saved to the township. Every year there are changes in the municipal drains, the course of old drains is altered or new ones are constructed so that it will be necessary that such changes be recorded on the map from time to time to keep it continually up to date.

Out of eighty-seven municipal drain accounts in the treasurer's ledger there are over fifty of them overdrawn. A few of these will be covered by the sale of debentures, that were held over to 1908, the remainder where the overdraft is more than a few dollars or the drain is not soon again to be improved or repaired should be collected by amending by-laws.

I cannot impress upon the Council of 1908, the importance of beginning at once to pass by-laws to collect these overdrafts. Some of them are large, and will require to be spread over some years, to ease the burden of the ratepayers. These should provide for the sale of debentures to recoup the general funds. Owing to the tremendous amount of extra work that will be thrown on the clerk preparing, figuring and completing so many amending by-laws in order to promptly sell your debentures and recoup the general funds, and place the levies on the 1908 roll, it will be absolutely necessary that immediate action be taken or it will be impossible for the Clerk to do the work in time to place the levies on the 1908 roll. Before the amounts are filled in amending by-laws, a statement should be furnished by the treasurer of the balance in his ledger, as there are charges to some of the drains in 1908, not included in this report, which is up to December 31, 1907.

Award Drains.

For many years the entries for all Award Drains were kept in one account called the "Ditches and Watercourses," through which all entries pertaining to awards and agreements passed. This method has been done away with, and very properly so; instead a separate account is now kept for each in the treasurer's ledger.

The Clerk when placing collections on the roll, in connection with Awards and Agreements, prior to 1907, when his attention was called to it during this audit, omitted to add seven per cent. in accordance with Sec. 27 and 30 of the Ditches and Watercourses Act. The Clerk states that this was done on verbal instruction from the Council. Such action by the Council is not legal, as the Act is very clear that seven per cent. is to be added.

The engineer in making awards under the D. & W. Act, should be instructed to always include clerks' fees, and insert separately the cost of engineer's inspection from his fees for report and plan, so that the inspection fee would not be paid till after a proper certificate of completion of the work is filed with the Clerk.

There is no regular award kept as required under Sec. 18. No agreements or awards under D. & W. Act are registered in the registry office.

Roe Award.

This award of A. McDonell, dated August 23, 1907, was appealed against by Mrs. Roe and Walter Roe, the appeal being dismissed with costs. The amount of costs of appeal, together with original amount awarded by engineer against appellants and others unless paid in to the treasurer will be placed on the 1908 roll against the lands with 7 per cent. added. This is the only award drain in the treasurer's books against which collections are to be made. The amount paid out for the Township's portion of work in 1907. on this award drain, has been transferred by proper journal entry to the Township of Dover general funds.

The manner of crediting the township's portion of cost award is referred to elsewhere in this report.

Accounts with other Townships.

No accounts with other townships have been kept in the treasurer's ledger to indicate what money is due to or from the Township of Dover.

The settlements for drainage levies and work on Townline has frequently been done verbally or on figures made at the time and not retained or filed with the Clerk. There should be a written report of all settlements, which, after being reported to the Council, should be filed with the Clerk for future reference. The absence of these reports has necessitated considerable work and does not enable making claims for some amounts that may be due the township.

There are only two townships, Chatham and Camden, with which any drainage settlements are made, and both townships are in debt to Dover, as shown in attached schedules. The amounts were overlooked by the old methods of book-keeping and should have been collected before. If proper accounts and entries had appeared in the ledgers, the amounts due from Chatham and Camden townships would not have been overloooked, and settlement insisted on. Entries now appear in the Treasurer's ledger for sums due from these municipalities.

Attached is a statement of claim against Camden Township for assessment on Little Bear Creek unpaid, to which interest has been added.

The claim against Chatham Township does not include some items of interest on payments on drainage levies, which have not been computed on account of some information in respect to them not appearing among the papers of Dover Township. These may be claimed for later, when information is procured

Treasurer's Books and Accounts.

The Treasurer keeps the regular Government cash book, debenture register, arrears of tax record and two ledgers; in one ledger all the accounts of drains only are recorded; in the other all other accounts appear. No journal has ever been kept.

The Treasurer was instructed by resolution, January 12th, 1903, to procure books recommended by Provincial Auditor.

The cash receipts and disbursements for all the years covered by this unit are carefully recorded, and all cash accounted for.

The manner in which the two ledgers are kept is crude and not in keeping with the volume and importance of the affairs of the Township of Dover. The ledgers were not in balance and never had been, are partly run on double entry and partly single entry, but without a journal, through which entries for transfers should be made. They are not kept in up-to-date methods, which should now prevail in all municipalities.

Accounts such as Board of Health, election expenses, stationery and printing, at the end of each year are ruled off, only sometimes they were transferred to general funds; but recently, by placing the amount required to balance the account in ledger for the year, and are then merely dropped out of existence by ruling off the account, which is the balance for one year not being brought down into that of the next year; it is not written off by charging it through the journal to the general funds of the township. These accounts should be written off yearly, by crediting up what is necessary to close them out and charging to Township of Dover general funds.

The tax rolls are charged to the collector of each division each year. Appropriations for divisions, salaries, charities, collections for schools, drainage levies to meet debentures, and other accounts are credited from a statement furnished the Treasurer by the Clerk. The exact amount of the rolls charged the collectors exceed the amounts for which various accounts have been credited. It is impossible to keep the ledger in balance unless these entries are made through a journal and the credits to the various accounts are equal to the total charged the collectors for the amount in their rolls and the County Treasurer for the non-resident tax roll. No account was kept in the ledger in recent years charging the County Treasurer with the arrears of taxes held by him for the township, although a wild land tax account was kept some years ago. A separate arrears of taxes record book is kept, but there must be an account in the Treasurer's ledger, showing what amount of arrears of taxes are uncollected at all times. No entries appeared in the ledger for cash and bank accounts.

In some accounts in the ledger two pages are used, one page for the debits and another for the credits; for others both the debit and credit were on one page. The collectors' accounts, instead of being charged on the debit side of the ledger account with the total for 1907 roll, was posted on the credit side of the ledger, and amounts received from the collectors on account of taxes on the roll were posted on the debit side of the account.

In order to keep the accounts of the township in proper shape in the Treasurer's ledger and avoid a repetition of the old methods in the future, a form was prepared for a specially ruled ledger; providing a narrow portion of the page for credits and a very much wider portion of the page for the debits in which to enter the particulars of the charges, cash book folio and voucher number. The debit and credit headings in the ledger are printed to prevent mistakes in the future. The form of ledger and figures for cost of new books were submitted to the council, which were approved and authorized before the new books were ordered.

The ledger balance of December 31, 1907, contained in this report, shows the debits are equal to the credits. Entries have been made charging fixed assets with the value of Town Hall and other items, as shown in detailed statement and crediting Township of Dover account, correcting in the ledger all the accounts of the township, as stated in this report. The surplus is shown in the Township of Dover account.

There was no attempt at balancing the ledger in the past. The Treasurer was never shown how to make proper entries for the tax rolls to enable him to balance his ledgers, or informed that it was a necessary part of his work. Accounts were not kept for Chatham Township, Camden Township. Cash and bank account, fixed assets, savings bank account and McTavish estate liability. Accounts are now opened for these.

When the Treasurer has had his attention called in the past to any improvements in the method of book-keeping he has adopted them. The separation, of the drainage levies to meet debentures maturing, from the account of the drain with which they were formerly mixed, was a move in the proper direction.

The drainage accounts were very badly mixed in the Treasurer's ledger, but for this he should not receive the blame. The manner in which orders were drawn on the majority of the drain accounts, giving incorrect by-law numbers, and often not stating any by-law number at all when there were more than one by-law on drains by the same name, frequently information was received by the Treasurer from time to time in reference to drain accounts by verbal discussions, the Treasurer was not furnished with copies of all by-laws to help him in this work; these together with the absence of a proper map to show where drains were located, what part of a drain each different by-law covered where more than one by-law on drains by the same name, are to a great degree accountable for the condition in which the drainage accounts were found.

The drain accounts have all been gone over and analysed, also about fourteen thousand vouchers, in reference to bridges for which engineer's report made the maintenance a charge to the municipality in whole or part, have been gone over with the commissioner or member of council who issued them, when it was possible to procure the persons who issued the orders and get that information. The corrections made in the accounts in the Treasurer's books are based on the engineer's report, by-laws, the laws governing the municipalities, written legal opinions, and the evidence taken under oath from the officials directly responsible for, or familiar with the orders issued on any accounts about which any question had been raised or errors discovered.

In 1907, there was an amount of $6.75 deposited to the credit of the township account, for which the Treasurer has not been able to get particulars as to who deposited it and what for.

The debenture books are kept written up to date, which record the particulars in regard to the issue and maturity with amounts of principal and interest, date of maturity and when paid.

The arrears of tax record is compared yearly with the books of the County Treasurer.

The by-law passed October 17, 1907, extending the audit to December 31st, 1907, directed that the Treasurer's books be brought up to that date and to instruct the Treasurer in regard thereto.

Commissioners.

The commissioners of divisions were appointed up to 1900 only by resolution of council; for the year 1901, and since legally by by-law, have exercised the power and authority of issuing orders for the payment of repairs to roads, drains, bridges, expended in their division. This has been the practice for years by the members of every council and no particular council is to blame for this. It is wrong and exceeds any powers the members of the council possess.

The commissioners of a road division legally have power only when appointed by by-law to expend the amount appropriated for their divisions. Any charges for bridge, drain, or other repairs, other than charged to road divisions account, must be passed by the council and orders when authorized by council should have the signature of the Reeve and Clerk, to indicate that they have been passed by council before they are presented to the Treasurer, or bank, for payment. It has been customary for the Reeve to write out and issue all orders passed or ordered by council, occasionally some were issued to be confirmed by council later and some so issued the confirmation was overlooked; the Clerk never issued orders or signed them. The Reeve has no legal authority to issue any orders before the items are passed by the council, unless as commissioner on a drain or division when appointed by by-law. No orders issued in Dover Township have ever required the signature of the Clerk of the township to show they were authorized by council. This method of issuing orders is one of the Out of Date or Antiquated Methods, to which is referred in the petition for a Government audit, and perhaps to which can be attributed the mixed state of some of the accounts of drains.

How is it possible to keep accounts of drains correctly when orders are issued to be charged to one drain account by so many different members of the council. As an instance, take Hind Drain By-law 261, parts of which are in different divisions. In the year 1907 there were thirteen orders charged against this drain, three were passed by the council and signed by the Reeve, none of the other ten charges came before the council, four orders were signed by P. Crawford, commissioner, four signed by James Fox, commissioner, and two by W. J. Foy, commissioner. There was no improper motive in the issue of these orders. Two of them were charged the drain for repair of a bridge, which the roads and bridge account must pay; this has been corrected. The way these orders were issued is just following the custom that has prevailed in the township for years each commissioner expending on any drain in his division. Legally, unless there is a commissioner of the drain appointed by by-law every one of these charges should come before the council and be passed before the amounts are paid, and an order should be signed by the Reeve and Clerk. No councillor has any legal authority unless specially appointed by by-law as commissioner on a drain to issue an order for one dollar to be charged to a drain account. The loose manner of issuing orders on drains by councillors during the past ten years has occupied more than one-half of the time and expense of this audit.

There is no doubt at all that the custom which prevails in every other township in the county but Dover, to have the Clerk write out and sign the orders and direct to what account they are to be charged before being signed by the Reeve, the township deriving the benefit of the clerk's knowledge of the drains and by-laws, if adopted in the future in Dover township, would prevent many errors. As it is now done in Dover, the Clerk, the man of all others in the township who would know most about these things, and where expenditures should be charged, has not had any say, or his knowledge called into requisition, to guide aright the affairs of the municipality in the matter of the accounts.

The Reeve should not be expected to write the orders, and the Clerk should be remunerated for this extra work put upon him.

The present council and officials are not to blame for the system that exists. What is done now and the way it is done had been evolved out of what was done long years ago, but the evolution has not by any means kept pace with the times or other municipalities in the county.

It has been the custom for many years for the members of council to perform and be remunerated for services as, assisting to survey drains serving by-laws, distributing rebate orders, and holding scrapers; this is not legal.

All orders should be written in ink and made payable to order. There are many written out and signed in pencil; some are written and signed in ink with the amount filled out in pencil. All orders should be made payable to order no matter whether the payee can write or not. Orders made payable to bearer or in pencil, open the door and allow an opportunity for fraud, and should be discontinued. All accounts for material or services rendered the municipality should be presented in writing and when passed upon by the council be filed in the clerk's office for future reference, the absence of these for the earlier years covered by this audit has not permitted some of them being checked.

Some orders issued were not signed by the commissioners, but by other persons, usually by some other members of the family. These were, however, for amounts for which proper services were performed. This should not be permitted under any circumstances.

No notice of any orders issued is sent to the Treasurer; he issues very few cheques or orders on the bank himself, and without notice of orders issued is thus without any control over the funds or knowledge of how the account stands without inquiring at the bank as to the condition of the account, and does not know then what orders are outstanding. There is no check kept on the commissioner, who is given an order book, is not under bond, and may issue orders as he pleases to whoever he pleases, without reference to anyone. The door is wide open for the practice of dishonesty by permitting such methods of conducting the affairs of the municipality to continue; no evidence has been produced that the powers have been dishonestly exercised. This manner of conducting the township affairs cannot be too strongly condemned.

The amount each member of the council received as remuneration from the township funds is shown in schedule X., stating items paid in 1907 for services in 1906, also the total amounts for services in 1907, whether paid during the year or not. These particulars are necessary to show the exact amount each member of the council charged for services for the year, whether paid for in the same year or not. The omission to give this information in the past has not shown actual amount for the year they belonged and created an unfavorable impression, which has been complained of. Accounts should be presented in writing for all services for which members of the

council are paid, at the last meeting of the council each year all members of the council should present statement showing in detail of the services performed and the amount due. These, when passed on and orders issued for payment, should be filed with the Clerk.

The accounts should not be allowed to run from one year into another.

The commissioners on mechanical drains perform work and supply material to the drains on which they are commissioners. When this is permitted under the by-law, detailed statement should in every instance be furnished in writing and filed with the Clerk, after order for payment is passed.

Salaries and Remuneration of Councillors and Officers.

The remuneration of members of the council and the manner in which this is conducted is shown by the evidence of John Welsh, Clerk, which is as follows:—

"There is no by-law fixing the remuneration at present; this is now fixed by resolution on accounts as presented. The rate is $2.00 a day and mileage for council meetings, and $2.00 a day without mileage for commission and committee work."

"It is not the custom to regularly render written statements for services attending council, or any other services. The amounts are usually reported verbally at the meeting from such records as they may keep. No written statements are filed for services. Orders are issued on the verbal statements which are included in a resolution of the council."

The following is a statement of Medrick Caron in his evidence on this subject:—"I furnished statements to the Clerk of the amounts of drains for which annual levies are made, so that he could figure the by-law to cover the overdraft. Usually in December of each year I was asked to give a statement of amounts drawn as salary and commission for the year up to the date of statement, by the members of the council and the Clerk. These statements were always furnished in writing and were for the purpose of straightening up accounts for the year. These were not made out for the members of the council and Clerk every year for the amount they had drawn, but whenever asked for; perhaps every two or three years."

From what is stated above and the absence of written statements it has not been possible to check the withdrawals for services under the different captions of salaries, allowances and commissions, drawn by members of council for the period covered by this audit.

The salary of the Treasurer is $175.00 a year, fixed by a by-law passed previous to the date of the period covered by this audit.

The salary of the Clerk from January 1st, 1897, was $425.00, and fees on drains, etc., fixed by by-law number six of 1897. This was not changed till the year 1903. During the period covered by this by-law some small items in each year were drawn to the Clerk's attention on which evidence is as follows:—

"I have gone over all the vouchers since 1897, for which I drew money from the township. There are a number of small items to which my attention has now been drawn for transaction during the years of 1897 to 1903, for which I am unable to find receipts or produce evidence, it being so long since the transactions took place. The total amount of these items covering the seven years is $111.00. Of this, $96.00 was for transactions before the year 1901, which I do not think I could legally be compelled to pay, as they took place so many years ago it would now be outlawed, but will deposit the full amount of $111.00 to the township's credit in the bank, so that it can be settled before the report is completed."

The $111.00, when drawn to the attention of the Clerk, was deposited by him to the credit of the township's bank account in 1908, and is included in the assets on December 31, 1907.

In 1903, under by-law number 12, the Clerk's remuneration was increased to $500.00; this was in 1907 increased to $600.00 and covers all work regarding drains and attending court on suits.

The Clerk's salary for 1905, as fixed by the by-law, was exceeded. The facts in connection with this are set forth in the evidence of the Clerk, as follows:—

"I was not aware that I drew more salary for any year than the by-law covered, and never received any orders except they were passed by council. I have gone over the orders for 1905 and compared them with a statement I received from the Treasurer in December, 1905, of orders drawn on salary for that year, which I here produce, and now find that he omitted two orders, May 25, 1905, $25.00, and September 9, 1905, $30.00, from this statement of orders drawn that year by me on salary. I do not remember anything about these orders, whether they were for special work or not. The auditors never mentioned that the orders marked salary for any year exceeded the amount of the by-law governing the same. The order of January 14th, 1906, of $80.00 passed by council for balance of salary for 1905 was passed on the statement presented to the council furnished to me by the Treasurer. If the orders, May 25, 1905, $25.00, and September 9, 1905, $30.00, were actually for salary, although not treated as such in the Treasurer's statements to me, presented to the council, my salary would then be overdrawn by that amount."

The evidence quoted above fully describes this transaction. The council with these facts before them, can take what action to them may seem proper under the circumstances, or refer the matter to the solicitor for his opinion.

The salaries of the collectors have usually been paid after the rolls are returned. The salaries for 1907 tax collection has been included in the liabilities and the interest collected on the 1907 roll charged to the collectors. A statement of the settlement of the 1907 rolls is attached.

Matters of Policy.

I received a number of complaints from ratepayers in regard to the action of the council in matters of policy, such as:—

(*a*) Unequal assessment for drainage purposes.

(*b*) Errors by engineers.

(*c*) Omissions to discover or correct errors in assessment at Court of Revision.

These have not been considered, as they are not within scope of an audit of this character.

Schools.

In conformity with my usual custom, the secretary-treasurer of each school section, for which taxes are levied in the township, was requested to bring in the books and vouchers to be examined, to see that the amounts paid by the township, government and county grants, and interest on school funds, passed through the books of the section in the proper way.

The Treasurer, through an error, paid orders on report of Separate School Inspector. His attention has been called to these, which will be corrected.

The funds of a number of the sections are not kept in accounts in banks.

No mention of remuneration for secretary-treasurer is made in the minutes of the annual meetings of some of the sections. Subsection 4, section 17, Public School Act, R.S.O. 1897, reads: The secretary or secretary-Treasurer may be allowed such compensation for his services or for attending to the repairs of the school house or premises as shall be agreed upon by resolution of the annual meeting duly entered in the minutes."

No remuneration can be legally claimed unless the minutes comply with the above.

All interest on school funds should be paid into the school account and a fixed sum paid the secretary-treasurer as remuneration for services.

In a number of sections, vouchers and accounts are destroyed after the annual meeting. These should be retained. The secretary-treasurers of some sections claim the use of the money as compensation for services.

Bonds of school officials produced by the Clerk cover only a few sections and many of these are inoperative, owing to the fact that they were given by persons who have ceased to be officials. These are referred to under the headings of the sections.

More care might be exercised in the recording of transactions in the minutes in nearly all of the school sections to the advantage of the ratepayers. In a number of instances pages are missing from minutes and cash books.

Statute Labour.

Under by-law 13, of October 14, 1897, the pathmaster of each beat into which the township was previously divided, was exempt from statute labour tax by virtue of his office in the division in which he acted as pathmaster, and remunerated by payment of $1.00 per year on the return of his list properly certified.

On August 10th, 1903, by-law was passed, abolishing statute labour from January 1st, 1904, and collecting 50 cents per day on roll.

On June 6th, 1904, by-law No. 11 was passed, doing away with the performance of statute labour by the day and collecting 50 cents per day on the roll in lieu of statute labour work. No pathmaster's commutation tax to be charged against him for the year he acts as pathmaster, and to get $1.00 on returning his list. The pathmaster may work himself and employ his own team at the same remuneration per day as a man employed by him. To issue an order on the Reeve for work done, himself or by others, to be charged to fund of his beat.

On October 31, 1904, by resolution of council the collectors were instructed to accept each pathmaster's taxes less his statute labour tax for 1904, which was put on the roll.

There are pathmasters in beats with only a few ratepayers. This is clear from the evidence of Roderick McKenzie, given under oath as follows:—"For 1907 the only papers I got as pathmaster was the statement that the commutation money for beat number 53, less 20 per cent., 1907, is $4.00. No list of names of persons to perform statute labour for 1907 in my beat was furnished me at all."

"There are only two other persons besides myself comprising beat number 53, and no work was performed except for which the four dollars was provided."

The above shows that under the present system a ratepayer is exempt from statute labour tax on his own land is his beat and receives $1.00 for

expending and reporting the statute labour contributed by two others. This may be an extreme case, it is the only beat on which any evidence was taken.

The council, by a motion on March 19, 1907, deducted from the beats 20 per cent. of the 1907 statute labour tax as well as 20 per cent. of the balance at credit on December 31, 1906, and transferred it to the credit of roads and bridges account of the respective division. The council have no power to override or amend a by-law by a resolution. Those beats with overdrawn accounts contributed nothing, while the others were charged with 20 per cent. of December 31, 1906, balance at their credit.

The manner in which the matter of statute labour tax and pathmasters' exemption is carried on in the township is unjust and should be promptly rectified. One pathmaster may be exempted from paying statute labour tax on an assessment of one thousand dollars while another may be exempted from ten thousand dollars for performing the same duties, is not fair to all the ratepayers.

It would be in the interest of the township if the statute labour tax were collected on the rolls, from all alike, except what has been commuted, according to the assessment, and the whole sum expended by not more than four ratepayers, one for each division, and the money expended on the roads in the division in which it is contributed, the commissioner who expends it should be directly responsible to the ratepayers for its use to the best advantage of all in the division.

By doing away with the performing of statute labour work and placing the amount on the roll to be collected, the main purpose for which pathmasters were appointed ceased to exist.

All other money than statute labour tax raised on the tax roll should only be expended by the council as a whole.

Roads and Bridges.

Members of the council have not been authorized by any by-law or other legal authority to issue orders on this account, but since there has been an account of this name it has frequently been used by commissioners to charge orders to for work in the division, when the expenditure would have overdrawn the division account to which the commissioner was only entitled to issue orders on.

This account will if carefully examined indicate to some extent the amount of work in this audit, and the condition in which the accounts were kept. There were over two hundred items charged to other accounts in error, which it was necessary to charge this account to make the corrections.

The treasurer's ledger showed on December 31, 1907, a balance of $1,246.84 to the credit of this account and after making all the corrections it was necessary to transfer $2,141.21 more from the Township of Dover account in order to balance and close this account as on December 31, 1907.

Debentures on Drains.

These are authorized under a clause of the by-law of each municipal drain, which states the township may issue debentures of the corporation payable within the stated number of years from the date thereof. Then under another clause the collection of taxes to meet the debentures is to be

divided into the number of parts as these are annual payments of debentures, and collected in each year for the stated number of years after the final passing of the by-law during which the debentures have to run.

Debentures issued for 8 by-laws passed in 1906, were dated when the debentures were sold, the levies on the roll to meet them are not in accordance with the maturity of the debentures, the result is, the ratepayers on these drains are paying assessments more than a year in advance of the time that the debentures mature, but will only pay for the number of years that the by-law calls for. In this way the drain account does not get credit for accrued interest owing to the way the debentures are dated.

In 1907, there were no debentures sold at all, these have been dated 1908, when issued for by-laws passed in 1907, so that those drains against which levies went on the 1907 roll will be paying taxes to meet debentures not maturing for over a year after the taxes are paid. The attention of the council is called to this so that the treasurer will see that the debentures are dated in accordance with the levies. The drains will then be credited with any accrued interest that will be received from delay in the sale of debentures. The general funds now get the benefit of money raised on some by-laws to meet debentures a year in advance of when it is to be paid out.

In recent years tenders are asked for sales of debentures, this was not always done.

Bonds.

Very few of the officials of school sections are under bond, which is shown in the section of this report which deals with schools.

The bond of the treasurer was not produced as its whereabouts have not been discovered. From an agreement dated March 15, 1897, in which Theophilus Faubert was released from the treasurer's bond dated February 26, 1887, the names of those who signed the release were:—

Medric Caron.
Moses Caron.
Joseph Caron.
Edward Caron.
Antoine Faubert.
Peter Faubert.
Napoleon Caron.
H. N. Bechard.
Antony Daniel.

I am informed that some who appear on this bond have since died.

The treasurer should furnish a new bond.

The bonds of the collectors have been examined and are found in order with the exception of alterations not initialed by the witness. The tax rolls of 1907 have been returned and this is pointed out so as to prevent its recurrence.

The matter of the sufficiency of bond of the treasurer should be inquired into and reported on every year by the council, section 288, chap. 19, Consolidated Municipal Act, 1903, and by the auditor or auditors under subsection 3 of section 304, of same Act, but this does not relieve the council from their duty under section 288.

During the work on this audit the Reeve was furnished with a statement by me of claim against the County for overcharge for maintenance of inmates in House of Industry, by County of Kent, as follows:—

Date.	Weeks.	Keep at $1.50 per Wk.	Amt. Paid.	Overcharge.
May 31, 1899,	61 5-7	$92 57	$95 90	$3 33
May 31, 1900,	277 6-7	416 79	431 31	14 52
May 31, 1901,	356	534 00	552 03	18 03
May 31, 1902,	307	460 50	501 42	40 92
May 31, 1903,	282 6-7	424 28	462 45	38 17
May 31, 1904,	268	402 00	419 82	17 82
Dec. 31, 1905,	297	445 50	514 60	69 10
Dec. 31, 1906,	313 6-7	470 78	485 66	14 88
		$3,246 42	$3,463 19	$216 77

Township of Dover total claim against the County of Kent for overcharge for maintenance and support of inmates to December 31, 1906, under subsection 6, section 524, chapter 223, R.S.O. 1897, $216.77.

This account was presented in December, 1907, to the county finance committee and paid.

Financial Standing of the Township, Dec. 31, 1907.

The attached statement of assets and liabilities Schedule XVI. includes all known assets and liabilities of the township on December 31st, 1907, except such as are referred to in this report, and refunds on drains, pathmasters' orders, balance of cost and audit.

The assets include all overdrawn drain accounts, many of which will not be available till such time as the amending by-laws are passed to collect them and placing them on the roll, or when large, to be spread over a term of years and sell the debentures to reimburse the general funds. Some drain accounts in this report have been creditd in 1908, with amounts for which debentures were sold.

The current liabilities which include, $1,020.72 balance at credit of beats and road divisions, exceed the available assets, which include the overdrawn drain accounts by $864.83. The total assets including fixed assets exceed the total liabilities by $1,135.17. This showing is not such as is desired, but is occasioned by the way the affairs have been conducted in the past, by charging to drain accounts, over $3,000.00, which should have gone against the general funds in the years in which the orders were issued.

The financial standing as shown above will impress upon the members of council the necessity of immediately taking steps to pass amending by-laws for drain accounts that are heavily overdrawn and sell debentures to reduce the bank overdraft occasioned by these overdrawn drain accounts and delay in disposing of the debentures on the Boyle Drain.

As a Result of the Audit

The books of the township are written up to Dec. 31, 1907. The treasurer has been shown any changes to be made in the future and given instructions how to make the necessary journal and other entries. The drain

accounts are shown with the amounts at debit or credit after all correcting entries have been made to Dec. 31, 1907.

The following assets have been collected or are included now as assets in the accounts of the township in the treasurer's ledger:—

Town Hall, lot, shed and interest in well	$1,500 00
Township road scrapers (six)	500 00
Savings bank account to meet McTavish estate liability	530 00
Interest in bank account credited McFarlane Drain	79 66
Interest in bank account credited general funds	8 30
J. Welch, clerk (since paid)	111 00
Drainage levies omitted from rolls	54 76
Township of Chatham	431 53
Township of Camden	22 64
County of Kent, overcharge keep of poor (paid)	216 77
Chatham, Wallaceburg & L. E. R. R.	66 86

Conclusion.

The absence of some vouchers, records, accounts and documents, the mixed conditions of the ledger accounts and no journal kept by the Treasurer, covering the years over which this audit extended, has caused time to be occupied, and incurred expense in this investigation, that would have otherwise not been necessary. All papers and documents in connection with the affairs of the township, were asked for, some of which were missing and were not produced. This report is based on such information, records, papers and documents as were produced, information procured from officials, members of the council, ratepayers by correspondence and conversation and evidence taken under oath. Accounts have had to be analyzed in detail, for each of the awards, school sections, drains and other accounts for the years covered; necessitating the writing of a large number of letters, and the examination of over thirty ratepayers under oath regarding accounts; an enormous amount of work in separating the items charged to the different accounts, to which they did not properly belong. This all had to be done before a conclusion could be reached. There were many irregularities, but only those of the greatest importance are referred to in this report. It is not deemed necessary to give further details than contained in the schedule attached.

I desire to call attention of the council to the fact, that the affairs of the township, during the year 1907, have been conducted in a similar manner to that of former years, with some improvements, and that owing to the methods of carrying on the business regarding the drainage and other expenditures; that unless the books are annually audited or even monthly, would be better, by some competent person, who will go thoroughly into each drainage by-law and account; they will again become muddled and a great deal of benefits derived from the expense of this audit will be lost to the township.

The officials of this township are not remunerated in proportion to the work done to keep the affairs of the municipality in order. I have yet to find a Township Clerk or Treasurer whose pay is in keeping with the duties of his office, when properly performed.

Accompanying this report are:—

(*a*) A drainage levy book in which are written up the schedules of all drainage by-laws in detail, of drains against which collections are yet to be made.

(*b*) Eight copies of a map made during this audit, for the use of the officials, it is on linen backed paper, on it are shown all the municipal drains, a different colour for each different part of a drain, with the by-law number. This map will be a benefit to the municipality for years to come, to direct where charges should be made.

(*c*) Two ledgers for the Treasurer, opened up on Dec. 31, 1907, according to this report, and into which I have entered all corrections in accounts to Dec. 31, 1907.

(*d*) A journal for use of the Treasurer in which have been made the entries for 1907, tax roll, and all corrections in accounts found in the audit.

It is unfortunate that the affairs of the township have been allowed to run so long and the accounts be mixed in the manner in which they were found at the time of this audit.

If the engineers' report on drains and the amounts to be contributed by the general funds, for bridges are closely watched in the future, the general funds will not have to contribute so much to roads and bridges account for the upkeep of over fifty bridges, marked on the map to which the general funds have to maintain in whole or part.

The officers have performed their work as they were instructed. It is the system, not the officials, which is to be blamed for the manner in which the affairs have been conducted.

With so many drains of the same name, there cannot be too much care exercised to keep the accounts correct. The importance of the council passing and directing to what accounts all orders issued for repairs to drains and bridges cannot be too strongly drawn to your attention.

The audit of the Township of Dover is the first government audit in the Province, in which it has been found necessary to make and furnish the township with a map of all the municipal drains in order that they may be able to properly direct to what account repairs or expenditures should be charged in the future.

I desire to thank the officers and members of council, for the willing manner in which they have rendered substantial assistance from time to time, during the continuance of the audit.

The attention of the council is called to section 14, chaptered 228, R.S.O. 1897, which requires that the recommendations made in this report shall be carried into effect.

I shall be pleased to furnish any further explanation, or advise with the council, in reference to any of the matters mentioned, and recommendations contained in this report.

All of which is respectfully submitted,

(Signed) A. F. Falls,

Chartered Accountant.

Chatham, Ontario, May 30, 1908.

The cost of this audit to the Township of Dover for services of Mr. Falls and staff was $1,724.15, including expenses.

Township of Dover. Abstract of Receipts.

Auditor's Report of the Village of Weston, in the County of York and Province of Ontario.

The Provincial Municipal Auditor, Parliament Buildings, Toronto, Ont.

Sir,—In accordance with the Order in Council passed on the 7th February last, copy of which was conveyed to me by Messrs. W. P. Bull, Hollis & Wilson, Barristers, under cover of their letter of 10th February, I made an inspection, examination and audit of the books, accounts, vouchers and moneys of the Municipal Corporation of the Village of Weston, for the year 1907, and now beg to hand you my report thereon.

Officials.

Prior to 1907, Mr. J. H. Taylor had occupied the dual office of Clerk and Treasurer. The Council of 1907 saw fit to make a change and one of their first acts was to appoint Mr. D. Rountree, Jr. as Treasurer, continuing Mr. J. H. Taylor in the office of Clerk, and appointing Mr. Wm. Ellerby, Collector of Taxes, he having acted in similar capacity also in former years.

Accounts.

For the purpose of this report I will divide the accounts into three headings, General, Electric Light and Local Improvements.

General Accounts.

I found on commencing my inspection on 17th and 18th February, that the regular Municipal cash book had not been entered up at all throughout the year by the Treasurer, but in anticipation of the annual audit, had been written up by him after close of the year, being assisted and guided in the classification of the various receipts and expenditures by the Clerk and former Treasurer. The record of Receipts and Disbursements kept by the Treasurer throughout the year consisted of an old fashioned two column Cash Book and this even did not shew any evidence of being correctly kept or reliable, as there had been a number of duplications and omissions of entries both in receipts and disbursements, which came to light during the course of my examination. Neither the record kept by the Treasurer nor the regular Municipal Cash Book, written up therefrom in anticipation of the audit, had been balanced and it was necessary for me after verification of the Receipts and Disbursements to balance the Cash Book and arrive at the amount due the Municipality by the Treasurer and after necessary adjustments for duplication of entries and omissions had been made, this balance due by Treasurer at 31st December, amounted to $2.66. All moneys of the Municipality as recorded in the books appear to have been quite regularly banked and all disbursements of same were duly made by cheque, signed by the Treasurer and countersigned by the Reeve with exceptions, hereinafter mentioned in accordance with the by-law of the Municipality in that behalf and the adjustments of the Bank accounts were duly checked and amount of Overdraft of Current Account $2,991.65 and balance on deposit at credit of special account re Local Improvements $367.81 verified.

Receipts.

The receipts for arrears of taxes and for current taxes were satisfactorily verified by the rolls for 1906 and for 1907, and, in addition to verification by adjustment of the rolls, I had produced to me by the Collector, the receipts given him by the Treasurer for amounts of taxes paid over by him from time to time. The miscellaneous receipts other than taxes were, I found, more difficult of verification, as there appeared to be no receipt book from which official receipts of the Municipality were issued for moneys coming into the hands of the Treasurer. This was particularly the case in regard to the dog taxes. There were no records of these on the Collector's roll whatever. A by-law was passed on May 6th, 1907, providing a tax of $2.00 on dogs and $4.00 on bitches, but there seems to be no record of what number of animals there were in the Municipality subject to this tax. Tags were purchased, Nos. 1 to 15 inclusive for bitches and 16 to 90 inclusive for dogs, and of these, according to record of tags issued, 6 were issued at $4.00, total $24.00; 42 were issued at $2.00, total $84.00; in all $108.00, the amount accounted for by Treasurer. This leaves 9 tags for bitches to be accounted for as not issued, and these tags I find on hand, and 33 tags for dogs to be accounted for as not issued and of those only 27 were produced to me, the explanation given me being, that the missing ones, Nos. 44, 49, 53, 72, 79 and 87, were lost between the Clerk, Mr. J. H. Taylor, who originally

had charge of the issuing of them, and Mr. J. A. Pierson, the constable to whom they were finally handed, to look up delinquent owners of canines and collect the necessary tax.

Expenditures.

As mentioned previously all disbursements were made by cheque and the endorsed cheque in all cases represented the voucher for the disbursement, as comparatively few of the original accounts were receipted. In conjunction with the cheques I examined the original accounts with the minutes of Council at which they were passed for payment and with very few and unimportant exceptions had the authority of the minutes for the payments. Some half dozen or more cheques were either not signed by the Reeve or were not endorsed by the party in whose favour drawn, and while from other evidence before me these payments were properly made, the payment of them by the bank without proper signatures or endorsements indicate a laxity on the part of the clerks of the bank in not giving these proper scrutiny, and which my experience shows me is quite common amongst banking institutions, a fact which is regrettable as it weakens to some extent the safeguards thrown about the drawing of cheques by institutions of various kinds to protect their funds.

Owing to the fact that the Municipal Cash Book was entered up at close of year and the classifications of expenditures made from the cheque stubs without reference to the original bills, the clasification as made up in my statement of detail of receipts and disbursements differs to some extent from that shown in the cash book, as in my examination of the accounts I found a number of them incorrectly classified. This was particularly the case in connection with printing and advertising expenditures and legal expenditures in connection with the Local Improvement by-law and works, which had been charged in Cash Book against "Printing and Advertising Account" and "Law Costs Account" and as no ledger is kept by the Treasurer in connection with his accounts, no reversals of these errors have been made but notations made on the Cash Book and necessary changes made in the statement of details.

An error of $12.45 appears to have been made in payment to the Standard Fuel Company of Nov. 19th, 1907, for invoice for car coal, Nov. 6th, $106.26 less freight. In settling for this car of coal the Treasurer appears to have deducted $51.03 for freight, whereas the amount which should have been deducted for frieght on car from Standard Fuel Company was $63.48, the amount deducted being freight on car of coal purchased from another dealer.

The following matter which came to my attention, I feel it my duty to refer to:—

On January 14th, 1907, the Council received applications or tenders from agents of several different Insurance Companies for the Insurance of $3,400, on the Power Plant. These tenders (of which there were 5) ranged from $68.88 per annum, the highest, to $49.00, the lowest, the next to the lowest being for $51.00. That for $49.00 was made by Mr. J. H. Taylor, the then Clerk and Treasurer, acting as agent for the Anglo-American Insurance Company. On examining the Insurance Policy and Premium receipt in the course of my audit, I noticed that both of these shewed the premium to have been $51.00, while the cheque of the Municipality drawn to J. H. Taylor, agent, was for only $49.00, and on asking for an explanation of the matter Mr. Taylor informed me that he had thrown off $2.00

from his own commission to get the business, which would hardly seem a proper advantage to take over the other tenderers, when one at least quoted the same premium as that of the Anglo-American Insurance Company; the renewal of this policy from 18th January, 1908 to January, 1909, has been made with the same Company and renewal and premium of $51.00 paid.

A payment was made on Dec. 31st to the *Times and Guide* (J. K. Keefler) of $35.00 for printing the annual statement of the Treasurer. The account produced to me for this was:

December 30th, printing 300 copies financial statement as per tender, $35.00; additional for 100 extra copies, $10.00; total $45.00.

The amount 300 copies had been changed to read 250 copies, but the order of the Reeve for payment of the account under date of December 31st, read to pay $35.00 in full for printing Annual Statement, and I understand that the $10.00 charged for additional copies was added to a subsequent account and passed for payment by the new Council on 25th January, 1908. These statements were absolutely useless as there were many inaccuracies in the printing of the figures and a whole page of the original proof had been omitted to be set up in the type, and the work should never have been paid for.

There were a number of payments made in October, November and December, 1907, to The Moffat Stove Company, Limited, for coal supplied for the Electric Light Power House and also a payment for a stove and fittings for the Council Chamber. So far as prices are concerned, no fault can be found, but the question is not quite clear as to whether these payments are contrary to the Act, one of the members of the Council being an Officer and Director of the Stove Company which is incorporated.

During 1907, a Citizens Committee was formed with a view of inducing industries to locate in the village. Two amounts were paid by the Treasurer on August 22nd and 27th of $5.00 and $10.00 respectively, on the order of the Reeve in connection with procuring surrender of a lease of some property sought to be acquired and subsequently acquired by these industries. This Citizens Committee incurred some expenditures under agreement with these industries in sinking wills and building foundations for the factory buildings amounting to $797.50 which, less $415.00 provided by private subscriptions procured by the Committee, were reported by Mr. G. M. Lyons, Treasurer of the Citizens Committee, at a meeting of the Village Council, on November 18th, 1907, when the Council sitting as a Committee of the whole, on motion by Councillor McFarlane, seconded by Councillor Moffat ordered payment of the deficit of the Committee, $382.50, and which was subsequently paid to the Treasurer of the Committee. This payment it would seem was wholly irregular.

Electric Light Accounts.

The Municipality own and operate an electric light plant, Mr. J. Rumney being the electrician and engineer in charge of the plant, the reading of meters and keeping of records of the periodical lighting charges being in the hands of the Clerk, Mr. Taylor.

During the period that Mr. Taylor occupied the dual office of Clerk and Treasurer, his custom was, when making his periodical readings of meters, to collect the bill at the time where possible, and a large proportion of the rates were collected in this way. On the separation of the office of Treasurer from that of Clerk, Mr. Taylor continued as part of his duties to make the readings of the meters, collecting as before the amount of the bill

where possible. These readings were made monthly during the first half of the year and every two months during latter half. After completing his reading of the meters for each period he then prepared a list of the consumers with the amounts of their lighting bills, marking thereon as paid those collected by him on his rounds. These collections he deposited in his personal account and he would then hand the list to the Treasurer with cheque for amount of his collections, that the Treasurer might collect those still unpaid. No proper record of accounts with various consumers was kept and in order to verify the collections of the Electric Light receipts and the outstanding revenue at close of year, it was necessary to follow through these monthly lists with the stubs of the meter reading books and the collections entered in the cash book, and carry forward or check forward those unpaid to the sheet for following month, and in doing this I discovered several small items, which owing to the divided responsibility of collecting and the lack of proper records, the amounts of which collected by one had not been reported and accounts unpaid were omitted to be carried forward when collecting for following month.

An amount $6.00 paid to the Clerk in May, and paid over to the Treasurer by him in same month was discovered had not been entered by Treasurer and was entered in January, 1908. Two amounts collected during the year by the Clerk, $10.00 from A. Mallaby and $4.26 collected from H. Witty on November 15th, it was discovered during course of audit had not been paid over to the Treasurer and these have been entered in 1908. The former amount Mr. Taylor remembered distinctly about Mr. Mallaby meeting him on the street on a Saturday night and handing him $10.00 to apply on his lighting account, which was somewhat in arrears, and he put it in his pocket and never thought of it or remembered it until brought to his notice during audit. A proper system of records for these electric light readings and collections should be installed so that there would be no difficulty in arriving at the outstanding bills from month to month.

Local Improvements.

Early in 1907, the Council took up consideration of various improvements which they contemplated carrying on in the municipality during the year, and at a regular meeting of the Council held on April 2nd a by-law, No. 371, was introduced to provide for raising of $15,000 on general credit of the Municipality for the purpose of grading and placing metal on streets and laying of sidewalks on certain streets, and to procure apparatus for fire protection purposes. This by-law was read a first time, passed through committee, and read a second time. Then a special meeting of Council was held on April 5th, at which meeting it was moved and seconded that by-law 371 be reconsidered, which was apparently carried, and a subsequent motion was made and duly carried that this by-law be read six months hence. It was then moved and seconded and carried that separate by-laws be drawn for purpose of issuing debentures for streets and sidewalks; and for apparatus for fire protection. By-law 372 was then introduced to borrow $13,500 on general credit of municipality for purpose of grading and placing metal on streets and laying sidewalks on certain streets, was read first time, Council went into Committee, rose, and reported blanks filled, by-law read a second time and providing for vote of ratepayers on April 29th, and for proper publication of the by-law. A by-law to provide $1,500 for apparatus for fire protection purposes was put through similar procedure, and both these by-laws were defeated by the ratepayers when the vote was taken on April 29th.

At the regular meeting of the Council of 6th May, a resolution was passed granting to certain petitioners a cement sidewalk on frontage tax system, and a resolution was also passed that in future all permanent walks be laid of cement and work done on Local Improvement plan.

At the next regular meeting of Council on May 20th, several petitions were presented to Council, some being granted and instructions given to ask for tenders for the work, and some were referred back for petitions to be more largely signed.

At the next regular meeting of the Council on June 2nd, tenders were received from Griffin Bros. at 13 cents per square foot and The Maple Leaf Paving Company 11 cents per square foot and on motion duly made and seconded, that of The Maple Leaf Paving Company was accepted, the acceptance of which was duly notified to The Maple Leaf Company by letter of the Clerk under date of 4th June, enclosing copy of specifications. This letter of acceptance and the specifications refer particularly to the walks to be laid on two streets (which were the streets for which petitions were granted at meeting of 20th May) but the tender of The Maple Leaf Company, based on this specification is for all concrete walks and crossings to be constructed by the Village of Weston during 1907. This tender and its acceptance together with letter of acknowledgement from Paving Company under date of June 8th, is the sole contract between The Maple Leaf Paving Company and the Village of Weston, and represents the whole authority for the payment to that Company of $9,582.50 during the latter part of year on account of concrete pavements, etc. laid, (there being no certification by any engineer or official of the Village that the walks were properly constructed and in accordance with the specification) other than authority of Council at meeting of 18th November, when the account for balance due the Paving Company, $3,086.85, was presented for payment and was ordered paid less 5 per cent. ($504.35) to be retained as guarantee of quality of work, two payments of $2,000 each and one of $3,000 having been made on account during September and October.

At the regular Meeting of Council at which the tender of The Maple Leaf Company was accepted, several further petitions for sidewalks and recommendations for sidewalks made by the Committee on Roads and Bridges were received and passed to be done under Local Improvement by-law No. 378, which was introduced at this meeting, was read a first time, Council went into Committee, and reported and by-law read 2nd and 3rd times and passed.

This by-law provided that all future expenditures of the Corporation be made under this by-law for several classes of improvement work and services hereafter mentioned for which special provisions are made in section 664 of the Consolidated Municipal Act, 1903.

This by-law recites under four headings the various classes of work than can be constructed, and that they "shall as to 40 per cent. of cost thereof be by special assessment on the property benefited and not exempt by law from assessment. except in cases of sidewalks constructed under section 677 and 678 of the Municipal Act.

(1) By petition of two-thirds in number of owners representing one-half in value of real property to be benefited.

(2) By report of the Committee on streets and sidewalks and adopted by Council.

The minutes of the meetings of Council throughtout July, August and September, record presentation of petitions for sidewalks, holding of courts of revision, etc. in connection with these sidewalks petitions: the presentation of reports of Committee on Roads and Sidewalks, recommending certain

sidewalks as in interests of public generally and to be undertaken on the initiative plan under section 677 of Municipal Act, and the adoption of these reports by Council. It is not at all clear to me from the records of proceedings of Council whether all details in connection with each sidewalk undertaken were precisely in order, but the intention was no doubt they should be so. It would appear though that where they could not get enough signatures to petitions for these walks that, at a subsequent meeting, the Committee on Roads and Sidewalks would bring in a report recommending such walk which would be adopted by Council and the work proceeded with. As the cost of the sidewalks constructed under these petitions is assessable 40 per cent. against the properties benefited and 60 per cent. against the Municipality generally in addition to street intersections and flankages, and the cost of the sidewalks constructed on the initiative under section 677 of the Municipal Act assessable wholly against the properties benefited except as to street intersections and flankages, there will be considerable difficulty experienced in endeavoring to arrive at those done by petition and those done on initiative, for the purpose of drawing up necessary debenture by-laws, on account of the manner in which these petitions and reports are mixed up as the records shew.

The Local Improvement by-law was originally drawn with the idea that an Engineer would be looking after the construction of the walks on behalf of the Municipality to give necessary certifications and reports on work, but wherever the name engineer appeared it was scored out, and "Committee" (meaning Committee on Roads and Sidewalks) substituted.

Section 24 thereof provides that certification of satisfactory completion of the various works for various purposes shall be made by the Chairman of such Committee and;

Section 25 provides that the Treasurer shall as soon as possible after receipt of the certificate of the Chairman of the Committee of the final completion of the work, under last preceding section, ascertain cost of complete work, interest on moneys borrowed for construction, etc. for purpose of arriving at amount to be raised by by-law.

So far as I have been able to ascertain none of these provisions were carried out nor have I been able to procure any certification as to proper completion of any portions of the work, and I understand that large portions of the work were not constructed within the provisions of the specifications attached to acceptance of tender, and as a result are in bad condition.

Regarding moneys borrowed for carrying on these Local Improvements. At a regular meeting on June 17th, 1907, a resolution was passed authorizing the Reeve and Treasurer to arrange with the Bank for an advance of money for Local Improvements, said advance to be kept separate from General Account.

Three cheques, September 10th, $2,000, October 10th, $2,000 and October 23rd, $3,000, appear to have been issued under this resolution to The Maple Leaf Paving Company on account of sidewalk construction, but these cheques were drawn on and charged to the "General Account" of the Municipality at the bank. These cheques created an overdraft in addition to that required for general purposes of municipality somewhat in excess of the amount the bank cared to advance on a mere resolution, and at the regular meeting of the Council on October 21st, the following resolution was passed. "Moved by Councillor Moffat, seconded by Councillor Coon and resolved; That pursuant to the powers given by section 672 of the Municipal Act the Reeve and Treasurer be and they are hereby authorized to enter into an agreement with the Bank of British North America for the temporary

advances or loans required for meeting the cost of the Local improvements done or to be done by and on behalf of the Corporation of Weston during the year 1907, said advance not to exceed the sum of $15,000 at any one time, and that the seal of the Corporation be attached to this resolution."

The bank apparently did not consider they could legally advance the amount required, and it was then necessary to go elsewhere for it as the resolution above referred to named only the Bank of British North America, so a special meeting was called on October 28th, when it was moved and seconded that the resolution passed at last meeting be rescinded, which was duly carried.

A resolution was then moved, seconded and declared duly carried in precisely same terms as that passed on October 21st, substituting for the words "The Bank of British North America" the words "A Bank, person or body corporate."

Acting on this resolution the Reeve and Treasurer arranged with The Equity Fire Insurance Company for a loan of $10,000, an agreement drawn by the solicitor of that Company (who was also solicitor for the village of Weston) having been executed by the Reeve and Treasurer and to which the seal of the Corporation was attached, but there was no record of this agreement or its execution in the minute book of the Municipality or in the hands of the Clerk, nor had he any knowledge of the nature of the agreement, until demand was made by The Equity Fire Insurance Company for repayment of loan on 18th January, 1908, when what purported to be a copy of this agreement was furnished for the information of the Clerk and of the present Council.

The amount of this loan $10,000 was received and deposited by the Treasurer of the Village in a special account on November 20th, and the cheques issued on account of Local Improvement work previously referred to, along with interest charges on these special payments, were transferred by the bank from the General to the Special Account. Curiously, however, no entry was made by the Treasurer of the receipt of this amount (although in his statements submitted to Council on December 16th, he showed this amount as received) until when endeavoring to balance up his Cash Book with the asistance of the Clerk, some time in January, 1908, on finding his balance was out somewhere about that amount, the omission was discovered and a memorandum in pencil was put in in the old two column Cash Book, under date of November 20th, "to see following page" and the entry for the $10,000 was put in after the entries for December had been completed.

Suit was entered against the Corporation by The Equity Fire Insurance Company for the recovery of the above amount, and I understand judgement has recently been given against the Corporation which places the present Council in a somewhat embarrassing postion until such time as the work can be properly gone over by some engineer or other competent person and proper schedules of measurements and cost of sidewalks constructed by petition, and sidewalks constructed on initiative, prepared, and courts of revision held for purpose of framing necessary by-law for issuing of debentures for the work.

Re Weston Public School.

I have audited the accounts of the Treasurer of the Public School Board (Mr. John Henshaw) and statement of Receipts and Disbursements is appended to this report. His accounts shew evidence of being somewhat carelessly kept, as there were clerical erors in both entries for receipts and disbursements. His books were not balanced off for the year when audited

by me on 30th April, and on balancing the Cash Book to 31st December, 1907, I found there was a balance due the Treasurer of 71 cents arising out of the clerical errors above referred to, with balance in bank at 31st December of $439.88, which was duly verified by Bank Pass Book, there being one outstanding cheque of $45.00. He appeared to have kept two cash books, one apparently kept by himself throughout the year, and a second one written up for purposes of audit more carefully, but the inaccuracies above referred to occurred in both. The School Board rent the rooms in the school to Lodges and Societies for purposes of their periodical meetings, but I could find no independent records to vouch the receipts from this source. The Cash Book kept by the Treasurer throughout the year shewed under date of April 13th, 1907, the following entries as receipts: A.O.U.W., rent one-quarter, $4.50; L.O.L., Weston, J. Bell, $9.00; L.O.L., Weston, Thos. Griffith, $18.00; S.O.E., Dr. Charlton, $18.00; C.O.O.F., T. Simpson, $18.00; while the other Cash Book, written up for purposes of audit, shewed these entries under date of December 30th and deposits to credit of School Board Bank Account for these amounts and to Balance Cash (as the Treasurer had figured it out) $54.00 and $14.06 were made on December 30th and 31st respectively, the explanation given me by the Treasurer being that he had entered in his Cash Book in April, the amounts which should be received for rent of school room during the year, so that they would not be overlooked and had deposited the amounts on last day of year so as to have all funds for year in the bank, though he had not even collected it all at that time. The A.O.U.W., however, under date of Feb. 25th, 1907, gave notice they did not require the room after that date and paid rent for quarter, $4.50, which is one of the amounts entered on April 13th.

In examining the minutes of the board in connection with my audit and as to the revenues above referred to, I found that the minutes of April 13th report the payment to the Secretary of the board of of $1.50 by Mrs. Briggs for use of School Room for Daughters of England, but could find no record of this in the Treasurer's accounts, and found on enquiry that it had never been paid over by the secretary and was in his hands on 14th May, 1908. The statement of Receipts and Disbursements of the Public School appended to this report shews also memo of unpaid liabilities of the board, so far as I was able to ascertain them, and also amount owing the board by the Corporation in respect of the 1907 levy, as at 31st December, 1907.

There were two small payments made during the year and charged as paid Mrs. A. M. Barton. These payments were for water for use on school grounds and for flowers supplied for beds in school grounds. The grounds of Mr. Barton adjoin the school grounds and these payments were made in this way as Mr. Barton was a member of and secretary of the School Board. The accounts were made out on bill-heads of Mr. A. M. Barton, florist, and cheques issued to Mrs. Barton were endorsed over to Mr. Barton. The clause of the Act which these roundabout transactions are intended to circumvent, is surely capable of broad enough interpretation to render such methods unnecessary so long as the safeguard is there to prevent wholesale fraud and wrongdoing.

Re Weston High School.

I have also audited the accounts of the Treasurer of the High School Board (Mr. James R. Dennis) and statement of Receipts and Disbursements is appended to this report.

His accounts I found in perfect order and very systematically kept. The bank account of the High School Board on 30th December, 1907, shewed an overdraft of $78.29, and on request of the manager of the bank of B.N.A. who did not wish this to appear at 31st December, 1907, the Treasurer signed a note for $100 at 10 days which was signed by The Weston High School Board, per James R. Dennis, secretary, and the proceeds $91.75 placed to credit of the High School Board Account resulting in a balance shewing in the bank of $21.46 at 31st December. The note was not signed by the secretary of the board and there is no authority on the minutes of the board for the transaction.

In auditing the receipts for school fees, with the stubs of the receipt books kept by the principal of the school, it would appear to me that while the aggregate fees for the year paid over to the Treasurer agree with the amount called for by the stubs, the actual amounts collected are not systematically paid over to the Treasurer each month. Fees paid in advance for term or for two or three months, appear to be retained and paid over to the Treasurer for the month to which they belong.

Reference to the Statement of Assets and Liabilities hereto appended will shew that the Council of 1907 left a legacy to the incoming council of an amount of nearly $3,000 of Liabilities on General Account over and above the outstanding assets on General Account, due to expenditures made in excess of provision made by them when striking the rate for 1907, the outstanding taxes at 31st December, being little more than the amount required to pay balance due the Public School Board.

I shall be pleased to supplement contents of this report in any way within my power. All of which is respectfully submitted.

Yours faithfully,

(Sgd.) Ralph E. Young,

Auditor, Chartered Accountant.

Dated at Toronto, June 1st, 1908.

The cost of this audit to the Village of Weston was $200.00.

Abstract of Receipts and Disbursements for the year ending 31st December, 1907.

AUDITOR'S REPORT OF THE TOWNSHIP OF PROTON, IN THE COUNTY OF GREY, PROVINCE OF ONTARIO.

J. B. LAING, ESQ., *Provincial Municipal Auditor, Toronto.*

Re Proton Township.

DEAR SIR,—Under authority of an Order-in-Council dated the 15th day of July last, in the name of our Mr. R. E. Young, we have investigated the accounts of the Township of Proton, for the period from January 1st, 1902 to January 25th, 1908, covering the tenure of office of the late Treasurer Mr. George Watson and beg to report as follows:

Receipts.

The items of receipts have been closely examined and for a large part verified by receipt, and for items where such was not available, or sufficient, by independent verification by letter or other satisfactory voucher. Quite the largest portion of the receipts is for taxes and the practice has been for the collector to deposit the money in the bank to the credit of the Treasurer's

account and obtain a receipt for each deposit from the bank on a page in his roll. The matter of taxes has been exhaustively gone into and will be treated later in the report with statements accounting for all taxes from entry on the Collector's rolls to a point of settlement.

Disbursements.

Payments have all been made in cash, or by draft paid for in cash,—no cheques having been used, so that the bank account and cash account have been practically merged and must be treated as one as there is little or no check the one on the other.

The payments have all been examined and proper authority to the Treasurer for payment found, by resolution of council or by order signed by the Reeve and Clerk, and in a large majority of cases by both. Receipts for these payments have also been found generally in the shape of endorsement on the order for payment, or by letter or other satisfactory voucher. There are but few exceptions where either the order for payment of receipt have not been found, and none worthy of more than passing reference.

General Account in Bank.

The surplus current funds of the Municipality were deposited by the Treasurer in the Bank of Hamilton in the Savings bank department to the credit of "George Watson." As mentioned under the headings of receipts, the money received for taxes—or the great bulk thereof—was deposited in this account by the Collectors from time to time. A large proportion,—but not all,—of these deposits can be earmarked in the bank account, but it is not possible to earmark, except occasionally, the deposit of other receipts, It is presumed that money received has been required at the time to make payments and has not been deposited, or balance only of the receipt deposited. It has been the custom for the Treasurer, at the times of meeting of Council, to draw an amount thought necessary to meet payments and take it to the Council meeting to pay the accounts passed,—a system in keeping we understand, with the knowledge and wishes of the Council. This, we are of the opinion, should be discontinued and a system adopted whereby all receipts are deposited in such a manner as to be capable of being traced into the bank account, and all payments made by cheque.

The cash balances shown in the summary of receipts and disbursements at the close of the years under review, can only be verified to the extent of the amount on deposit.

The statement following sets forth these balances showing amount on deposit and amount said to be on hand.

Dec. 31, 1902.—Cash balance		$959 26
	Amount on deposit	892 78
	On hand	66 48
Dec. 31, 1903.—Cash balance		1,119 57
	Amount on deposit	1,038 84
	On hand	80 73
Dec. 31, 1904.—Cash balance		1,906 96
	Amount on deposit	1,060 91
	On hand	846 05
Dec. 31, 1905.—Cash balance		3,695 70
	Amount on deposit	3,618 75
	On hand	76 95

Dec. 31, 1906.—Cash balance	4,066	64
Amount on deposit	3,127	63
On hand	939	01
Dec. 31, 1907.—Cash balance	7,090	51
Amount on deposit	6,832	55
On hand	257	96

The amounts on hand at close of 1902, 1903 and 1905 are not large, but the amounts on hand at the close of 1904, 1906 and 1907 are large,—particularly 1904 and 1906. It is a loose system that will permit of such large balances carried over as on hand, and unsatisfactory from the standpoint of the auditor unable to verify by actual count.

Up to and including the year 1904 the interest credited by the bank on this account was received by Mr. Watson. Upon inquiry we are assured by the Clerk, Mr. Laughlin, that this was in accordance with the understanding and knowledge of the council, and regarded as addition to salary, but there is no authority by minute, and as the interest credited up to the time mentioned was neither taken into or paid out through the cash book, it does not appear in the accounts. It appears that Mr. Watson's attention was called to this by the Provincial Municipal Auditor and thereafter, from the year 1905 on, the interest credited by bank appears in the cash book, and is shown on the summary of receipts, and the Treasurer's salary from that year was increased $50.00 as an offset.

The particular matters seemingly desired to be covered by this investigation appear to be an accounting for the funds of the municipality passing through the hands of the late Treasurer, Mr. Watson, and a verification of the Collectors' Rolls. We shall deal with the latter next under the head of Taxes; but before passing from the question of receipts and disbursements we have the following general remarks to make:—After a careful examination of the receipts and disbursements, and after exhausting every means available to verify the same, we are of the opinion that receipts have been properly accounted for and that payments have been made under proper authority. Starting with a cash balance on taking office on January 22nd, 1902, of $2,573.42, the cash account of the Treasurer has been traced through the years to January 25th, 1908, to the cash balance of $8,729.75, of which $367.47 was said to be on hand, and this cash balance was taken over and certified to by the incoming Treasurer, Mr. McMillan, and by the Township Auditor.

The weak point, which at this date can only be commented upon, has been the retaining of large cash balances on hand, to which attention has been drawn as at the close of the years and which appears to have been pretty general throughout. Mr. Watson claims that it was the custom to retain balances in hand to meet payments, and as such a system has been in vogue throughout, this explanation would seem capable of being accepted; but such a system is loose and should be changed as before suggested.

Passing from the cash book we come to the question of the records of the Township, and we find that no ledger has been kept. We need not point out the necessity of a properly kept ledger in a Municipality such as Proton, with its numerous drain, debenture, and sinking fund accounts; without which such accounts become mixed up and the closing of same becomes very much a matter of guess work, resulting in balances applicable only to a certain fund or account becoming merged in the general fund of the municipality to its profit or otherwise. Such has been the case with Proton, and while we will touch on some of these errors later in our report, we have not gone into the matter sufficiently to adjust the accounts.

It appeared to be, perhaps, without the scope for which the investigation was desired, and as the work necessary might consume considerable time, we have thought it best to obtain authority before placing additional expense on the municipality.

Taxes.

Commencing with the balance of taxes of 1901 uncollected, and the balance of arrears of taxes in the hands of the County Treasurer at December 31, 1901, we have checked the taxes throughout the years down to the close of 1907, and submit statement "G" showing adjustment of Rolls for each year, and statement "H," showing dealings with arrears of taxes between Township and County to the balance in the hands of the County Treasurer (including percentage added) uncollected at December 31st, 1907. In referring to statement "G," you will observe that the method of adjustment has been to debit the Collector for the face of the Roll as verified by us after correction of errors; and to credit with all cash collected, both before and after return of Roll, with amount returned to County Treasurer as being in default, and with amount claimed cancelled by order of Council,—leaving balance due by Collector when such appears. The item for taxes cancelled is not large, amounting in the years under review to $125.60, but the bulk of this amount apears to have been cancelled without evidence by minute of the Council. There should be a permanent record of the authority for all rebates. To compile statement 'H," we found it necesasry to have access to the books of the County Treasurer, as there was no continuous connecting link or record between the Township and County dealing with arrears of taxes. From lack of proper record we found two items of taxes lost sight of or cancelled without recording, which would have escaped our attention altogether, but for reference to the County Treasurer's books. These were taxes on part 1-5 acre, Lot 4, Con. 5, for 1898-9, $5.89 returned "Lands Occupied" for Roll of 1902 and taxes on Lot 23, Con. 19, for 1900-1-2, $16.09 returned "Lands Occupied" for Roll of 1903. These were not placed upon the Roll nor were they returned again to the County Treasurer, so that they are in the position of having been cancelled without record.

Debentures.

We submit statements "I" and "K" showing debenture debt of the Municipality at December 31, 1901, and December 31, 1907, respectively,—such part of it as is recorded under by-laws of the municipality, but there are a few other payments, share of debentures of adjoining municipalities, on acount of Union School Section debentures which are not recorded in the by-law or accounts of Proton, the only evidence of their existence being in the payments as follows:—

Year 1903—Artemesia, share deb. U. S. S.	No. 15 for 1902	$56 22
" 1904— " " " "	No. 15 " 1903	56 22
" 1904— " " " "	No. 15 " 1904	56 22
" 1905— " " " "	No. 15 " 1905	56 22
" 1905—Egremont, " " "	No. 14 " 1905	19 13
" 1905— " " " "	No. 15 " 1905	55 35
" 1906—Dundalk, " " "	No. 1 " 1906	95 77
" 1906—Artemesia, " " "	No. 15 " 1906	56 22
" 1907— " " " "	No. 14 " 1906	19 13
" 1907—Egremont, " " "	No. 15 " 1906	55 35
" 1907— " " " "	No. 14 " 1907	19 13
" 1907— " " " "	No. 15 " 1907	55 35
" 1907—Dundalk, " " "	No. 1 " 1907	95 77
" 1907— " " " "	No. .. " 1907	30 33

Granting that this is a complete list it would appear that the amount due Artemesia for share of debenture U. S. S. No. 15 for 1907, $56.22, stood as a liability at December 31, 1907, together with liability for the principal amount outstanding of all these debentures. As we have said, there are no by-laws of Proton covering these, but we have written for particulars to the initiating municipalities, and hope to prepare and submit statement "L," showing the debenture liability outstanding on account of these debentures as at December 31, 1907.

Sinking Funds.

There were four sinking funds current during the period under review, that under By-law No. 15, dated 1892, for 15 years, due 1907; under By-law No. 20, dated 1893, for 15 years, due 1908; under By-law No. 32, dated 1893, for 15 years, due 1908; and under By-law No. 43, dated 1895, for 10 years, due 1905, and two of these under By-laws No. 15 and No. 43 have fallen due during that period.

By-law No. 15.

The assessment of $105.00 against lands affected was made in each of the years, and the annual interest of $45.00 paid and annual deposit of $60.00 to sinking fund made. The balance of the sinking fund account in the bank January 1, 1907, was $1,053 00
and entries since result as follows:—

Fifteenth annual deposit		60 00
Interest		21 63
Principal paid	$900 00	
Interest paid	45 00	
Exchange	95	
Transferred to general funds	188 68	
		1,134 63

As the interest of $45.00 was assessed for and collected in taxes of 1906 and went into the general fund, it is clear that the only amount chargeable to the sinking fund account is the principal sum of $900.00, so that the general fund owes to lands affected under this by-law the difference, $234.63. The excess amount in the sinking fund over amount required is accounted for by the fact that the annual deposit made was $60.00, while deposit required to earn three per cent. was only $48.40.

By-law No. 20.

The assessment of $46.35 against lands affected was made in each of the years, and the annual interest of $18.68 paid and the annual deposit of $27.67 to sinking fund made. The balance of the sinking fund account in the bank at December 31, 1907, was $484.33. The assessment for the final payment of interest and for the final deposit to the sinking fund was made in 1907. While this account was closed out in 1908 at a later date than the period under review, yet we have thought it well to state here that the account has been dealt with in a somewhat similar manner as under By-law No. 15, as follows:—

Balance in Bank, January 1, 1908	$484 33	
Interest	7 28	
		$491 61
Principal paid	$415 00	
Exchange	60	
Transferred to general funds	76 01	
		491 61

The interest of $18.68 assessed and collected in 1907 was paid in 1908, but the fifteenth annual deposit was not made to the sinking fund although assessed and collected in 1907. The general fund has, therefore, benefited by $104.28, which it owes to the lands affected under this by-law. The excess amount in the sinking fund over the amount required is accounted for by the fact that the annual deposit made was $27.67, while deposit required to earn three per cent. was only $22.31.

By-law No. 32.

The assessment against lands affected was made in each of the years, and the annual interest of $55.00 paid and the annual deposit of $73.34 to the sinking fund made. The balance of the sinking fund account in the bank at December 31, 1907, was $1,284.20. This account is not recorded as closed, but will no doubt be dealt with in the same manner as the two previous ones. The fifteenth annual deposit should be added to the balance of $1,284.20, and the interest earned added also; then after payment of principal $1,100.00, the balance remaining should stand to credit of lands affected under the by-law. This by-law calls for an annual payment from the Municipality of Egremont of $15.75, and an annual payment from the Municipality of West Luther of $22.23. In the receipts of 1905, Egremont is credited with arrears of five years, $78.75, and also a payment of $15.75, which would appear to be for the 1905 instalment; and again in 1907, which would appear to be for the 1906 instalment, leaving instalment due 1907 outstanding. A review of the receipts does not show any amounts received from West Luther. The excess amount in the sinking fund over amount required is accounted for by the fact that the annual deposit made was $73.34, while deposit required to earn three per cent. was only $59.14.

By-law No. 43.

The assessment of $30.69 against the lands affected was made in each of the years, and the annual interest of $10.89 paid, and the annual deposit of $19.80 to the sinking fund made. The balance in the sinking fund when closed in 1905 was $228,25

and was disposed of as follows:—

Principal paid	$198 00	
Fifteenth interest coupon	10 89	
Exchange	25	
Joshua Challenger	19 11	
		$228 25

The fifteenth annual deposit was made in 1905, but the interest of $10.89 although assessed and collected in 1904 for 1995, was paid out of the sinking fund account, leaving the amount collected for this purpose in general fund. Deducting the principal payment of $198.00 from the sinking fund as it stood in 1905, leaves a balance of $30.25 due lands affected under this by-law. The amount of $19.11, said to be the balance, was paid to Joshua Challenger as being the owner of the only lands affected. There were two parcels of land assessed under the by-law, the east half of Lot 7, Con. 2, and Lot 7, Con. 3; and if Joshua Challenger has been the continuous owner of both these parcels during term of by-law that would seem the proper disposition of the balance—but the balance due was $30.25, not $19.11. The excess amount in the sinking fund over amount required is accounted for by the fact that the annual deposit made was $19.80, while deposit required to earn three per cent. was only $17.27.

By-laws.

The by-laws of the municipality are contained in a by-law book. These by-laws, the Clerk assures us, are intended to represent in each case the original, duly executed by-law. There are frequent alterations on these by-laws which have made the interpretation difficult and even indefinite, especially as the alterations are without initial or reference of any kind. Then again some are not completely executed, although no doubt intended to have been, some being without signature, while others are without seal. Two were missing,—By-law No. 29 and By-law No. 131,—but a copy of By-law No. 29 has since been found by the Clerk and forwarded, but no copy of No. 131 has yet been produced. The frequent alterations seem to have been occasioned by making one by-law serve two purposes,—the authority for the construction of a drain embodying the engineer's estimate; and the issuing of debentures; the schedules being changed between the date of provisional adoption and final passing for the purpose of issuing of debentures.

In closing we wish to draw attention to the difficulty we experience in bringing this investigation to a satisfactory close from an auditor's point of view, owing to the absence of a ledger. We have verified the cash account and we have verified the taxes; there is no evidence that the revenues have not all been accounted for and the payments have been made under proper authority. But what of the permanent records of the assets and liabilities,—not, perhaps, so much of the Township generally, but of the special funds,—rate accounts, drain accounts, etc.? The report shows that the general fund has benefited from at least three of the four sinking fund balances, and no doubt the fourth as well; while it must also have benefited, or otherwise, from the balances credit or debit respectively of all special accounts. At this date we would not advocate more than an adjustment of these accounts, to say, December 31, 1907. To verify them would be a large undertaking. But a proper system should be carried out for the future, and we shall be glad to submit to the Township our recommendations if so desired.

All of which is respectfully submitted,

Faithfully yours,
(Signed) Maitland Young & Son.

Toronto, October 23, 1908.

The cost of this audit was $327.77, including expenses.

*Sinking Fund Debentures.

Auditor's Report of the Township of Russell, in the County of Russell, in the Province of Ontario.

To His Honour the Lieutenant-Governor-in-Council.

Sir,—Under authority of an Order in Council dated February 4th, 1908, approved by His Honour the Lieutenant-Governor in Council, in pursuance of subsection 3, section 9, chapter 228, R.S.O., 1897, I, George L. Blatch, Chartered Accountant, of the City of Ottawa, was instructed by the Provincial Municipal Auditor to make an examination and audit of the books, accounts, and vouchers of the Township of Russell, commencing from the year 1904, when the last provincial audit was completed.

Referring to the petition of the ratepayers of the township, praying for an official audit, I have to report that one auditor was appointed at a meeting of the Council in January, that he resigned, and Mr. Noe Levesque was appointed in his stead at a meeting of the council held on the 17th of February, 1908. An audited statement was presented and signed by Noe Levesque and W. J. Summerby, but there is no record in the minutes of the appointment of Summerby, although an account was passed allowing him pay for his services as auditor.

The reasons mentioned in section four of the petition are quite sufficient in themselves to justify the petitioners in asking for an investigation, as the collectors' rolls are very carelessly and incorrectly prepared.

The drainage accounts have not been carried forward from year to year to shew the balance at their debit or credit, nor have accounts been kept with the various school sections for the same purpose. In the year 1907 the amounts paid over to the school sections are entirely different from the amounts levied in the rolls.

A thorough examination has been made of the collectors' rolls in minutest detail, and a statement of the errors and omissions is herewith presented. A very large number of errors has been found which under the ordinary method of examination would not be detected. The rolls of 1907 had not been added by the Clerk in preparing them, consequently we had to do that work ourselves.

I have taken the assessment rolls as a basis on which the levy has been made, assuming them to be correct, with the exception of a few clerical errors which are easily noticed. If any ratepayer is wrongly assessed there is a way provided by which he may have his assessment adjusted before the collectors' rolls are prepared. (See Assessment Act, Section 112.) In the levy for drainage purposes, I have followed the by-laws closely, and if there are any cases in which the wrong property is charged, it is because it is wrongly assessed.

In many cases I find a lot is not correctly divided, and portions of lots are assessed twice or other portions are omitted altogether. The greatest care should be exercised in making the assessment roll that every property is properly designated, that no property is omitted, and that all properties are assessed against the right person.

Then the collectors' rolls should contain an exact copy of the assessment roll, the valuations agreeing exactly.

A map of the township shewing the location of each lot would be invaluable to the Assessor and the Clerk.

The certificate of the Clerk is usually made with the letters "E & O. E." incorporated in it, which means "errors and omissions excepted." This makes the certificate valuless and is not provided for in the Municipal Act.

I have been unable to find the by-laws authorizing the improvements on the Dunbar, Fournier, and Bourbonnais drains, consequently we cannot check the levies on the rolls for these purposes. The rolls of 1907 do not contain these levies. These by-laws should be found and the levies made against properties interested in these drains.

There is a balance of $75.67 uncollected on the east roll of 1906, which I have shewn as unaccounted for the Collector. I have not been provided with a list of unpaid taxes, (as provided for by Assessment Act, section 113), delivered to the Treasurer, which, if it existed, should have been attached to the roll. I have not seen any list of unpaid taxes furnished to the County Treasurer, as provided by section 116 (1).

The taxes of 1907 should all be collected before this, but there is still a considerable amount outstanding on the west roll. The limit fixed by section 109, Assessment Act for the return of the rolls is February 1st.

The drainage funds were in separate accounts in 1905, but the funds are now all under one heading, the general fund. Drainage monies should be kept separate from the general fund of the township.

The Treasurer has been in the habit of keeping the funds on hand and paying orders in cash. The township funds are not kept separate from his own, and it is impossible to check the balance of his cash at any time. I would recommend that all orders be paid by cheque on the Bank of Ottawa, payable to order, and that all the township funds be deposited in the bank as soon as possible after being received by the Treasurer. The Treasurer could on council days have a certain amount of cash in hand, with which he could cash cheques and deposit them to the credit of the township.

The collectors have been in the habit of collecting considerable amounts, and not turning them into the Treasurer for several weeks. The collectors should not be allowed to retain any of the money of the township more than one week.

No statement of the demands made by the various school sections of the township has been furnished me, consequently I am unable to determine what portion of the taxes has not been paid over to the school boards.

As soon as the collectors' rolls are ready to be handed over to the collectors, the Clerk should prepare a summary of all the taxes levied under the various headings shewing the total amount levied for each purpose, and hand a copy of it to the Treasurer, who should then make an entry of it in his books, charging the collectors with the total amounts of their rolls, and crediting the various accounts with their portion. A summary of the collectors' rolls of 1907 is attached to this report.

The statement of the receipts and expenditures shews a balance of cash on hand of $1,114.97. This amount should have been in the hands of the Treasurer on December 31st, 1907, and if the bank account had been used would have been deposited to the credit of the township. In order to check this balance it would be necessary to follow the cash up to date and check the balance at this date.

The items of expenditure marked with an "x" are those which we have found in the minutes as being ordered to be paid. Some of the other items are authorized, such as salaries and allowances, but no special order has been

given by the council for their payment. Other payments have been made upon the order of the Reeve and not authorized by the council.

I have not yet been able to make a statement of assets and liabilities as the balances of the drainage accounts and school sections have not yet been determined. This will go forward later.

I am forwarding the statement of the corrections on the rolls, so that they may be included in the collectors' rolls of this year.

I have compiled a statement of assets and liabilities for the purpose of shewing in a general way the condition of the township's finances, as there are a few items which may not be quite accurate, that I will explain.

If the item of unpaid taxes, $75.67, consists of amounts returned to the County Treasurer to be a charge against the land it should appear under the heading of non-resident taxes.

The items under the heading of "advances on drainage works" for the Bourbonnais, Fournier and Dunbar drains should have been covered by a levy on the collectors' rolls under by-laws passed for that purpose, but as the by-laws have not been entered in the by-law book and copies have not been found we have not yet ascertained how much has been levied on the rolls.

The county rates were not paid during the year 1907.

Some school sections have been paid more than the amount levied on the rolls, and others have been paid less, the balances unpaid being included among the liabilities.

A considerable amount stands at the credit of the drainage accounts, but the cash has all been transferred into the general fund and used for general purposes.

The deficit seems to be increasing from year to year. On December 31st, 1905, there was a deficit of $3,062.66, and on December 31st, 1907, it amounted to $4,745.66. The balance of cash on hand and in the bank has been cut down from $8,622.12 to $1,141.50, and the amount of taxes uncollected has been increased from $4,637.58 to $9,093.65, indicating that the collection of the taxes has been neglected. The liability to the county has been increased from $1,577.37 to $2,841.29. nearly $1,300.00.

The revenue derived from taxes would be sufficient to pay the ordinary expenses of the township if the drainage works were paid for out of their own funds. The total on the collectors' rolls for 1907 is $21,529, which together with sundry revenue for fines, licenses, etc., would amount to about $22,000.00. The amount required for schools is about $5,000.00, and for debentures, interest and sinking fund about $5,100.00, leaving nearly $12,-000.00 for roads and bridges and general expenses.

A further statement in reference to the Bourbonnais, Fournier and Dunbar drainage levy for improvements will be forwarded as soon as the information is procured.

We have found a copy of the Bourbonnais Improvement By-law, and find that a levy was made on the collectors' rolls of 1906, but was not made on the 1907 rolls.

In arriving at the balances of the drainage accounts either debit or credit I have not calculated any interest whatever.

Allowances should be made for interest on each of these accounts before a settlement is effected.

The balance of cash on hand November 22nd, 1908, was $751.69, and in bank $265.72, the cash book having been checked up to date, but not audited.

The Treasurer, Mr. E. Menard, is under bonds to the London Guarantee and Accident Co. to the extent of $4,000.00 up to February 1st, 1909.

I have the honour to be,

Sir,

Your obedient servant,

Ottawa, November 27th, 1908. (Sgd.) Geo. L. Blatch.

The cost of this audit to the Township of Russell was $413.00, including expenses.

REPORT OF OSCAR HUDSON, MUNICIPAL AUDITOR, OF THE VILLAGE OF BEAMSVILLE, IN THE COUNTY OF LINCOLN, ONT.

To the Lieutenant-Governor of Ontario in Council,
Parliament Buildings, Toronto.

Village of Beamsville, Ont.

YOUR HONOUR: The authority to me bearing date of 29th January, 1908, received through the Provincial Municipal Auditor, Mr. J. B. Laing, was exercised in conducting an audit of the books, accounts, vouchers, and monies, of the above municipality, the same being brought to a conclusion as per my report herewith.

A petition of the ratepayers of the above named municipality to the Provincial Government, praying for a special audit, was followed by the appointment of the undersigned.

Said petition and subsequent verbal complaints, set forth the understated charges and requests as sufficient reasons for such an audit, and it was alleged:

1. That the *annual cash statement* of the treasurer and auditor were for several years neither correct in substance, nor in form intelligible to the citizens.

2. That the *balance sheet* last presented did not show the true position of the municipality in regard to its current and deferred obligations and resources at the 31st December, 1907.

3. That the *debenture indebtedness* of the village had not been publicly made known in a manner that was definite and lucid.

4. That *borrowing powers* had been exercised without full authority by by-law, and that obligations were being too rapidly entered into, in advance of debentures issues contemplated.

5. That the *two per cent.* limit of taxation would not yield sufficient for the annual debenture payments, coupled with the ordinary village requirements.

6. That *cement walk* construction had outrun the debenture provisions therefor.

7. That the *new reservoir* construction was being carried on without proper sanction from the citizens or from the Provincial Government, and that its cost so far was not known.

8. That *a treasurer* had not been properly appointed for 1907 and 1908, and that the duties had been discharged by the clerk and former treasurer in a confusing and irregular manner.

9. That the *requisite books* were not being kept for village waterworks and cemetery transactions.

10. That the *books and records* in use were not properly written up nor taken care of.

11. That *by-laws and minutes* were incomplete in matter, and obscure in meaning.

12. That *the Reeve's* actions were too readily on his own initiative and without due consideration by the council.

In dealing with these matters, it was decided to cover a period of five years, from 1st January, 1905, within which time it was found:—

1. *Cash statements* were mostly lacking in accuracy and explicitness.

1907 is exhibited in a form (Schedule) which will be found sufficient for annual use hereafter. Those of 1903, 1904, 1905 and 1906 are also attached.

2. A *balance sheet* as of 31st December, 1907, prepared by the auditors does not give the correct position of the village affairs on that date.

Another and clearer one is annexed (Schedule B) and its form may in future years be adopted with advantage.

3. Of the *debentures* outstanding at any time, no list was obtainable, and the register was decidedly incomplete.

This book has been written up and the present and eventual debenture indebtedness shown (Schedule). Details of each remaining debenture issue are also annexed to this report.

4. Loans have been made under very wide authorities, and the connection between the two is in general instances not at all plain.

Sums actually raised must be reported in council, and bear direct reference to the by-law sanction in future.

5. Twenty mills on the 1907 assessment of $246,834, will yield approximately $5,000 to meet $7,000 required this year, outside of schools and local improvement debentures. A rate, therefore, of 28 mills will be needed unless assessments are raised.

A schedule of estimates is attached in demonstration.

Loans for current purposes must not therefore this year exceed $6,000, and be repaid before its close.

6. *Sidewalk* preparatory construction was begun in 1905 and walks completed in 1907, but did not exceed the part issue F sold in 1906, for necessary permanent improvements, and the unsold issues G and H specifically for sidewalks.

A certain by-law allows the diversion of $7,000 from F debenture to the new reservoir fund, but as that sum had already been partly used on cement walks, the surplus only is free for the latter work.

7. The *new reservoir* proposal was said to have been fully discussed at a public meeting in 1907, and the council instructed to proceed to construction.

No official report of such endorsement is forthcoming, however.

The approval of the Government is now to be sought to the work so far done, and to its completion.

8. No *treasurer* was appointed in 1907, but the official of 1906 continued in office. He was superceded by the clerk being appointed *pro tem.* treasurer for 1908.

The clerk also acted as treasurer in 1907, outside of his secretaryship of the waterworks and cemetery, and this irregularity led to confusion of treasurership duties.

A single official treasurer must be appointed hereafter.

9. The *books and registers* required for the various recording of municipal transactions are, with the exception of the municipal and school cash books and debenture register, quite unsuited to the entries for dogs, graves, water rates, rents, etc., there are also no journals or ledgers in use. These books and suitable registers should be obtained and opened this year.

10. *Lack of care* with the books and documents is evidenced by the loss of the cash book for the years of 1894 to 1897, by the number of by-laws missing and the mutilation of the by-law book.

Vault accommodation and filing receptacles will correct those grave weaknesses, if the clerk and treasurer also exercises more care.

Illegibility of entries, lack of explanation, misuse of columns, alterations of figures and uncorrected errors, were apparent throughout the cash book of the treasurer, while those of the cemetery and waterworks were in the most primitive form.

The remedy will be in the direction of more careful writing, more detail and freer use of cash book blank columns, also the confining of all treasurership entries to the statutory books.

11. *By-laws and minutes* exhibit perhaps more deficiencies than any other phase of municipal affairs, and the matter is more fully discussed later on—briefly, they are faulty in construction and furnish no consecutive history of legislation and council proceedings.

Several solicitors have acted for the corporation with the greaterst benefit, and one should be engaged to pass upon council records in future.

12. The Reeve's personality has apparently impressed itself upon the acts of the council and village officers, and in an over-anxiety to serve the citizens he has probably taken upon himself the dictation of duties that might have been better left to the council to prescribe.

It will be for him in future to shoulder upon the whole council the responsibility for legislation, and to leave the officials as free as possible in the discharge of their duties.

Protests of any member of the council against actions taken will appear upon the minutes hereafter.

The advice of a village solicitor would here again be of service in guiding the officials in the performance of their duties by clearly defining them.

Collectors.

None were appointed for the years 1906 and 1907, but the treasurer admits having performed the duties of both officers and accepted payment.

The plea urged by the Reeves that no collector was needed, as the treasurer acted merely as receiver of taxes, is answered by the remuneration given to the treasurer as collector.

The cash book entries of taxes collected are not explained by any records of items making up the amount of such entries. While the roll gives the dates against each ratepayer's payment, a summary of these is necessary to prove that the cash book entry of that date accounted for all sums then received. Had there been an independent collector, his book of collections could have answered that purpose.

The best receiver (if such alone is necessary) for full collections of taxes, is provided for in R.S.O.C. 228, Sec. 19, Subsec. 1, as any chartered bank; and the council may pass a by-law requiring all monies due the municipality to be paid into such bank, whose receipt therefor will permit the treasurer to make his cash book entry and issue his own acknowledgment in exchange for that of the bank. Under the succeeding section, all sums may be made withdrawable only by joint signatures of Reeve and treasurer, and this provision may be incorporated into the same by-law, regarding deposits into the bank. The necessity of bonding the treasurer would by such legislation be of less importance that at present.

Proceedings of Court of Revision and of County Judge, when appeals are made, should appear in a minute book for those purposes, with the fullest reference to the assessments in question, the reasons for application and the decisions. The Clerk of Court may then note the revisions against the sums assessed, before preparation of collector's roll, which must not afterwards be altered by any remissions of council, but these merely noted against the taxes charged to any ratepayer so reduced, and deducted from the summary of the collector's roll.

It is important to give the date when remissions were dealt with.

The balance of the rolled total has then to be accounted for in tax receipts or arrears.

Treasurer.

The receipt book numbers should be printed, and run consecutively; only one book in use at one time, the stubs of all receipts should be signed by the person making the payment, or by someone on his behalf, and contain the exact date upon which the treasurer received the money, the fund to which it belongs, the period covered by the payment, and the cash book folio when entry was made therefor.

All municipal monies must be handed over to the custody of the treasurer (as required by the Act) as soon as possible after they have been received by the officers appointed for such purposes. This precludes the possibility of any payment being made, except by the treasurer. The treasurer of the waterworks and cemetery had not paid all monies received up to 31st December, 1907 in to the treasurer, and had made payments out of the funds in his hands, so preventing his compliance with the Act and with the waterworks by-law, which makes the treasurer the custodian of all water rates, and had held back receipts for long periods.

The council for 1908 have appointed the clerk as treasurer also. The designated temporary nature of the appointment is not explainable. The clerk can therefore only have so far acted in the dual capacity to the extent that an independent treasurer will accept responsibility for, when the council shall appoint him.

In 1906 a treasurer was not named in the by-law, but the official who acted in 1906 continued his work during 1907 and was paid for it. The balance held by him at the close of the year has been accounted for by subsequent payments which will be included among those of the treasurer for 1908, whose duty it was to have taken over the aforesaid balance. The bond of the ex-treasurer has lapsed and one for the present official has not been taken out.

The clerk as secretary of the waterworks and cemetery acted in 1907 as treasurer for monies from those sources and from dog taxes. He also acted as treasurer for the new reservoir fund, cashed the notes for that purpose and made payments therefrom, none of such fund passing through the hands of the treasurer of 1907.

Most of the water rates, cemetery money and dog taxes, the clerk paid over to the treasurer at irregular times.

The confusion of the two treasurerships arose from such irregularities, and the several sets of books had to be brought to produce a complete statement for 1907.

The municipality cash book required to be kept by every treasurer should not only have contained all the entries for receipts and payments during the year, but also receipt entries according to the date upon which the monies were received from the citizens, or at least as near to such dates as the official receiver of them could have handed collections in to the treasurer. Monies that the treasurer should have had during the year were withheld until near the close.

The tax monies taken in by the treasurer since he acted as receiver of taxes ought to have been entered into the municipal cash book on the receipt dates, or, at any rate, have so appeared in a subsidiary book, and the daily totals entered.

The treasurer is required to keep a journal and ledger. In the first he must make entries for all postponed debts to or by the municipality immediately they are contracted.

The apportionment of the collectors' roll summary is to be made in that book' crediting the various funds for which levies are made, and charging the ratepayers.

In the ledger will appear all the accounts of the village, showing the income from the different sources and the expenditure therefrom for the year. It will also disclose the assets and liabilities which at present have to be hunted up.

A properly kept ledger will enable a balance sheet to be drawn off at the close of each year.

No extended obligations for accepted accounts should be entered into by an officer or member of the council unless a record appears in the minutes, either of direct council action thereon or through reports of committees. This is in order that the treasurer may know what deferred debts have been incurred and proceed to record same.

Vouchers of treasurer, particularly in 1903, are in some respects deficient in not being always sufficiently endorsed, in being entered in wrong column of cash book; the entries made too long after issue of warrant, and the dates entered irregularly, apparently in order of payment, instead of in order of issue of warrant, so that those outstanding cannot be told from the cash book. Many payments, particularly in 1905, are apparently not supported in the minutes.

Attention of council should have been drawn to these matters by the village auditors.

Vouchers must be endorsed by payee or someone with his authority, and in case of his mark, it must be witnessed.

Warrants must all be drawn to the order of the person entitled to secure the money.

The date of the warrant must be that of the council meeting whereat it was passed.

Cash book entries must be made on that date, warrants redeemed having cheque to cover same whenever possible. An effort is to be made to get holders of warrants to present them for payment at an early date.

More information must be given in the cash book entries, and the writing and figures made distinct.

Treasurer *pro tem.* for 1908 has kept account of cash and bank transactions without any attempt at proof. His figures were gone into and a balance struck to which he assented.

Transactions this year were a transfer of the current account from the Bank of Hamilton, Beamsville, to Imperial Bank in St. Catharines, and no satisfactory explanation for the change of banks is offered.

Notes were discounted with the latter bank to the amount of $2,455.15 for current purposes.

An amount of $13.80 for interest is entered in cash book folio 81 and again on folio 85. Ex-treasurer cannot explain.

The Act expressly states that unless in case of emergency, no payments shall be made or contracts entered into from the 15th to 31st of December. In one year at least this was disregarded.

As there is no proper safe accommodation for books and papers, a brick fireproof vault might be constructed in Town Hall, and the officers required to place therein all the village records, when not in use. It should be fitted to receive books and papers of each year separately.

Receipts as well as expenditures must be itemized in treasurer's annual report.

Licenses for billiard rooms and transient traders, have not appeared as income in recent years.

Tax percentages for deferred payments imposed by by-law 258 were added in 1904, but not since.

By-law 233 makes taxes payable at treasurer's office, as permitted in Assessment Act, Sec. 102.

Clerk.

The position of this official has, to all appearances, been an embarrassing one. He has accepted from the council duties connected with the treasurership's of waterworks, cemetery, new reservoir, and, finally, the village, without having had the requisite authority, facilities and information to successfully carry them through. In a laudable desire to assist the Council, he has undertaken too much clerical and financial work in addition to that devolving upon him as Clerk. It will be well for him to relinquish at least the Village Treasurership and act only in connection with the other funds, so far as to assist in collections.

As Clerk, his chief care is concerned with the proceedings and legislation of Council in the proper rendering of these, and the safeguarding of all books and documents in his charge, as well as in the preparation of the Collector's Rolls.

He has better opportunities than any councilman or other officer of becoming acquainted with the past history of the Council, and of fitting himself to advise them from the statutes as to their general course of action in the future. He should be free to take solicitor's advice when required, and the Council might hereafter require him to express his full opinion upon any of their special proceedings.

The reports of meetings having to be accurately prepared, the facts under discussion must be carefully noted as well as the substance of resolutions, and the final decisions.

To accomplish these, the Clerk should use an agenda book for prior entry of matters to come before the meeting, and opposite to these, make notes of how they were dealt with, so that the minutes once written up will stand for confirmation at the next meeting.

The drafting of by-laws is in his hands and the form and substance of each prepared before hand, according to previous leaves granted for introducing the by-law.

Any difficulty occurring in preparation should be laid before the solicitor.

Proper accommodation for his records will remove the danger of confusion and loss.

The indexing of all minutes and by-laws is essential, and the by-law book must be made complete.

Minutes.

From 18th March, 1901, had to be abstracted in brief for clues to resolutions. Being without any index, the Council must have been hampered for lack of knowledge of action taken by previous Councils on certain matters. Very few of the minutes of one meeting were read and confirmed at the next. A confirmatory footnote is all sufficient. The necessity of this is evidenced by the proceedings of 22 and 27 February, 1906, being corrected on 12th November, 1906. Many of the proceedings appear to have been hastily inscribed. They lack mention of place and hour of meeting, and if regular or special. Reports of Committees are seldom introduced into proceedings. Instructions are given to members of Council to accomplish certain matters, but the result is not afterwards recorded. Whatever careful consideration and discussion is accorded to matters that come before the Council does not often show in the report of their proceedings.

By-laws have, however, generally passed three readings, accounts payable set out in detail and payments authorized.

The minutes will have very little historical or judicial value without a recitation of all the facts to be passed upon, the views expressed, the objections raised and whatever action is immediate or postponed.

Dog Taxes.

The common practice reported has been to sell tags to any dog-owner who demands or who can be required to obtain one regardless of his name not appearing on the roll. This course might answer for transient citizens, but the roll is intended as a basis for all such impositions and the Council will pass upon future methods.

As the Treasurer must secure all monies, his receipt could be presented by the dog-owner to the issue of tags, in order to receive one and the number of the receipt might be stamped thereon.

In every year the dog taxes collected have exceeded the amount called for in the roll.

A suitable Tax Register is needed to give the references required by any applicant.

By-Laws.

Originals signed by Reeve and Clerk, sealed and numbered from No. 1 in 1897 to No. 316 in 1908. These had to be sorted numerically, when the following numbers were found missing:—18, 49, 58, 65, 221, 230, 236, 238, 239, 240, 241, 242, 243, 244, 253, 255, 259, 278, 289, 299, 307, 315, 316, 317, and Nos. 207 and 230 are repeated.

The By-law book only contained Nos. 230 in 1902 to 288 in 1906. not signed since 1905, and none sealed. Some of the by-laws bear no date.

The by-laws were gone through and an epitomized index prepared which will serve the Council as a guide to past legislation, reference to which must hitherto have been an irksome and uncertain process. Such index may be amplified by sub-division of subjects, noted in the margin of the by-law book, into which all the remaining by-laws should immediately be entered, signed, sealed and indexed.

It is most desirable to retain several copies of all printed by-laws in a suitable filing case, so that enquiries of consequence may have information at leisure.

An abstract of those pertaining to Treasurership has been made. The brief information therein given, will give the Council some idea of the most important legislation enacted.

The money by-laws are exceedingly frequent, and confusing as to the purposes for which bank and private loans were negotiated. It would seem preferable for the Corporation to authorize a current loan with the bank early in the year, not exceeding the anticipated tax levies, to be liquidated as tax collections come in.

Large borrowing in anticipation of debenture sales is not safe or economical financing, and may occasion heavy and unexpected levies.

The form of the by-laws should be uniform, giving besides the number, the source of authority, the purpose, the occasion, the scope of application, and the substance set out in concise terms. Solicitor's advice is needed in their preparation.

The wording and arrangement of so many of them, indicate either hasty drafting, or a lack of acquaintance with the best method of expressing the intention of the Council to be conveyed by the legislation.

Consolidation of the by-laws by the Solicitor of the Municipality would be a wise proceeding, also the subsequent publication of them in pamphlet form, to inform the citizens upon legislation up to date and spare leaves at the end of the pamphlet would permit additional by-laws to be pasted in as they are published, through the press.

By-laws fixing rates for levies have been sometimes deficient in not reciting the general purposes of each levy; the assessment roll value, liable for School rates, as distinct from that liable for other rates, in not separating the various rates leviable for County, Village and Debentures, specifying the sums required for these purposes and the serial number of the levies for the latter; in not stating the total sum that will be required from the owners of dogs, and from such citizens who are liable for Satute Labour, all of whom will appear in the Assessor's roll. After final revision of the roll it is incumbent upon the whole Council to deal with the question of rates upon the basis of the estimates which are required to be first made and recorded in the minutes.

The form of each annual by-law for levies must be made ample and contain the information above alluded to as essential to an exact preparation of the Collector's roll, and the adequate verification of it by the auditors.

Bank.

Indebtedness to them as at 31st December, 1907 was $4,309.90 on Local Improvement account, and $1,486.30 on current account, besides overdue debentures in their hands. The reservoir account showed a credit balance of $190.62 at that date, being part of the amount of $424.59 due by the *pro tem.* Treasurer Robins.

There is some question as to the bank's payment of a cheque for $116.70 to lift debentures D. No. 1 signed by G. S. Karr, dated 2nd January and paid 3rd January, 1906.

As D. Davis was not inaugurated Reeve until 8th January, 1906, the payment was warranted by ex-reeve Karr.

It has ben arranged to hypothecate with the bank 15 debentures of series G for six months to secure overdraft of local improvement account with interest from 1st March, 1908.

A verification of the interest charges by the bank on the local improvement account was undertaken at the request of the Council, and also of that included in the current account of the Village.

It is recommended that all taxes, rents, etc., be paid into the bank as official receiver of same for the Village, and that all payments be made only on a cheque warrant, from Reeve and Treasurer, to be paid by the bank on proper endorsement. This will safeguard all monies of the Corporation, and very much simplify the bookkeeping.

Separate bank accounts may be opened for Cemetery, Waterworks and any Local Improvements, and if debenture monies are paid in and out of special fund account, the condition of same will be exhibited by the bank passbooks and the irregular diversion of funds as heretofore will not be repeated.

Water Rates.

There has been charged to this account an expenditure of $400.00. In the summer of 1907, testing wells for New Reservoir was succeeded by the work of pumping to replenish the old reservoir, on account of the extraordinary demands then.

The Beamsville Preserving Co., are entitled to free water under by-law No. 293, which states "Said supply of water not to restrict the needs of the town for other purposes," but there seems to have been some shutting off of private service during the process. The water takers will of course, continue to suffer lack of water in dry seasons, and may have to bear the repeated expense until the new reservoir is built, when the canning factory

may have its supply, without depriving citizens of convenience and fire protection. The waste of water in 1907, is not satisfactorily explained and the above expense is arrived at in consultation with Chairman of Waterworks with the scrutiny of vouchers. The by-law imposes penalties for overuse of water, and it is the duty of the Inspector to report to Council the instances where this occurs.

The water rate account shows a surplus for the period of $354.47, which on an income for the same time of $1,938.50, means an 18 per cent. reduction in rates, which water takers should have had the benefit of.

Robinson Suit.

Costs of $191.41 were paid Solicitor Mills in 1907, as balance in this suit, same being recoverable against Robinson by execution in hands of Sheriff Dawson, with expense of procedure. The value of this claim is placed at that sum, and it will be dealt with by the Council, in the meantime, its realizable value is not included in balance sheet, owing to its previous return "*nulla bona.*"

Debenture Levies.

At 31st December, 1907, levies have been made for $1,566.50, intended to reduce debentures and interest due on that as follows:—

Series	B	13 Waterworks Cons	$844 50
"	C	5 Hewitt Loan	396 25
"	D	3 Sidewalks No. 1	143 75
"	E	3 Waterworks Ext	182 00
			$1,556 50

These payments had not been made at the close of the year, and will therefore have to be met in 1908.

Series G and H, No. 1 debentures are not considered here although payable 1st December, 1907, as no levies were made to provide for them.

The debenture overlevies from 1903 to 1907, $151.51, are credited to Village Fund, as practically the same ratepayers were levied upon for debentures as for general rate.

The County rate short levies of $105.49 in same period are charged to the Village, as having to be made good in 1908.

Overlevies made for particular debentures will go to the credit of those who were levied upon to meet such. If a general levy, then to the credit of the Village Fund.

If limited to Local Improvement beneficiaries, then to reduce their future payments.

Diversion of levies, to any further fund than the one designated in the by-law is not permitted, and the Treasurer is required to keep such fund accounts separate.

90 per cent. only of the estimates may be borrowed for current purposes, and no further debts may be contracted for, while the rate is over 20 mills.

Debenture Commutation.

Two ratepayers commuted the 19 payments of local improvement debentures G and H, by the payment of $27.64. These and further like sums will be liabilities of the Village for debenture levies advanced, and will be credited in yearly portion to that account over the period, by transfer from the above account, until it finally disappears.

The first levy intended in 1907 to meet debenture G 1 and H 1, were not paid by above parties.

If the others liable for that levy are to escape, then the sale of the first debentures of those two series cannot be made, and the $11,000 will be reduced by $332.67.

Hewitt Loan.

By-law 245 and morgtage grants $3,000 as loan to J. A. Hewitt at 5 per cent. from 31st July, 1903, repayable in stated annual sums with interest. These repayments have amounted to $1,137.14, leaving a balance still due by him of $813.66 of unpaid principal and interest at 31st December, 1907, which sum has been put to the credit of the village fund, as when collected it will reduce the general rate.

The above repayments have been credited to the village fund, as the ratepayers have been meeting the levies for redeeming the debentures issued to raise the loan of $3,000, and therefore had less to pay on the general rate by $1,137.14.

The premium of $93.10 was also paid to Hewitt, although not so intended. With compound interest, this amounts to $115.53, benefit to the mortgagor.

Hewitt claims above premium was granted to him by the Council, and this view is sustained by others. As the Village was at no loss in granting the premium, upon the 5 per cent. basis of issue, it might be allowed, although the loan was limited to $3,000 and the Village credit earned the extra sum.

The undue principal of his mortgage amounts to $1,625, which is an asset of the Village against a similar liability to the future ratepayers, who will have to meet annual levies to liquidate the remaining debentures of the original loan.

To partially offset his liability for overdue principal and interest, Hewitt has a claim of $357.36, for supplies to New Reservoir and Town Hall.

Current Loans.

Loans from L.O.O.F. and Sinclair prior to 1903, have since been paid, also those contracted since, with the exception of an overdraft in the bank for $1,486.30 and $6,040 balance of notes given in 1907, for money for reservoir construction, authorized by by-laws however only to the extent of $5,000. There was no record of the dates or terms of these notes, nor any Council proceedings reporting the negotiation of the loans.

By-laws are necessary whenever the credit of the Corporation is pledged for loans, and a full report to Council as to how these were effected, and the money paid over.

When loans are made from private parties, the indebtedness becomes scattered and indefinite. The greatest difficulty was experienced in discovering particulars of notes already given.

Unless the bank declines such advances, it will be preferable to borrow from them alone, so that the condition of loans may be quickly and exactly ascertained.

New Reservoir.

Waterworks construction prior to 1903, has not been dealt with. The intake extension undertaken in 1905 with the debentures of $2,000 also the distribution piping of 1906, and the costs of the Field-Marshall arbitration, amounted to $4,259.20. The new reservoir expenditure in 1907, out of

temporary loans, runs up to $6,591.10 after charging $400.00 for pumping, against water rates, with an estimate of not less than $3,500 to complete the construction.

The expenditure so far made upon it has been ascertained by careful examination of the vouchers, with the assistance of the chairman of the fire and water committee, of 1907.

The sanction of the Ontario Municipal Board is now required to the issue of debentures, sufficient to complete the enterprise and repay the monies already borrowed for that purpose. The former engineer's report will doubtless be called for, and his services made necessary to the finish of the reservoir, within the limits of the sum to be available.

It is almost needless to state that construction and maintenance charges must be carefully separated in future, if any idea is to be formed as to the water rates being insufficient to cover the upkeep charges irrespective of debenture payments, and also to show that the monies raised at any time, in any way, for constructive purposes, have not been outrun by legitimate investment work.

It is wiser also to have the citizens endorse, at least by public meeting, or through the press, the undertaking of any public works, and to secure a proper and full report of the extent to which they have concurred in the plans of the Council in regard thereto.

Mr. A. Milne, civil engineer, of St. Catharines, reports having in 1907 estimated $4,000 as the outside cost of the new reservoir and intake, but his original plans and specifications were extended by Council from a three to a five million gallon basin. He now considers that the judicious expenditure of $3,500 will complete the reservoir and that it will then furnish ample supply of water for all purposes.

Sidewalks.

As in the case of the waterworks expenditure, the payments on cement sidewalks have been confused with general road expenditures, and the entries had to be sifted out with the guidance of Mr. Bennett in order to arrive at the sum of $13,424.31, considered as being the cost of the sidewalks last laid. In order to finance this work, a loan limited to $10,000 was contracted with the bank of Hamilton, until the sale of the local improvement debentures G and H for $11,000 was effected. The bank made advances to the amount of $11,309.90, of which $7,000 out of the proceeds of debentures F was paid them, thus leaving an overdraft on the local improvement account of $4,309.90, to secure which the Village has pledged them some of the issue G and H still unsold.

Debentures F yielded a premium, so that $7,255.20 was available for sidewalks. To this may be added the proceeds from debentures G and H for $11,000 as soon as they can be disposed of. After payment of the bank, there will be a surplus on this account towards the reservoir construction.

As to the sidewalks laid in 1904, for which $486.79 was raised, the sum expended thereon appears to have been $1,142.48, throwing the difference upon the general rate.

The contractors for the last sidewalks have had held back from them 5 per cent. of the contracts. In the case of McMartin and Barber, until August 1908, when $127.48 will be due them, and a similar sum in 4 years from that time for the remaining 5 per cent. In the case of the Petty Piece Stone Co., $332.49, the balance of 5 per cent., will be paid them in 5 years from October, 1907.

Properties.

By-law No. 17 refers to a deed of the Town Hall to the Township of Clinton in 1880. A lease to the village by the township exists from that date for a term of 99 years. Rents have since been collected for the use of the hall and paid to the village.

The site of the Firehall appears to have been claimed by the Baptist Church, but no definite result of their contention appears in the minutes; this matter also demands attention.

No rental record has been kept of the subletting of the Town Hall, nor any receipt book by the caretaker, so that no proof exists of the rents really received by him. The future course must be for the Treasurer to issue his receipt for the rents direct to the rentors, in the meantime, charging them with the rent in a register for that purpose; entries therein being attested by the caretaker.

A cemetery register is also needed for the record of all lots shown on the map, with the dates and names of purchasers, and amounts paid against those that are sold, so that the unsold lots may at once be seen. Merely marking the map with names of lot owners is not sufficient. An interment register is also needed, giving full particulars as to the occupants of the graves, with the dates and charges of interment.

A proper water rate register is preferable to the index and ledger at present in use. The Waterworks Secretary is now entrusted with the imposition and collection of rates, and is required to hand all sums to the Treasurer, who will of course, make all disbursements. A map of the pipe system, showing direction and sizes of pipe, should be in the care of the Secretary.

Reports of the Town Hall, Cemetery and Waterworks Committees should reach the Council regularly, and be recorded in their minutes.

There is a prospect of a reduction in rates and watertakers, if no extraordinary repairs are needed, and if the gravitation supply is sufficient to fill the reservoirs.

School Board.

Government grants have been paid to School Treasurers, except for 1906, which was deducted when repaying last loan, and for 1907, $91.00 is still due the schools.

The final repayment from the School Treasurer at the close of 1907, of loans from the village, up to that time, closed the account between them according to the school books, and included an item of interest which that Treasurer is unable to explain. The village account shows over-levies, 1903 to 1907, of $29.81, but the surplus is retained to cover that interest.

The full amounts of all levies are due the School Board, and must be not less than the sums requisitioned for by them. The odd loans from the village until school taxes are payable, can as easily and more simply be made in even sums, upon notes bearing interest, and made payable on 15th December, upon which date the Treasurer can pay to or receive from the School Board the balance due after allowing notes and interest.

Provincial grants must not be retained by village, but paid over to School Treasurer when received. No other school books than the cash book have been kept, so that the status of the village account at the close of each year could not be seen.

The High School cash statement for 1907 (schedule) is attached to show the better form in which it may be annually presented for both schools. A balance sheet is also needed at the close of the year. The form of it is too simple to need explanation.

Debentures.

Each debenture issue has been given a letter by which it may be distinguished hereafter, as they had no serial letters to indicate precedence and number issued.

H.S. No. 14, W.W. No. 7, due 31 December, 1901, paid 20 January, 1902.

Register was very incomplete, cash book folios for payments of interest and principal not being noted therein, and summary footings having to be made and inked in.

Hewitt debenture money and interest paid him 31 July, 1903, as per authority of council (30 July, 1903) $3,095.87, entered in debenture paid column.

Hewitt debenture of 1903 and interest paid, entered as $316.99 in CB. 56, 4 January, 1906, No. 1, $250, interest calculations wrongly entered.

Waterworks extension debenture of 1905, No. 4, coupon No. 2, $4.40 collected as $5.40, bank having overpaid $1.00. See C. B. entry, folio 92, included in 177.00

Sidewalk debentures of 1904 No 2, coupon No. 1, $6.00, due in 1905, collected in 1906 by bank; debenture No. 3, due in 1907 and coupon No. 1, payable in 1905; No. 2, in 1906; No. 3, in 1907; total $143.75 not paid in 1907.

Sidewalk debentures of 1907, $11,000, were not entered in register nor any calculations on record showing annual principal and interest.

Local improvement and floating debt, $12,000. Debentures of 1906, entries were not separately calculated for interest and principal in register.

Debenture indebtedness at 31 December, 1907, amounts to $37,608.50 spread over nineteen years exclusive of interest charges thereon, which in the same period will amount to $18,316.05 additional. The citizens will therefore have to provide $55,874.55 before the end of 1926 to clear themselves of all debentures now outstanding.

Schedules attached hereto have been prepared with fulness in order to show the amounts of principal and interest of each series of debentures falling due annually, as well as the total actual indebtedness on principal at 31 December, 1907, including arrears of $2,449.17 (over-due principal and interest); also contingent indebtedness for interest over ensuing years; and the eventual liability of the village during the years of 1908 to 1926. Above figures include the two issues of 1907, series G for $7,000, and series H, for $4,000, for sidewalk construction and repayment of note-holders and the Bank of Hamilton, of sums advanced by them in 1906 and 1907 for that purpose, some of which debentures are pledged at this date to them as security, until sold. While these unsold debentures for $11,000, can hardly be considered as more than a potential asset, the amount might be deducted from the debenture liability until a sale of them is effected. The annual levies to cover them will in the meantime require to be made, and such taxes applied to release the debentures in their order from hypothecation by payment of their values to the bank or others.

Debenture register has not been filled in and made quite complete so as to exhibit at a glance the full levy required for estimates and the outstanding debt of the municipality. More care and exactness than hitherto will be needed in keeping this highly important record.

Owing to absence of some original by-laws and of schedules and aforesaid cash book, information now furnished cannot be perfected.

Investment.

In the investment account, schedule ( ) herewith it is sought to exhibit to what extent the citizens have contributed towards their own public works, etc. They have invested about $11,700 therein, and owe thereon over $35,100. The values of such works are merely those of expenditures, actual, since 1903, and estimated prior to that year.

It will be understood that as debenture principal is paid off, the equity of the ratepayers increases in the enterprises the debentures were issued to cover, but that debenture interest payment is not represented by any corresponding increment of value.

The life of public works is practically perpetual, under liberal annual maintenance, and occasional restoration, so that the capital values shown are likely to remain for an indefinite period.

The showing of the capital expenditure in opposition to the debenture indebtedness is merely one of accounting for it; it being evident that the taxing power is the real security behind such debts.

When new debentures are issued to complete the reservoir, $1,760.21 will be reimbursed to the village fund and creditors for the over expenditure on reservoir, and reduce the citizens' equity stated above.

It is believed that an annual statement in somewhat similar form will explain the absorption of debenture levies from year to year.

Balance Sheet.

A balance sheet as of 31 December, 1907, is submitted in a form which if followed hereafter will give the ratepayers the condition of the various funds, all of which ought to show surpluses, and a deficiency account be found unnecessary.

The surplus of current assets over liabilities is to be absorbed by the credit balances of the various funds.

The present position is the reverse of such a situation.

Current obligations run up nearly to $18,000, with liquid assets of barely $3,000.

Debenture issues have been too much anticipated, and now those in hand for $11,000 have to be disposed of, another $5,000 raised and an extra levy made of almost $2,500, to meet all engagements, and finish the reservoir construction, to which the village is committed.

Deficiency Account.

The current indebtedness of the village at 31st December, 1907, not yet provided for, is $15,066.88. Towards this sum there will be the proceeds of the sales of debentures G and H of $11,000, with any premium obtainable when disposed of. Such proceeds will not, however, cover the expenditures made on cement walks and on the new reservoir, which together have anticipated debenture sales to the amount of $12,760.21, after giving credit to the former for its proportion of the debenture F issue in 1906.

To assist in meeting such expenditures, monies were diverted from other funds to the extent of $676.85, and future debenture proceeds will have to restore this sum. The remainder of the expenditure is accounted for by loans $10,349.90, and unpaid debts $1,733.46. If therefore the reservoir can be completed with a further expenditure of $3,239.79, additional debentures for $5,000 at par, will allow for present obligations, and bring the full cost up to $23,000 for both works.

For the net deficit on other funds, there will be reqired a levy of $2,306.67 to free the citizens from current debts in addition to those for annual requirements for 1908, purposes.

The recent cement sidewalks cost $13,424.31 and the present unsold debentures G and H were intended to cover this, but the previous debenture F issue included $7,000, likewise applicable to this or any "necessary permanent improvement" which may be construed to apply on new reservoir also. The sidewalk fund thus far has full protection and the deficiency of $1,760.21 really arises on the new reservoir account.

The cemetery surplus of $150.37 is not strictly usable for village purposes, but must be spent upon embellishment of the grounds. It was, however, diverted and provision for its restoration is mentioned above.

The Town Hall rents above cover the expenses connected therewith.

The water rates have paid the cost of maintaining the system and old reservoir and also the estimated cost of pumping for replenishing supply in 1907. Any surplus from this account hereafter should go to reduce rates.

The village fund shows a surplus for the period of $319.46, after crediting it with its proportions of the proceeds of debenture F $5,182.30 in 1906.

This fund receives credit for the general rate, licenses, fines, dog taxes, interest, over-levies, etc., and Hewitt's repayments and bears the general expenses of the village.

Largely on acount of law costs, the intake extension planned in 1905, and the distributing extension of 1906 resulted in an over-expenditure of $2,320.19 beyond debentures provided.

Current loan by-laws were passed in 1907:—

No. 299 for $1,000, on 13th February.

No. 300 for $7,500, for current expenses from bank 11th March.

No. 302 for $3,000, from any one 14th May.

No. 308 for $2,000, for waterworks from any one, 23 July.

In all $13,500.

The bank, however, appears to have allowed an overdraft.

Against the authorized sum of $5,000 to be borrowed elsewhere, there were amounts raised during the year totalling $6,870 on notes of private parties, which sum appears to have been used up in waterworks construction, as shown in statement.

Estimates.

Estimates for 1908 for current purposes and public works are attached (schedule A) to this report, and will serve to show what is ahead of the Council in the matter of finance.

Debenture proceeds to the amount of $676.85 must be handed over to the current account, from which advances were made to reservoir construction.

The cemetery fund is entitled to $150.37, and $27.64 must be placed aside towards L/1 debenture payments.

The appropriations stated must not be exceeded by committees, otherwise the levies will be insufficient.

L/1 debenture levies H for 1907 and 1908 will require to be made for $641.94, and $6,954.78 by a general rate of 28 mills on last year's assessment. Schools will need another 8 mills. It is recommended to maintain these rates even on enlarged assessment, as contingent obligations may arise. It is obvious that no further indebtedness may be contracted.

As the deficit from 1907 of $2,306.69 created the need for 10 mills extra for this year; the following one will not be so burdened, yet the future rates will be perilously near the limit when the reservoir is completed.

How the public works obligations may be met by debenture issues is shown in the estimate therefor. Sums must be set aside for the deferred debts, and the current account repaid.

These estimates were prepared with assistance of Mr. Holshal, of the Board of Finance. Their duty it is to pursue estimates in similar form early in each year to the Council, after revision of Assessor's roll. A complete record of the estimates and appropriations thereon will appear in the minutes followed by the by-law striking rates.

The appropriations granted thereunder must be accounted for from time to time to the Council, by the Chairman of the committee in stereotyped form.

The minutes heretofore seldom furnished estimates, and any appearing were of no utility.

In the book containing minutes of 1888, pages 283 and 284 had been cut out. Owing to the death of the Clerk for that year and to the absence of the Reeve for 1888, no explanation is forthcoming.

Inquiry was made of others connected with Municipal affairs at that time, also without results. The by-laws were not interrupted by the break. Although the act of mutilation was a most reprehensible one, it was judged unadvisable to put further expense upon the municipality by continuing the examination further.

Conclusion.

The audit has been conducted with a view to impress upon councilmen and officers their duties and responsibilities, also to give the best form for annual statements and a basis for the same from the first of this year.

The Act requires all recommendations made herein to be followed out, and it will be the duty of the Council to see that they are adopted.

All matters of enquiry having been dealt with as fully as possible, the results of the audit are now respectfully submitted.

(Signed) Oscar Hudson,
Chartered Accountant.

Toronto, March 21st, 1908

The cost of this audit to the Village of Beamsville was $498.00.

EXTRACTS FROM THE REPORT OF OSCAR HUDSON, CHARTERED ACCOUNTANT UPON AN AUDIT OF THE TOWN OF PARRY SOUND.—COMPLETED 26TH OCTOBER, 1908.—OCCASION FOR THE AUDIT.

During a preliminary visit to Parry Sound, on 20th August, 1908, enquiries were made of those most in touch with the Town's affairs, as to the circumstances giving rise to the request for a Provincial Audit, under a resolution of the Municipal Council, dated 10th of August, 1908, such action being endorsed by a numerously signed petition of the ratepayers generally.

The information imparted was not sufficiently definite to be formulated into specific charges of any large importance. It was contended generally, however, that:—

1. The books were not in a condition to give correct information.
2. Light and water users were not given credit for all the monies paid in by them.
3. Arrears for water rates, electric light rates, electric installation, private water service, taxes, local improvement work, were allowed to remain upon the books, and that the amounts of them were not correct.
4. The Auditors' report for 1907 designated a shortage, which needed confirmation and date of origin.
5. Lack of system in accounts and records were alleged, and a complete one was desired throughout.
6. Loss of books and documents was constantly occurring.
7. Annual balance sheet and cash statements were not in lucid form.
8. Treatment of electric and water revenue was indefinite.
9. Vouchers in support of income were not efficient.
10. Recent rebate cheque moneys were not all paid out.

Broad results of the investigation sustain the contentions made, as will appear upon the pages of this report.

All of the books necessary to a municipality were not in use, and further ones have been designed, obtained and installed.

The arrangements and purposes of the accounts were confusing, and a renaming of them is adopted, with advice as to the treatment.

Important documents were not to be found, and it is left for the new Treasurer to sort out and carefully file all of those that will be handed over to him.

Annual statements are submitted in form intended to more clearly exhibit the years' transactions, and final financial status.

A cash basis for municipal revenue results is suggested as sufficiently inclusive of charges and credits for the year.

New receipt voucher forms have been designed, and put into operation, that shall bear the assent of ratepayers and others, to the payments made to the Treasurer.

Insufficient credit was given to some of those appearing as debtors to the town in the various registers.

The shortage disclosed in the Auditors' report has been corrected, and supplemented by some other sums, as will be seen in the schedules.

Some of the rebates do not appear as paid over to light users, and appear in the ex-Treasurer's liability statement.

Suggestions were made during the progress of the audit, to the Mayor and Council, looking to the reformation in the methods pursued hitherto, and an epitome of these is subjoined.

Cash Receipts and By-law 130.

These were verified from 1904 to 1908 with statements, vouchers and passbooks furnished from various quarters, and errors or omissions therein are exhibited on the ex-Treasurer's liability statement in this report. An analysis for the period also appears of the monthly receipts from each general source that were deposited into the general account of the town, in the Bank of Ottawa. The totals of these are contrasted with those of the deposits shown, increase or decrease the amount of cash withheld by the Treasurer from the general account at the close of the month. Under by-law 130, the Treasurer is forbidden to retain receipts in excess of $50.00, being required to deposit all moneys over that sum into the bank account.

His unnecessary retention of any excess moneys put the Corporation to the expense of interest on such portions of the bank overdraft as were represented by the cash balance shown in analysis, as being from month to month in his possession.

The work that would have been entailed in arriving at the undeposited daily balances would perhaps not have been compensated for by a charge for interest against the Treasurer much larger than that to be calculated, upon the assumption that the receipts of each month were to be deposited before its close.

Upon the latter basis it has been found that the monthly balances in the hands of the Treasurer from the 1st January, 1905, to the 31st August, 1908, caused a loss of interest to the town, which, calculated at the lowest reasonable sum amounts to $223.50, and his account has accordingly been charged therewith.

Licenses.

A very lame verification of these from the Assessors' roll, was alone possible. No register was kept nor any copies of licenses issued.

To establish a permanent record for the future, a license register is now installed, with spaces therein for the dates of issue, licensee's name, occupation, and payments, and the reference to cash book entry.

A new license form in duplicate, bearing consecutive numbers, will now be used, originals given Licensees, and duplicates filed on binder for audit into register. A leaf of the register, and a blank license are exhibited herewith.

It is desirable that the Clerk shall issue all licenses upon production to him by payer of the Treasurer's "Official Receipt" for the certain sum, and the register may be entered up in the Clerk's office.

Dog Licenses.

The issuance of tags and collection of fees have been variously entrusted to Constables and Town Collectors. For this year, however, the latter official has the duty solely in hand.

The practice of ordering a certain quantity of tags to be die-stamped and then handing them over to the official supposed to dispose of them, without his being required to make any returns except to hand into the Treasurer indefinite sums at irregular intervals, has made the true receipts from this source untraceable. Several of the officers of recent years are unable to state the sums handed in, having mislaid records, if such ever existed, and not being able to produce Treasurer's acknowledgement. The Town Collector for 1908 has not, up to the 30th September, turned in any dog license fees.

The same official for 1907 kept no record at all, and could give but little information as to when he collected that year's moneys, or how the sums paid to the Treasurer were made up, or give any reason why they were not paid in more frequently.

This loose condition of affairs must be corrected by the adoption of a special receipt for the Town Collectors' use, a sample of which is given now.

An attached page of a dog tax register will show what kind of an accounting will be demanded for all tags supplied to the official given charge of them.

An independent and permanent record is thus obtainable of all those who will have made, in this manner, registration of their dogs, and each year's prospective receipts will be evident.

The date upon which collections is made of the fees, can be seen, the duplicate receipt checked therewith, and the sums paid into the treasury will be proved by the cash book entry.

Weigh Scales.

The West Ward in charge of Mr. Williams appears to be well looked after, and the weighings run up 300 a month in busy times.

His receipt books were not all to be found, and the stubs seen had no summary of sums paid in.

His receipts from the Treasurer were gone over, and certain sums in 1905 and 1906 not found entered in cash book, and are now charged against the former official.

Receipt stubs are of little value as evidence of payment to weighmasters, nor can they be well checked unless summarized.

A new form of receipt has therefore been devised, and a blank one is attached to this report. It will be made in duplicate by means of a carbon sheet, and a leather cover for outside work hold one pad of receipts at a time.

The originals are to be handed to the persons making payment, and the duplicate detached and placed numerically upon a binder now provided therefor.

The receipts are numbererd in duplicate, and in rotation, so that everyone may be accounted for.

A record or summary of such receipts is supplied in the form of a book, a leaf of which accompanies this report.

A line is given therein for each receipt number, and the sums received will be separated into those for, coal, hay, cattle and sundries.

When the weighmaster makes his returns to the Treasurer, the date and amount handed in will be shewn, and signed for by the latter, in the book.

The Auditors can thus verify all weighscale receipts into the cash book; a task not hitherto adequately accomplished.

The condition of the East Ward weigh scales management has been extremely loose. No person seems to have been properly entrusted therewith, and entries of past income from this source are practically unverifiable.

The responsibility for the future conduct of these weighscales is not yet fixed upon anyone, and the system for the West Ward will not be adopted here until the receipts from that source exceed the trifling sums now obtainable.

The scales are reported to be chronically unreliable, while the use of them is so infrequent as to suggest their removal.

Cash Book Bank Account.

The Auditors for 1907, having alleged a large discrepancy in the overdraft stated in the Annual Statement for 1906, and the Treasurer being unsatisfied with this finding, the matter was very thoroughly gone into on both sides of the account from 1904.

The results are shewn upon the accompanying schedules, prepared in full, to exhibit the agreement or otherwise of the deposits as in the books of the bank, with those appearing in the cash book for the period. The payments were treated in a similar manner.

The balances of the 31st December, each year, taken from the cashbook, will also be seen readjusted to those displayed in the bank pass books.

Original pass books of the general account were not obtainable for any year. Leaves from the bank's own ledger were therefore called into use, supplemented by statements furnished by them of the tax account.

In no single instance was a reconciliation statement shewn of the bank's balances, with that of the Treasurer's cash book at the end of the year.

No lists could be procured of outstanding cheques at any date whatever, neither were any copies of deposit slips available.

Entries of deposits were made in an exceedingly irregular manner and those into the tax account mixed with those of the general account.

Deposits belonging to one year were sometimes entered into the cash book for the next or preceding year.

The Bank Overdraft was incorrectly stated in every year, beginning with 1904, as will be seen upon the schedules.

Contrary to By-law 130, requiring all payments to be made by accepted cheque or bank draft, and which if complied with would have made the cash book payments identical with those in the pass book, cheques were permitted to go unpresented, and outstandings, therefore, confused the account.

For the past year there were none but pencil footings of the bank account columns in common with those of the other columns.

Any error in the amount inserted as the net overdraft in the cash book is naturally reflected in the cash balance.

An error at the end of 1904, of $1,960.13 was actually a mis-statement of tax moneys on hand at that time, but not so treated until 1905.

The error at the close of 1905, of $200.93 was an understatement of the amount of cash in the Treasurer's hands then, not deposited until the following February.

The errors in the additions of the cash book deposit column for 1906 were responsible for the cash balance on 31 December being shewn incorrectly by $1,180.77, and this shortage was carried through until the end of 1907, leaving the cash balance at that date deficient also.

The final adjustment of the bank pass book with the cash book to 31 August, 1908, has been made as shewn herein.

Bank Cheques.

The form of these is an admirable one, they are clearly written, and the account chargeable is definitely stated. Some points, however, need mention to make of these cheques positive proofs of payment to intended payees.

(1) Against the name of the account chargeable should be written as per "invoice No. —, or requisition No. —, or statement No. —, or register No. —," as a direct reference to the document on numerical file, or to the book in which salaries, debentures, etc., are to be found, so that full information regarding the payment may be obtained by turning to the original records.

(2) When drafts are to be brought for outside payments, cheques are better made to the order of the bank "for draft payable to ——."

(3) Payroll cheques must bear the date up to which time they are intended to settle wages, and also the consecutive number of the payrolls on file.

(4) A statement of all petty cash payments made by the Treasurer out of the $25 advanced to him must accompany his request for refund, and be numbered in consonance with all accounts.

(5) It will be observed that no cheques are to be made payable to the Treasurer, except for petty cash refunds or for payroll purposes.

(6) In this connection it will be well to state that the Clerk must see that he has in his possession original documents or books in which may be found a reason for every cheque he writes. That he must file the documents numerically and index them. That the cheque number must be placed upon the document or book line to connect it with the payments to avoid duplication of same. That against each Council order for payment the cheque must appear.

(7) Spoiled cheques must be preserved for Auditors' scrutiny.

(8) Attention must be given to By-law 130, requiring all cheques to be accepted by the bank without delay in order that the pass book may always correspond with bank columns in the cash book.

Several important cheques were missing from 1905 to 1908, which shows that the Treasurer was not particular in getting them from the bank, or else in taking care of them since.

Cheque No. 4594, February, 1908, for $446.01, given by Council for rebates to electic light users in November and December, 1907, made payable to the Treasurer and cashed by him, was not all used at this date for rebate payments; the sum unused is therefore charged against him.

If rebates, or remissions are needful, it is more regular for them to be passed by Council, from a proper list, and credited through the journal to the individual accounts in the register, before payment is made by the consumers or taxpayers.

The inflation of electric, water or tax receipts by remission or rebate cheques drawn on the general account and redeposited, is misleading in the results.

Accounts Payable.

The absence of any lists or intelligible memorandas relative to the current liabilities at any date within recent years, leads to the supposition that no record was kept of the accounts payable by the Town during the year, and that the sum of indebtedness exhibited in the balance sheets was merely guesswork.

The double payment of accounts is of easy occurrence unless some steps are taken to shew how each debt incurred is finally settled.

It is the duty of the Clerk to receive and care for all invoices rendered to the Town, but to accept them only when they have been properly certified to by the heads of the departments or by the chairman of the committees.

It is therefore proper and desirable that when, by such confirmation, the debt is defined, to place the amount to the credit of the claimant.

A ledger is accordingly provided for "Accounts Payable in which such accounts should be kept by the Clerk, and he will credit therein by the date and number of the invoice on file.

Since all cheques are drawn by him, he may from the stub of the cheque book from time to time, charge such ledger accounts with the payments.

By such treatment the unpaid accounts will be readily known, and a list of them can be laid before the Council at every meeting. Settlement will not be easily duplicated, and future reference may be made without difficulty to the dealings with any party. This ledger must be entirely completed, and balances therein brought down and drawn off for the auditors at the close of the year.

The use of a paylist explained later, will make for clearness with accounts dealt with by the council, but it is necessary for the Finance Committee to discriminate carefully as to the account chargeable, the term "General" found on too many cheques being quite indefinite.

A permanent record of officials, of their positions, salaries, dates of appointment and cessation, and of duties generally, is necessary when reference is required for length of service and remuneration.

A sketch of such a record is connected hereto for the clerk to enter up at the end of his minute book, and to re-write each year, that the Councillors then may be guided.

A tabular record of the Councilmen and officers who since 1903 have served the Corporation, is also submitted.

Accounts Receivable.

Any system for recording these was lacking prior to 1907, when Council passed a resolution instructing the clerk to notify the Treasurer of such indebtedness.

This course is the correct one, but for the carrying out of it will need a succession of numbered advice notes from the Clerk directed to the Treasurer, instructing him that upon a certain date the Council authorized the billing of certain charges to persons named, for a specific sum.

It will, of course, be necessary for Council to sanction all such charges although they may originate from its officers, such as those of Waterworks, Electric Light or Roads and Bridges. It will become the Treasurer's duty to open ledger accounts for all such parties, and to charge them from these "charge notes." When payments are made, credits therefore to the ledger, will appear from the cash book.

List of delinquents must be periodically prepared, and laid before the Council, and no debts may be written off without their approval.

The entire absence of lists of debts, also the loose keeping of memorandas and statements of accounts due the Town, has made it an impossibility to correctly ascertain the indebtedness under this head, but a list will be found attached, of some of those who have yet to make settlement.

A form of "charge notes" is attached hereto as having been introduced. Binders for Clerks and Treasurers will hold for each official a copy of the bill, and the triplicate will be mailed to the debtor.

Cash Statement, 1907.

In the preparation of this statement, divisions have been made as nearly correct as possible, from the meagre information that the books afford.

The sundries column in the cash book must be wisely used in future, to only contain items for which there are no columns provided.

Throwing items into "miscellaneous" will not do, and members of finance must discriminate more carefully as to the correct account chargeable.

The income of a municipality for any one year is not the sums it is entitled to receive, but its actual receipts, nor is it expenditure other than the payments made during the year.

If the Council for any year neglects to cover expenditures by payments, it is transmitting a debt to its successors in office; similarly if they do not collect their full income they must forego the credit for such extra earnings.

The act requires the balance sheet to show the deficient acts of finance, in debts outstanding, and the cash statement to show how much of monies receivable came in, and how far they were used in covering all expenditure.

It will be observed that the tax receipts of $30,298.26, for the year have been separated according to the Collector's roll, into those for the different debentures, and for school purposes, both destinations being unquestionable.

Only the residue of the receipts is available for general purposes, and must be lessened by tax remissions, since the above two classes of levies are the first claims upon the receipts.

It is recognized in the balance sheet that there were taxes uncollected at the close of the year, but such receipts will form part of this year's income against a heavy debt to the bank.

While the receipts from electric and water rates largely overcome the expenses, it must be borne in mind that future maintenance may reverse this situation in extraordinary repairs or maintenance.

Payments for construction or equipment purposes, must be differentiated from those of restoration, re-construction, renewal or replacement, for the reason that one class of expenditure is of a lasting character, and the other ephemeral and of annual recurrence. To burden any single year with an outlay stated as an ordinary expense, but the benefit of which persists beyond the period is to do an injustice to that year's showing of the Council.

Town Balance Sheet.

Statement herewith exhibits an insufficiency of cash assets to meet pressing liabilities in the sum of $14,962.95, and must be taken to mean that either the Council of 1907, or that of preceding years, has created this deficiency.

Since no similar balance sheet was prepared at the close of 1906, showing the shortage then, it cannot be attributed to any particular year.

It must be dealt with by the Council of 1908, in addition to their year's expenditure, if the town is to be free of current obligations when they shall render an account of their stewardship.

No such short collections, or unpaid claims, should have been permitted to accumulate in any year for the next year's Council, as they have enough to do to get in and pay out the funds of their own period.

That the over expenditure shown, flows from construction work, evidenced by the large sums used in excess of debenture proceeds, and to the extent of $14,000.00; this has been recognized by the Council of 1908, in issuing debentures to take up unprovided for expenditure upon electric and waterworks.

Investment Balance Sheet.

Statement accompanying this report will serve to show the position of public works at the close of 1907, in regard to the expenditure, so far, thereon, the obligations under debentures therefore, and the amount invested therein by the ratepayers through the redemption of debentures, or by the application of general town funds thereto.

The assets have been simply stated at their expenditure values, there being no dependable guide for any other valuation. Goodwill is of course not in evidence, nor any interest upon works during construction, except as such may have entered into contractors' accounts.

It is apparent that sums expended in excess of debenture proceeds were derived from general receipts, and assisted to create the heavy overdraft in the Bank of Ottawa.

Expenditures have regard to payments only, all of which were not made at the close of 1907, according to the current balance sheet.

The fixed assets are investments only in the sense of accounting for the various expenditures made thereon, and the consequent benefit to the property owners in enhancing real estate values. In thus raising the sum total of the assessment roll, the financial standing of the Town is improved, and its debentures are more favourably marketed.

The school supporters as a class, are entitled to regard their payments of debentures levies as investments in the building limited to themselves; just as the local improvement gives to those who pay them an equity in the construction of the sewers.

As each debenture is paid off a transference of equity takes place from the debenture holders to the ratepayers, but not however, with reference to any particular property, since the security of debenture holders resides in the taxing power generally, the destination of their monies being only the pretext for the loans made.

Transient Assets.

The extreme looseness in regard to the inventorying of road machinery, firehall equipment, electric supplies, sewer pipes, etc., makes any valuation of these in the meantime untrustworthy.

A proper record of these ought to be made as soon as possible, in order that they may be properly accounted for hereafter.

At any time these are not assets having the character of convertibility or permanence, hence they cannot be classed among those of the cash investment balance sheets.

Their values are too changeable for recognition when considering the substantial resources of the Town.

They are when purchased, chargeable to the department requiring them, to be included in the expenditure for the year.

As almost every year calls for the purchase of some apparatus, each department will have its turn in the course of a few years, and can afford to show extra expenditure on account of such acqusition, without needing to claim credit for what loose property is still in use.

A list of these should, however, be appended to the annual report, if only to show their existence, and an indexed inventory book used as a permanent record thereof.

The original purchases are at present buried among the expenditures of the past, in such a manner as to take considerable time and care in tracing them up to, and discovering their final disposal.

Bridges and Roads.

Seguin River bridges expenditure, according to ledger, has amounted to $7,685.86, against debentures issues in 1901 and 1903, of $5,500.00, of which $4,337.76 was unmatured at 31st December, 1907.

Debentures for $16,000.00 in 1905, for sidewalk and roadway construction under by-law 264, seems not to have been all expended at 31st December, 1907, according to ledger account, which shows payments under this by-law of $14,364.32.

Under the head of "Roads and Bridges" led. 271, there is the large sum of $7,404.47, for the year 1907, current expenditure.

It is therefore highly probable that some of this is chargeable against by-law 264, although little evidence regarding it is available.

Upon the supposition that some of last year's work on ways was of an enduring character, a transfer to ways construction is to be made for $1,-635.68, bringing the expenditure at least up to the debenture issue.

Belvidere Sewer.

When the laying of water pipes on this avenue was contemplated, it was desired by the residents that a sewer be laid in the same trench, and a request was said to have been made upon the council for this to be done. It was also asserted that a petition was drawn up, and an agreement entered into, between the residents and the town in this connection.

The minutes, however, do not contain mention of the matter, nor is any petition or agreement in evidence. The supplemental sewer work was, however, undertaken, under the supervision of the waterworks superintendent, who on the 11th December, 1906, reported to the Mayor the extra cost to be $496.25, and on 23rd December, 1907, he furnished the names subjoined of 18 owners, who were benefited by such sewer construction, upon the understanding that each should pay one-eighteenth of the cost, or $27.56 each. Three of the parties, viz:—Jno. Paul, H. Y. Complin and J. A. Johnston paid their proportion to the Clerk, who now holds the amount of $82.68 on their accounts. The remainder, for whatever reason, either demurred to any payment whatever, or desired extended time. In dealing with the remaining indebtedness of $413.57, in the absence of agreement for payment of same, council might take solicitor's advice as to passing a by-law imposing a special rate upon the properties, according to frontage, and levy thereon through the collector. This will necessitate the refunding of sums already paid, to those who paid them. An alternative would be a private arrangement among the owners, whereby each shall contribute as may be thought acceptable. The sum expended has so far been provided at the Town's expense as a burden upon the general rate.

Names of contributors mentioned in Superintendent's report are: Who have paid: J. A. Johnstone, H. Y. Complin, Jno. Paul. Who have not paid: Chas. Holmes, Geo. Moore, Henry Jukes, Belvidere; W. R. Foote, W. L. Haight, J. G. Johnstone, R. W. George, Miss Kirkman, W. B. McLean, J. W. Fitzgerald, R. H. Henman, W. F. Thomson, J. Galna, F. R. Powell.

W. L. Haight was billed on 25th June, 1907, with $136.50 for a sewer connection and protested next day to Council. This matter is of too indefinite a character to be dealt with except by the present Council.

Water Revenue.

Cash income is all that need be considered, for if charges are not collected within the year, when so many are payable in advaance, then the supply may be stopped, and expenses reduced accordingly.

Arrears have accumulated simply from laxity of enforcement of payment, and while an asset, if collectable, are, for the use of the years' Council collecting them.

If the council of one year get no credit for charges collected in the next, they will see to it that no arrears are carried over.

Similarly only payments of expenses made during the year need be recognized, for the outgoing Council will have the debts bequeathed to their successors, shown in the balance sheet.

Let it be at once understood that the water-takers are under obligation to furnish the town and schools with free water and on the other hand they are granted the free use of electric power, then the question of the cost of supplying water for hydrants or schools, and electrical current for pumping purposes, which in the absence of a complete meterage system cannot be gauged with any reliability, need not be entertained.

Neither is there any necessity for guesswork as to depreciation. The ratepayers generally are owning the plant by payment of debentures, and they are prepared to improve it when exigencies arise, either by immediate or protracted levies.

The upkeep charges only are a burden upon water users, as paid expenses of operation, and the surplus of receipts over these is due to water users in lower rates.

The town has apparently been using surplus receipts for construction purposes. In so far as this is re-construction work, the water users should furnish the funds; further than that the ratepayers generally should be drawn upon.

Interest upon debenture debt paid by the ratepayers generally is more than offset by the freedom of the Town from water charges of any kind for municipal purposes.

The net profits from this department shown in annual statements assume far too much. The charges are subject to discount; the hydrant consumption is conjecture; expenses are not all considered; and the debenture principal is not a charge against revenue, even as an attempt at depreciation.

To exhibit a true statement of earnings against charges is to place municipal works on a level with private enterprises. It is to build up a reserve fund for investment against the indefinite time of need. It would require accurate measurement of water consumption, and a more exact rating than prevails. Town funds would have to pay for hydrant use, and schools for their consumption. Electrical power cost would have to be carefully ascertained, and an appraisal made of the replaceable value of the plant as distinct from that of the location and of the permanent work, the life of the plant only being takable into account for depreciation purposes. When all this is done the result would have little usefulness to the Town itself.

Electric Revenue.

Receipts have been in excess of payments for expenses of operation, not allowing credit for power to waterplant, nor for lighting of streets and municipal buildings, the cost of which must be stated by superintendent annually and mentioned in the yearly report. Electric users may regard their rates as covering the cost of such service in return for the payment of debenture interest by the general ratepayers.

This free service is not obligatory upon them, but is somewhat occasioned by the great difficulty in arriving at the exact expense of furnishing current in such directions.

The Kilowatt output at the works cannot be accounted for upon the present combination system of flat, meter, and special rates, consequently no reliable basis of public charges is in evidence.

It is not for consumers to provide for debentures; that is the bonus on the ratepayers by special levies.

The rates will stand all charges for maintenance, salaries, and cost of ordinary restoration.

The surplus receipts appear to have been occupied in much of the work of construction and equipment, and from this direction has undoubtedly proceeded the expenditure over debenture monies.

Hereafter, liberal charges may be made against revenue, for renewal or re-construction, but enlargement ought to be at the expense of the general ratepayers out of debentures, as they are requiring equity in the works through redemption of these. Discounts, and rebates to consumers are not an expense payable by cheque but a diminutive of income, to be deducted from charges, so that cash receipts remain the true income.

Current may be cut off for non-payment, and service expense lessened thereby, with the falling off of receipts. There is therefore no advantage in treating charges as electric income, instead of the actual receipts. Each years' Council must see that all rates are paid so that their year may enjoy its full income.

Payments of operating expenses must be completed within period, otherwise the accounts unpaid at its close will constitute a deficit for this department, to the discredit of the of the outgoing Council.

Lacking information as to the life of the plant and its value separable from permanent work, any attempt at depreciation would be too arbitrary to have any significance. It is unwise, therefore, to exhibit it.

Assuming that all rates are collected within the year, and payments of all maintenance and renewal charges against revenue made before its close, the cash statement will show the surplus or deficit sufficiently well for practical finance.

Advance payments of both electric and water revenue are not strictly earned within the calendar year, but, nevertheless, as cash receipts they are available for projected expenses, and each succeeding year will be drawing its income in advance in perpetuity.

An attempt to apportion the receipts to the year in which service was rendered, would display a complex statement of revenue for each department that the councillors and ratepayers would find hard to understand, and with which they would have little patience.

The general installation of meters has been strongly recommended by the superintendent, Mr. Groves, and his reasons are undoubtedly good ones. Having no Watt meter at the works he cannot easily measure the output, hence the kilowatt cost is in obscurity. Without private meters, that output cannot be accounted for, nor leakage or waste ascertainable, nor can charges be made in accordance with current used, nor can any figures for kilowatt income be obtained.

Estimates and Appropriations.

It is difficult to understand how the guidance of the town's financial affairs was accomplished in the absence of any recorded information as to expectant income, or projected expenditure.

As revenue came in and expenditure proceeded, the various committees must have been uninformed as to the funds available for their purposes.

That payments outrun the provisions originally estimated for, was not to be wondered at.

The simple remedy for this state of affairs lies in the adoption of a definite and permanent form of estimates that shall follow the lines of the cash statement now shown, and set contemplated expenditure in direct contrast to the income appropriated therefor, at the time of striking the rate.

An "Appropriation Ledger" kept by the clerk, will contain accounts for each committee, or special purpose, to be credited with the appropriation or debenture proceeds granted them by the council, as in the estimates, and charged from the beginning of the year with each cheque that is applicable to such classifications.

In this manner it is possible for the clerk to set before each sitting of the council, a report upon the residue or deficit of appropriations, and a salutary check thereon may accordingly be exercised.

School Books.

The cash book was in chaos for 1906 and 1907, and has not been written up for 1908.

The bank accounts for the two years were gone over, and straightened in accordance with accompanying schedules.

The cash book balances were incorrectly stated at 31st December, 1906 and 1907.

No pass book was obtainable for the earlier part of 1906, the cheques for the whole of the year were missing, and no official seemed to know where they had gone to.

The town was in debt to the School Board at the close of last year for $1,798.52, according to the town ledger, and paid them since $1,672.81, the balance of $125.71 since 1906, is still to the credit of the schools, less $30.00 for rent of the council chamber for 1907.

The small remuneration for keeping the school books would suggest that a separate treasurer is unnecessary. The town treasurer could perform the work with that of his own, and the bookkeeping would be properly done by an experienced man.

The loose keeping of invoices for payments made, has led to the absence of a large number of them; the lack of proper certificates as to their correctness; and to such confusion in the arranagement as to make ready reference an impossibility.

Proper attention must at once be given to the filing of these vouchers, to their certification and to the marking thereon and on checks therefor, of the account chargeable therewith.

A school ledger and journal are needed and accounts must be kept with the town and with the various sources of receipts and directions of expenditures, particularly those of building, so that a proper balance sheet may be presented annually.

Debentures are liabilities of school supporters to the town, and the application of the proceeds must be shown.

School trustees have the right to requisition for their estimates and to demand all school levies after collection dates. They may make prior loans at the town's option only, and must pay interest thereon.

A duplicate receipt form similar to the town one must be adopted in lieu of the present stubs, which serve no purpose as vouchers.

A table of teachers and officials with the dates of appointment and resignation and of their salaries ought to be annually accepted by the Board.

The Town Council has a right to insist upon competent bookkeeping, efficient auditing and full, clear statements.

Town Dock.

A lease was drawn up with James Allen in 1905, stipulating a yearly rental from the opening of navigation in one year to the opening of it in the next, of $200 per annum, payable in quarterly instalments of $50 each.

In 1905 two payments were made of $50 each, one of which was omitted from cash book.

In 1906 two more were made, and again, one was not found entered.

In 1907 $200 was paid to 1st April, 1907. None was paid since, up to October 24th, when Mr. Allen was examined as to the status of his debt.

He thereupon paid over the sum of $200 for rent to 1st April, 1908, and engaged to pay the yearly rental to 1st April, 1909, in quarterly instalments.

One half of the current year's rental being now due, Mr. Allen must pay another $100 to the treasurer.

As to the omitted entries of above receipts, the ex-treasurer has now paid them in.

The town solicitor must pass upon the agreement in respect of the dock.

System.

Care has been exercised in planning books and forms suitable to ensure to the town its income, to protect water and electric users from unfair charges; to record the liabilities as they arise; and the debts to the town when passed by council that shall be plain and unequivocal.

Lack of method hitherto, has been responsible for many of the errors so far discovered, and the further loss to the town by omission of special charges may be left to conjecture.

That more work will be entailed upon officials than formerly, follows from the introduction of exact records in the place of loose ones, and from the requirements of proper and complete bookkeeping, instead of work that has been incomplete and generally behindhand.

If the officials are diligent in their duties their attention to the system will follow as a matter of course, and the result will be to place their work upon a higher standard of efficiency, and their services shown to be of greater value to the council.

Neglect of the system will leave loopholes for irregularities to creep in, with the aftermath of confusion and distrust engendered in the minds of the citizens.

Insistence upon proper and punctual work rests with the council, if report be made to them of the non-observance of the system.

The clerk's ability and readiness to improve the service of his department in the directions indicated in this report cannot be questioned, and if as a result of the recommendations made the council have fuller, truer, and quicker information upon the town's affairs, their appreciation ought to be shown in an advancement of the salary of that hardworking official.

Auditors.

The work of such officials is generally entitled to more consideration than is usually accorded, and for reasons understated:—

1. At the time of taking office they were unacquainted with the method of bookkeeping, and of the system behind it.

2. They had to take their material as they found it, not having been granted the power to insist upon their requirement.

3. Complications introduced into the methods of the books and accounts were supposed to be unravelled by them into a sure result.

4. Annual statements and supporting lists that should have been exhibited to them for verification only, were left for them to prepare.

5. Vouchers for receipts and payments that are lacking in the essentials of such forms of evidence, had to be accepted as proofs.

6. They were hampered in not having uninterrupted use of the books during the period of audit.

In the face of such difficulties, and in view of the responsibility resting upon them, it is not an enviable task to produce satisfactory statements.

The auditors evidently did a lot of hard and conscientious work that need not have been imposed upon them had the treasurership been properly conducted.

It is for councils of the future to confer over-riding power upon their auditors, if the interests of the ratepayers are to be adequately protected, and to accept no appeals that admit dilatoriness or incompleteness on the part of officials.

Auditors are presumed to be those best acquainted with the proper methods of records and accounts, and the system prescribed by them should not be abrogated or modified without their express approval.

Conclusion.

The object of this enquiry, as at first outlined, having been attained, in so far as the means of conducting it were available, it is hoped that the results will be of benefit to the future representatives of the citizens by enlightening their work of legislation.

The assistance rendered generally by councilmen and officials under the trying circumstances of the enquiry deserves recognition.

Your genial and broadminded Mayor smoothed over many of the earlier complications of the situation, and made the task of carrying on the work much easier.

Thanks are especially due to councillor Gillespie for valuable information upon matters of finance, and for practical assistance. Upon Mr. R. Y. Complin, the manager of the Bank of Ottawa, particularly, and upon his staff generally, demands of their time and patience were most exacting, and their willing and cheerful response is cordially acknowledged.

In your superintendents of works you have men thoroughly acquainted with the proper conduct of their departments, and their opinions ought to carry weight when questions of rates or re-construction arise.

It was the express desire of the Provincial Municipal Auditor, Mr. J. B. Laing, that the ratepayers should be informed as fully as possible upon what has taken place in connection with the financial affairs of the town, and their council and officials be so advised that a recurrence of irregularities and confusion would be avoided for the future.

This report and schedules are accordingly submitted to your council in the belief that conditions of bookkeeping and finances will thereby be ameliorated.

Respectfully yours,

(Signed) Oscar Hudson,

Chartered Accountant.

The cost of this audit to the Town of Parry Sound was $

Town of Kenora.

In the matter of the Municipality of Kenora there were present on the 22nd day of July, A.D. 1908, at the municipal offices of the Town of Kenora, the following individuals,—

J. B. Laing, Municipal Auditor of the Province of Ontario, convener of the meeting.

J. E. O'Connor, Barrister, representing 70 petitioners as by a petition presented to J. B. Laing asking him officially for relief.

Charles Pope, Alderman, Town of Kenora.

D. H. Currie, Clerk and Treasurer, Town of Kenora.

H. Ridout, Mayor, Town of Kenora.

H. A. C. Matchen, M.P.P., Town of Kenora.

On behalf of the petitioners, Mr. J. E. O'Connor presents said petition and asks for an investigation into matters covered by said petition, and also

states that in the event of the Government granting the prayer of the petition, that he will be prepared to probe the allegation of the petition. Mr. O'Connor on behalf of the petitioners would suggest that two accountants be appointed for the investigation, one from the City of Winnipeg and one from Toronto.

The Mayor makes the statement that any addition to the present town debt would result disastrously and be a strong injury to the finances, resulting even the course of the hands of the receiver. Mr. O'Connor is prepared to state on behalf of the ratepayers dissatisfied—the 70 dissatisfied—if the Mayor and meeting agree to grant an investigation later on, say next February, he would be prepared to meet their views.

Investigation not to be begun until next February.

Mutually agreed 22 July, 1908.

J. B. Laing,
Convener.
J. Edward O'Connor,
For Petitioners.

Members of the Town Council of the Town of Kenora for the Year 1906.

Mayor: C. W. Belyea.

Aldermen: Wm. Robertson, P. H. Austin, W. W. Scott, J. E. Alcock, M. Musk, J. K. Brydon.

Corporation Officials: D. H. Currie, Clerk and Treasurer; A. McLennan, Solicitor; A. D. Dalgleish, Chief Constable; C. W. Chadwick, Assessor and Collector; F. A. Hudson, Chief of Fire Brigade; Thos. Hanson, M.D., Medical Health Officer; E. Appleton and W. Walker, Auditors.

Assessment for the year 1907, $2,227,500.

Population (by Dominion Census), 5,202.

Auditors' Report.

To the Mayor and Aldermen, Town of Kenora.

Gentlemen,—We, your auditors appointed to audit the books and accounts of your municipality for the year ending 31st December, 1907, beg to report that we have examined the books and accounts and the vouchers relating thereto and submit herewith statements of the same which are correct and in accordance with your books. Copies of these statements and of our report are being forwarded to the Bureau of Industries in accordance with the Municipal Act in this respect.

The statements which we submit are:—

(1) Statement of assets and liabilities.

(2) The receipts and expenditures showing the amounts received and expended under the various departments with summary of the total receipts and expenditures and a list of the outstanding cheques.

(3) Revenue and expenditure statement.

(4) Public School accounts showing the receipts and expenditures and assets and liabilities, of all which we have audited and found correct.

(5) Statement of revenue producing operations. We also submit a statement showing the errors and omissions which came under our notice between the assessor's roll and the collector's roll and in the local improvement assessments. In this connection we wish to point out the increase in these errors as compared with last year's report and we require that these books be kept in conformity with the intention for which they are provided. A

great amount of unnecessary detail has to be gone into each year by your auditors which would be obviated by a more systematic summarizing and balancing of these books. As these books are only checked once a year and practically only at a year after they are made, it can be easily seen that some attention to details at the beginning would have better results than the finding out of the mistakes a year after they are made.

Assets and Liability Statement.

Upon this statement we bring to your notice among the assets the item of law costs for water power developments. At the date of this audit, viz., December 31st, 1907, we consider that there was justification for carrying this item as one of your assets. This amount, $3,454.40, is the amount which had up to the end of 1907 been paid for legal expenses in connection with the water power litigation, and at this time by the decision rendered in favour of the town there was reasonable hopes that this amount or the greater portion of it would finally be recovered. Now, however, by the adverse decision recently rendered this amount cannot be looked upon as an available asset and will probably have to be written off as a loss during the present year.

The electrical lighting and telephone plants (other than the hydro-electric power plant) were at the end of 1907 re-valued by your manager, Mr. Stokes. By this re-valuation the sum of $11,784.61 has recently been written off for depreciation on the old electric light system and fire alarm system. This large depreciation has, however, been more than recovered by the addition of new work, among which you will note the arc light system, the increased value of the telephone system, and the addition of the new power transmission line to the electric system. Depreciations have also been allowed on your bridges, customers' accounts, taxes, school property and office buildings and furniture, while additions have been made to the value of the school property by the building of the new infants' school.

Receipts and Disbursements.

In this statement it will be noticed that the advances made by your bank upon your general account during the year amounted to $28,500.00, while the repayments made on the same account amounted to $55,900.00, reducing the liability on this account from $41,000.00 as at the first of the year to $13,600.00 at the end of the year. In this connection, taking in conjunction all the statements made by us, it is shown that the revenues of the town from all sources were more than sufficient to cover all expenditures and to make provision for the apportionments of the assessment protecting your sinking fund and debenture liabilities. Yet it is apparent by the reduction in the bank liability and the fact of debentures and interest due and payable last December being still unpaid that revenues provided for certain purposes have been allowed to be mis-applied. We submit a statement of the debenture liability which became due last year and is still unpaid, amounting to $9,714.43. Of this amount $4,337.26 was considered to be fully protected by the revenues of the water works department, and therefore no provision was made for it by assessment. The result of the water works operations shown in the operation statement submitted shows that this department very nearly (by only $226.29 of a deficit) did fully pay for all its costs of operating, maintenance, interest and capital expenditures; so that the unpaid water works debentures and interest above referred to were fully protected by the revenues, and the assessment made on the general taxation for the amount

other than the $4,337.26 referred to was not necessary, but by the levy does practically account for the large surplus resulting from the last year's operations.

The revenue and expenditure statement, which shows in what manner the surplus gain in 1907 was derived, also shows that the revenue producing departments are nearly self-sustaining. Last year was one of extraordinary expenditure in the maintaining of your operating departments and plants, as is evident by the large amount of accounts payable, viz., $29,308.76. These accounts payable could therefore have been considerably reduced were it not that the revenues of the town were mis-applied to the reduction of the bank liability, which liability had not the direct connection with the revenue producing departments for the maintenance of which departments these accounts were incurred.

The Sinking Fund and Liability.

The liability against this fund is now $11,625.43, and we must protest against the manner in which the funds for the protection of this liability have been and are being used. In our opinion the transfer last year of $2,500.00 of these funds to your general account was not in accordance with the spirit of the statutes providing for the investment of such funds. The necessary levy for the protection of these funds was made last year and in view of the surplus gain of last year there is no reason why this sinking fund should have been depleted.

We have the honour to be, gentlemen,

Your obedient servants,

(Signed)

E. Appleton,

W. Walker,

License and police department, gain		$5,404 40
Net deficit for year in revenue producing department		476 87
	$5,881 27	$5,881 27

In addition to the audits, reports of which are herein, there was also an audit of the affairs of the Township of Rochester, by Mr. George K. Prowse, at a cost, after mutual settlement, of $1.000.00.

Two very important audits have been placed since the first of 1909.

The Township of Chatham, County of Kent, with Mr. A. F. Falls of Chatham, Town Chartered Accountant, and the Township of Raleigh with Mr. I. W. Sharpe, K.C., of Dresden, County of Kent. I expect good results from both these audits.

The number of audits in 1906 amounted to 13, and the amounts paid to auditors, $7,370.60. There was no outlay in 1907.

J. B. Laing,

Provincial Municipal Auditor.

Toronto, February, 1909.

Amount paid by Ontario Municipalities for Government Audits for the year, 1908.

Village of Beamsville, Oscar Hudson, Auditor	$498 00
